Common Stock, \$0.001 Par Value	The NASDAQ Global Select Market				

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act of 1933. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act"). Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.
Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the registrant's stock outstanding as of June 30, 2009 was 34,256,923. The closing price of the registrant's common stock on the Nasdaq Global Select Market as of June 30, 2009 was \$22.41. The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant based upon the closing price of the Common Stock on the Nasdaq Global Select Market on June 30, 2009 was \$554,951,133.*

There were 35,235,634 shares of the registrant's common stock issued and outstanding as of February 2, 2010.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the registrant's 2010 Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K to the extent stated herein. The Proxy Statement will be filed within 120 days of the registrant's fiscal year ended December 31, 2009.

* Excludes 9,493,374 shares of the registrant's common stock held by executive officers, directors and stockholders whose ownership exceeds 5% ("affiliates") of the Common Stock outstanding at June 30, 2009. Exclusion of such shares should not be construed to indicate that any such person possesses the power, direct or indirect, to direct or cause the direction of the management or policies of the registrant or that such person is controlled by or under common control with the registrant.

Except as the context otherwise requires, the terms "Monolithic Power Systems", "MPS", "Registrant", "Company", "we", "us", or "our" as used herein are references to Monolithic Power Systems, Inc. and its consolidated subsidiaries.

FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K and the documents incorporated herein by reference contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that have been made pursuant to and in reliance on the provisions of the Private Securities Litigation Reform Act of 1995. These statements include among other things, statements concerning:

- ☒ the above-average industry growth of product and market areas that we have targeted,
- ☒ our plan to introduce additional new products within our existing product families as well as in new product categories and families,
- ☒ our belief that we will continue to incur significant legal expenses that vary with the level of activity in each of our legal proceedings,
- ☒ the impact of our outstanding litigation and changing market conditions on the revenue we derive from our CCFL product line,
- ☒ the effect of auction-rate securities on our liquidity and capital resources,
- ☒ the application of our products in the computer, consumer electronics, and communications markets continuing to account for a majority of our revenue,
- ☒ estimates of our future liquidity requirements,
- ☒ the cyclical nature of the semiconductor industry,
- ☒ protection of our proprietary technology,
- ☒ near term business outlook for 2010,
- ☒ the factors that we believe will impact our ability to achieve revenue growth,
- ☒ the percentage of our total revenue from various market segments, and
- ☒ the factors that differentiate us from our competitors.

In some cases, words such as “would,” “could,” “may,” “should,” “predict,” “potential,” “targets,” “continue,” “anticipate,” “expect,” “intend,” “plan,” “believe,” “seek,” “estimate,” “project,” “forecast,” “will,” the negative of these terms or other variations of such terms and similar expressions relating to the future identify forward-looking statements.

All forward-looking statements are based on our current outlook, expectations, estimates, projections, beliefs and plans or objectives about our business and our industry. These statements are not guarantees of future performance and are subject to risks and uncertainties. Actual results could differ materially from those predicted or implied in any such forward-looking statements.

Risks and uncertainties that could cause actual results to differ materially include those set forth throughout this annual report on Form 10-K and, in particular, in the section entitled “Item 1A. Risk Factors”.

We disclaim any duty to and undertake no obligation to update any forward-looking statements, whether as a result of new information relating to existing conditions, future events or otherwise or to release publicly the results of any future revisions we may make to forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Readers are cautioned not to place undue reliance on such statements, which speak only as of the date of this annual report on Form 10-K. Readers should carefully review future reports and documents that we file from time to time with the Securities and Exchange Commission, such as our quarterly reports on Form 10-Q and any current reports on Form 8-K.

PART I

ITEM 1. BUSINESS

General

Monolithic Power Systems designs, develops and markets proprietary, advanced analog and mixed-signal semiconductors. We combine advanced process technology with our highly experienced analog designers to produce high-performance power management integrated circuits (ICs) for DC to DC converters, LED drivers, Cold Cathode Fluorescent Lamp (CCFL) backlight controllers, Class-D audio amplifiers, and other Linear ICs. Our products are used extensively in computing and network communications products, flat panel TVs, set top boxes and a wide variety of consumer and portable electronics products. We partner with world-class manufacturing organizations to deliver top quality, ultra-compact, high-performance solutions through productive, cost-efficient channels. Founded in 1997 and headquartered in San Jose, California, we have expanded our global presence with offices in Taiwan, China, Korea, Japan, and Europe, which operate under MPS International, Ltd.

Industry Overview

Semiconductors comprise the basic building blocks of electronic systems and equipment. Within the semiconductor industry, components can be classified either as discrete devices, such as individual transistors, or as ICs, in which a number of transistors and other elements are combined to form a more complicated electronic circuit. ICs can be further divided into three primary categories: digital, analog, and mixed-signal. Digital ICs, such as memory devices and microprocessors, can store or perform arithmetic functions on data that is represented by a series of ones and zeroes. Analog ICs, in contrast, handle real world signals such as temperature, pressure, light, sound, or speed. In addition, analog ICs also perform power management functions, such as regulating or converting voltages, for electronic devices. Mixed-signal ICs combine digital and analog functions onto a single chip and play an important role in bridging real world phenomena to digital systems.

Analog and Mixed-Signal Markets. We focus on the market for 'high performance' analog and mixed-signal ICs. 'High performance' products generally are differentiated by functionality and performance factors which include integration of higher levels of functionality onto a single chip, greater precision, higher speed and lower heat and noise. There are several key factors that distinguish analog and mixed-signal IC markets from digital IC markets and in particular the high performance portion of the analog and mixed signal IC market. These factors include longer product life cycles, numerous market segments, technology that is difficult to replicate, relative complexity of design and process technology, importance of experienced design engineers, lower capital requirements and diversity of end markets. We have, however, targeted product and market areas that we believe have the ability to offer above average industry growth over the long term.

Products and Applications

We currently have three primary product families that address multiple applications within the computing, consumer electronics, and communications markets. Our products are differentiated with respect to their high degree of integration and strong levels of accuracy and efficiency, making them cost-effective relative to many competing solutions. These product families include:

Direct Current (DC) to DC Converters. DC to DC converter ICs are used to convert and control voltages within a broad range of electronic systems, such as portable electronic devices, wireless LAN access points, computers, set top boxes, automobiles and medical equipment. We believe that our DC to DC converters are differentiated in the market, particularly with respect to their

[Table of Contents](#)

high degree of integration and rapid switching speeds. These features are important to our customers as they result in fewer components, a smaller form factor, more accurate regulation of voltages, and, ultimately, lower system cost and increased reliability through the elimination of many discrete components and power devices.

Lighting Control Products. Lighting control ICs are used in backlighting and general illumination products. Lighting control ICs for backlighting are used in systems that provide the light source for LCD panels typically found in notebook computers, LCD monitors, car navigational systems, and LCD televisions. Backlighting solutions are typically either cold cathode fluorescent lamps (CCFL) or WLED lighting sources. The CCFL ICs function by converting low-voltage direct current (DC) or battery voltage to high-voltage alternating current (AC). We believe our CCFL ICs were the first to utilize a full bridge resonant topology that allows for high efficiency, extended lifetimes for cold cathode fluorescent lamps (CCFLs), and lower signal interference with adjacent components. The full bridge topology is now the industry standard for these products. WLED lighting control ICs step-up or step-down a DC voltage and provide efficient precision power and protection to a LED string or to multiple LED strings.

Audio Amplifiers. Audio amplifier ICs are used to amplify sound produced by audio processors. We currently offer Class-D audio amplifiers, which are well-suited for applications that require both a small form factor and high power efficiency, such as plasma televisions, LCD televisions and DVD players. With today's systems becoming smaller and utilizing larger amounts of power, solution sizes and the management of heat dissipation are becoming increasingly important to the overall system design. The high degree of power efficiency and small form factor provided by our Class-D audio amplifiers allows system vendors to significantly reduce heat dissipation, eliminating the costly and sizable fans and heat sinks traditionally required by audio amplifier ICs. These features enable our customers to achieve their design and cost objectives without sacrificing sound quality.

We currently target our products at the consumer electronics, communications and computing markets, with the consumer market representing the largest portion of our revenue.

[Table of Contents](#)

The following is a brief summary of our product family solutions for various applications. For each of these applications, we are currently shipping product or have design wins, which are decisions by original equipment manufacturers, or OEMs, or original design manufacturers, or ODMs, to use our ICs:

Application	WLED Lighting Illumination (non-backlight)	LCD Backlight (Inverters or WLED)	DC to DC Converters (Buck & Boost)	µP Reset & Supervisory	Audio Amplifiers	Xenon Flash	Chargers (Switching & Linear)	Current Limit Switches
Computing								
Computers and PDA devices		X	X	X	X		X	X

Networking Infrastructure			X	X				
VOIP			X	X				
Wireless Access Points			X	X				

We derive a majority of our revenue from the sales of our DC to DC converter IC product family to the computing, consumer electronics and communications markets. In the future, we will continue to introduce additional new products within our existing product families, such as high current, high voltage, small form factor switching voltage regulators, as well as expand our newer product families in battery chargers, voltage references and low dropout regulators. Our ability to achieve revenue growth will depend in part upon our ability to enter new market segments, gain market share, grow in regions outside of Greater China, expand our customer base and successfully secure manufacturing capacity.

Please refer to the table showing our revenue by product family in the section entitled "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations".

Customers, Sales, and Marketing

We sell our products through third party distributors, value-added resellers and directly to OEMs, ODMs, and electronic manufacturing service (EMS) providers. Our third party distributors are subject to distribution agreements with us which allow the distributor to sell our products to end customers and other resellers. Distributors may distribute our products to end customers which include OEMs, ODMs or EMS providers. Our value-added resellers may second source our products and provide other services to customers. ODMs typically design and manufacture electronic products on behalf of OEMs, and EMS providers typically provide manufacturing services for OEMs and other electronic product suppliers. The following is a summary for the years ended December 31, 2009, 2008 and 2007 of those customers that accounted for more than 10% of our total revenue in one or more of these years:

Customers	Revenue		
	Year ended December 31,		
	2009	2008	2007
A	13%	20%	18%
B	10%	10%	15%
C	10%	*	*

Current distribution agreements with several of our major distributors provide that each distributor shall have the non-exclusive right to sell and use its best efforts to promote and develop a market for our products in several countries in Asia. These agreements may be terminated by either us or the distributor on up to three months' notice. These agreements provide that payment for purchases from us will generally occur within 30 to 45 days from the date of invoice. In addition, we allow for limited stock rotation in certain agreements.

We have sales offices located in the United States, Taiwan, China, Korea and Japan and have marketing representatives in Europe. Our products typically require a highly technical sales and applications engineering effort where we assist our customers in the design and use of our products in their application. We maintain a staff of applications engineers who work directly with our customers' engineers in the development of their systems electronics containing our products.

Because our sales are billed and payable in United States dollars, our sales are not directly subject to fluctuating currency exchange rates. However, because 84% of our revenue in 2009 was attributable to direct or indirect sales to customers in Asia, changes in the relative value of the dollar may create pricing pressures for our products.

Our sales are made primarily pursuant to standard individual purchase orders. Our backlog consists of orders that we have received from customers which have not yet shipped. Our shippable backlog at December 31, 2009 was \$27.8 million. We believe that backlog is not necessarily a good indicator of our future sales. Order lead times may vary, and, as is common within our industry, customers are allowed to reschedule or cancel orders on relatively short notice. Our quarterly revenue is also influenced by orders booked and shipped within that quarter which are not reflected as backlog at the end of any preceding quarter. Our manufacturing lead times are generally 4 to 12 weeks and we often build inventory in advance of customer orders based on our forecast of future customer orders. This subjects us to certain risks, most notably the possibility that sales will not meet our forecast, which could lead to inventories in excess of demand. If excess inventory exists, it may be necessary for us to sell it at a substantial discount or dispose of it altogether, either of which would negatively affect our profit margins.

We operate in the cyclical semiconductor industry where there is seasonal demand for certain of our products. While we are not and will not be immune from current and future industry downturns, we have targeted product and market areas that we believe have the ability to offer above average industry performance over the long term.

[Table of Contents](#)

Research and Development

We have assembled a qualified team of engineers in the United States, China and Europe with core competencies in analog and mixed-signal design. Through our research and development efforts, we have developed a collection of intellectual property and know-how that we are able to leverage across our products and markets. These include the development of high efficiency power devices, the design of precision analog circuits, expertise in mixed-signal integration and the development of proprietary semiconductor process technologies.

Our research and development efforts are generally targeted at three areas: systems architecture, circuit design and implementation, and process technology. In the area of systems architecture, we are exploring new ways of solving our customers' system design challenges and are investing in the development of systems expertise in new markets and applications that align well with our core capabilities. In the area of circuit design and implementation, our initiatives include expanding our portfolio of products and adding new features to our products.

Please refer to the discussion of the amount spent on research and development during each of the last three fiscal years in the section entitled "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Research and Development". In the area of process technology, we are investing research and development resources to provide leading-edge analog power processes for our next generation of integrated circuits. Process technology is a key strategic component to our future growth.

Patents and Intellectual Property Matters

We rely on our proprietary technologies, which include both our proprietary circuit designs for our products and our proprietary manufacturing process technologies. Our future success and competitive position depend in part upon our ability to obtain and maintain protection of our proprietary technologies.

In general, we have elected to pursue patent protection for aspects of our circuit designs that we believe are patentable and to protect our manufacturing process technologies by maintaining those process technologies as trade secrets. As of January 11, 2010 we had approximately 309 patents issued and pending, of which 55 have been issued in the United States. Our U.S. issued patents are scheduled to expire at various times through August 2027 and our other issued patents are scheduled to expire at various times through December 2027. Our patents are material to our business, but we do not rely on any one particular patent for our success. We also rely on a combination of nondisclosure agreements and other contractual provisions, as well as our employees' commitment to confidentiality and loyalty, to protect our technology, know-how, and processes. We have entered into a patent license agreement with another integrated circuit company, pursuant to which we have granted this company a license (with certain limited sublicense rights) under certain of our patents to make, use, and sell certain of this company's own integrated circuit products for a period of two years ending in 2011, and for which this company is obligated to pay us royalties based on sales of those products. We also seek to register certain of our trademarks as we deem appropriate. We have not registered any of our copyrights and do not believe registration of copyrights is material to our business. Despite precautions that we take, it may be possible for unauthorized third parties to copy aspects of our current or future technology or products or to obtain and use information that we regard as proprietary. There can be no assurance that the steps we take will be adequate to protect our proprietary rights, that our patent applications will lead to issued patents, that others will not develop or patent similar or superior products or technologies, or that our patents will not be challenged, invalidated, or circumvented by others. Furthermore, the laws of the countries in which our products are or may be developed, manufactured or sold may not protect our products and intellectual property rights to the same extent as laws in the United States. Our failure to adequately protect our proprietary technologies could harm our business.

[Table of Contents](#)

The semiconductor industry is characterized by frequent claims of infringement and litigation regarding patent and other intellectual property rights, such as our litigation with O2Micro International Limited (“O2Micro”) and Linear Technology Corporation (“Linear”). For a more complete description of our legal matters, please read the section entitled Item 3. Legal Proceedings and Note 10 to our consolidated financial statements. Patent infringement is an ongoing risk, in part because other companies in our industry could have patent rights that may not be identifiable when we initiate development efforts. Litigation may be necessary to enforce our intellectual property rights, and we may have to defend ourselves against infringement claims. Any such litigation could be very costly and may divert our management resources. Further, we have agreed to indemnify certain of our customers and a supplier in some circumstances against liability from infringement by our products. In the event any third party were to make an infringement claim against us or our customers, we could be enjoined from selling selected products or could be required to indemnify our customers or supplier or pay royalties or other damages to third parties. If any of our products is found to infringe and we are unable to obtain necessary licenses or other rights on acceptable terms, we would either have to change our product so that it does not infringe or stop making the infringing product, which could have a material adverse effect on our operating results, financial condition, and cash flows.

Manufacturing

We utilize a fabless business model, working with third parties to manufacture and assemble our integrated circuits. This fabless approach allows us to focus our engineering and design resources on our strengths and to reduce our fixed costs and capital expenditures. In contrast to many fabless semiconductor companies, who utilize standard process technologies and design rules established by their foundry partners, we have developed our own proprietary process technology and collaborate with our foundry partners to install our technology on their equipment in their facilities for use solely on our behalf. This close collaboration and control over the manufacturing process has historically resulted in favorable yields and product performance for our integrated circuits.

We currently contract with two suppliers to manufacture our wafers in foundries located in China. Once our silicon wafers have been produced, they are shipped to our facility in Chengdu, China for wafer sort. Our semiconductor products are then assembled and packaged by independent subcontractors in Malaysia and China. The assembled ICs are then sent for final testing at our Chengdu facility prior to shipping to our customers.

In September 2004, we signed an agreement with a Chinese local authority to construct a facility in Chengdu, China, initially for the testing of our ICs. Pursuant to this agreement, we agreed to contribute capital in the form of cash, in-kind assets, and/or intellectual property, of at least \$5.0 million to our wholly-owned Chinese subsidiary as the registered capital for the subsidiary and have exercised the option to purchase land use rights for the facility for approximately \$0.2 million. We also have the option to acquire the facility after a five-year lease term for the original construction cost less rents paid, which is currently estimated at \$2.0 million, which option becomes exercisable in March 2011. We will likely enter into a purchase agreement for this facility at the end of the lease term. The facility has been fully operational since 2006 and we have benefitted from shorter manufacturing cycle times and lower labor and overhead costs. Furthermore, we are continuing to expand our product testing capabilities in our China facility and are able to take advantage of the rich pool of local engineering talent to expand our manufacturing support and engineering operations.

Key Personnel and Employees

Our performance is substantially dependent on the performance of our executive officers and key employees. Due to the relative complexity of the design of our analog and mixed-signal ICs, our engineers generally have more years of experience and greater circuit design aptitude than the more prevalent digital circuit design engineer. Analog engineers with advanced skills are limited in number

[Table of Contents](#)

and difficult to replace. The loss of the services of key officers, managers, engineers and other technical personnel would harm the business. Our future success will depend, in part, on our ability to attract, train, retain, and motivate highly qualified technical and managerial personnel. We may not be successful in attracting and retaining such personnel. Our employees are not represented by a collective bargaining organization, and we have never experienced a work stoppage or strike. Our management considers employee relations to be good. As of December 31, 2009, we employed 692 employees located in the United States, Taiwan, China, Japan, Korea and Europe.

Competition

The analog and mixed-signal semiconductor industry is highly competitive, and we expect competitive pressures to continue. Our ability to compete effectively and to expand our business will depend on our ability to continue to recruit both applications engineering and design engineering personnel, our ability to introduce new products, and our ability to maintain the rate at which we introduce these new products. Our industry is characterized by decreasing unit selling prices over the life of a product. We compete with domestic and international semiconductor companies, many of which have substantially greater financial and other resources with which to pursue engineering, manufacturing, marketing, and distribution of their products. We are in direct and active competition, with respect to one or more of our product lines, with at least 10 manufacturers of such products, of varying size and financial strength. The number of our competitors has grown due to expansion of the market segments in which we participate. We consider our primary competitors to include Fairchild Semiconductor International, Intersil Corporation, Linear Technology, Maxim Integrated Products, Micrel Inc., Microsemi Corporation, National Semiconductor Corporation, O2Micro International, Richtek Technology Corporation, Rohm Co., Ltd., Semtech Corporation, STMicroelectronics N.V., Texas Instruments Incorporated and Volterra.

We expect continued competition from existing competitors as well as competition from new entrants into the semiconductor market. We believe that we are competitive with respect to these factors, particularly because our ICs typically are smaller in size, are highly integrated, possess higher levels of power management functionalities and achieve high performance specifications at lower price points than most of our competition. However, we cannot assure you that our products will continue to compete favorably or that we will be successful in the face of increasing competition from new products and enhancements introduced by existing competitors or new companies entering this market.

Geographical and Segment Information

Please refer to the geographical and segment information for each of the last three fiscal years in Note 13 to our consolidated financial statements.

Please refer to the discussion of risks attendant to our foreign operations in the section entitled "Item 1A: Risk Factors".

Available Information

We were incorporated in California in 1997 and reincorporated in Delaware in November 2004. Our executive offices are located at 6409 Guadalupe Mines Road, San Jose, CA 95120. Our telephone number is (408) 826-0600. Our e-mail address is investors@monolithicpower.com, and our website is www.monolithicpower.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those filed or furnished pursuant to Sections 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, are available free of charge. These may be obtained from our website, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission, or at the SEC website at www.sec.gov. Information contained on our website is not a part of this Form 10-K.

[Table of Contents](#)

Executive Officers of the Registrant

The executive officers of the Company, and their ages as of February 1, 2010 are as follows:

Name	Age	Position
Michael R. Hsing	50	President, Chief Executive Officer, and Director
Rick Neely	55	CFO, Senior Vice President of Finance and Principal Financial and Accounting Officer
Deming Xiao	47	President of MPS Asia Operations
Maurice Sciammas	50	Senior Vice President of Worldwide Sales and Marketing
Paul Ueunten	55	Senior Vice President of Engineering

Michael R. Hsing has served on our board of directors and has served as our President and Chief Executive Officer since founding Monolithic Power Systems in August 1997. Before founding our company, Mr. Hsing held senior technical positions at companies such as Supertex, Inc. and Micrel, Inc. Mr. Hsing is an inventor on numerous patents related to the process development of bipolar mixed-signal semiconductor manufacturing. Mr. Hsing holds a B.S.E.E. from the University of Florida.

Rick Neely joined us in September 2005. He currently serves as our Senior Vice President of Finance and Chief Financial Officer. From November 2002 to September 2005, he served as Chief Financial Officer of NuCORE Technology, a fabless semiconductor company. Prior to that, he was the principal of his own consulting practice from May 2001 to November 2002. He also served as Chief Financial Officer of Alventive Inc. from May 2000 to May 2001. Prior to that he served as Chief Financial Officer and Interim Chief Executive Officer of Beyond.com, Vice President of Finance and Operations at Synopsys, and Vice President and Corporate Controller of Heartport. Mr. Neely spent 16 years, from 1980 to 1996, with Advanced Micro Devices (AMD) in a variety of senior financial management positions worldwide. Mr. Neely holds a MBA from the University of Chicago and an undergraduate degree in Economics from Whitman College.

Maurice Sciammas currently serves as our Senior Vice President of Worldwide Sales and Marketing. Mr. Sciammas joined the Company in July 1999 and served as Vice President of Products and Vice President of Sales (excluding greater China) until he was appointed to his current position. Before joining the Company, he was Director of IC Products at Supertex from 1990 to 1999. He has also held positions at Micrel, Inc. He holds a B.S.E.E. degree from San Jose State University.

Deming Xiao has served as our President of our Asia Operations since January 2008. Since joining us in May 2001, Mr. Xiao has held several executive positions, including Foundry Manager and Senior Vice President of Operations. Before joining us, from June 2000 to May 2001, Mr. Xiao was Engineering Account Manager at Chartered Semiconductor Manufacturing, Inc. Prior to that, Mr. Xiao spent 6 years as the Manager of Process Integration Engineering at Fairchild Imaging Sensors. Mr. Xiao holds a B.S. in Semiconductor Physics from Sichuan University, Chengdu, China and a M.S.E.E. from Wayne State University.

Paul Ueunten has served as our Senior Vice President of Design Engineering since October 2007. Mr. Ueunten joined us in May 1998 and held several senior level positions, including Vice President of Design Engineering. Before joining us, Mr. Ueunten held positions at National Semiconductor, Signetics Corporation and Sperry Flight Systems. Mr. Ueunten holds a MS in Electrical Engineering from the University of Santa Clara, a BS in Electrical Engineering from the University of Washington and a BS in Engineering-Physics from Pacific Lutheran University. Mr. Ueunten is credited with a number of patents and is a Member of the Institute of Electrical and Electronics Engineers.

ITEM 1A. RISK FACTORS

Our business involves risks and uncertainties. You should carefully consider the risks described below, together with all of the other information in this annual report on Form 10-K and other filings with the Securities and Exchange Commission in evaluating our business. If any of the following risks actually occur, our business, financial condition, operating results, and growth prospects would likely be adversely affected. In such an event, the trading price of our common stock could decline, and you could lose all or part of your investment in our common stock. Our past financial performance should not be considered to be a reliable indicator of future performance, and investors should not use historical trends to anticipate results or trends in future periods. These risks involve forward-looking statements and our actual results may differ substantially from those discussed in these forward-looking statements.

If we are unsuccessful in any of the legal proceedings involving us and O2Micro, we could be prevented from selling many of our products and/or be required to pay substantial damages. An unfavorable outcome or an additional award of damages, attorneys' fees or an injunction could cause our revenue to decline significantly and could severely harm our business and operating results.

We are engaged in legal proceedings with O2Micro. These proceedings involve various claims and counterclaims alleging, among other things, patent infringement. O2Micro has also in the past taken legal action against certain of our customers, which we were obligated to indemnify. Other new or existing customers may request similar indemnity from us because of continued legal actions between us and O2Micro. See the section entitled "Item 3. Legal Proceedings" of this annual report on Form 10-K for more information.

If we are not ultimately successful in any of these proceedings or other litigation that could be brought against us or our customer, or if any of the decisions in our favor are reversed on appeal, we could be ordered to pay monetary fines and/or damages. If we are found liable for willful patent infringement, damages could be doubled or tripled. We and/or our customers could also be prevented from selling some or all of our products. Moreover, our customers and end-users could decide not to use our products or our products or our customers' accounts payable to us could be seized. Finally, interim developments in these proceedings could increase the volatility in our stock price as the market assesses the impact of such developments on the likelihood that we will or will not ultimately prevail in these proceedings.

Given our inability to control the timing and nature of significant events in our legal proceedings, our legal expenses are difficult to forecast and may vary substantially from our publicly-disclosed forecasts with respect to any given quarter, which could contribute to increased volatility in our stock price and business.

Until our legal proceedings with O2Micro and Linear are resolved, we will continue to incur significant legal expenses that vary with the level of activity in each of these proceedings. This level of activity is not entirely within our control as we may need to respond to legal actions by the opposing parties or scheduling decisions by the judges. Consequently, it is difficult for us to forecast our legal expenses for any given quarter, which adversely affects our ability to forecast our expected results of operations in general. If we fail to meet the expectations of securities or industry analysts as a result of unexpected changes in our legal expenses, our stock price could be impacted.

Our ongoing legal proceedings and the potential for additional legal proceedings have diverted, and may continue to divert, financial and management resources.

The semiconductor industry is characterized by frequent claims of infringement and litigation regarding patent and other intellectual property rights, such as our litigation matters with O2Micro and

[Table of Contents](#)

Linear. Patent infringement is an ongoing risk, in part because other companies in our industry could have patent rights that may not be identifiable when we initiate development efforts. Litigation may be necessary to enforce our intellectual property rights, and we may have to defend ourselves against additional infringement claims. Such litigation is very costly. In the event any third party makes a new infringement claim against us or our customers, we could incur additional ongoing legal expenses. Our management team may also be required to devote a great deal of time, effort and energy to these legal proceedings, which could adversely affect our business.

We expect our operating results to fluctuate from quarter to quarter and year to year, which may make it difficult to predict our future performance and could cause our stock price to decline.

Our revenue, expenses, and results of operations are difficult to predict, have varied significantly in the past and will continue to fluctuate significantly in the future due to a number of factors, many of which are beyond our control. We expect fluctuations to continue for a number of reasons, including:

- ☒ a deterioration in general demand for electronic products as a result of worldwide financial crises and associated macro-economic slowdowns;
- ☒ a deterioration in business conditions at our distributors, value-added resellers and/or end-customers;
- ☒ adverse general economic conditions in the countries where our products are sold or used;
- ☒ the timing of developments and related expenses in our litigation matters with O2Micro and Linear and any future litigation;
- ☒ the possibility of additional lost business as a result of customer and prospective customer concerns about adverse outcomes in our litigations or about being litigation targets;
- ☒ continued dependence on our turns business (orders received and shipped within the same fiscal quarter);
- ☒ increases in assembly costs due to commodity price increases, such as the price of gold;
- ☒ the timing of new product introductions by us and our competitors;
- ☒ the acceptance of our new products in the marketplace;
- ☒ our ability to develop new process technologies and achieve volume production;
- ☒ the scheduling, rescheduling, or cancellation of orders by our customers;
- ☒ the cyclical nature of demand for our customers' products;
- ☒ inventory levels and product obsolescence;
- ☒ seasonality and variability in the computer, consumer electronics, and communications markets;
- ☒ the availability of adequate manufacturing capacity from our outside suppliers;
- ☒ changes in manufacturing yields; and
- ☒ movements in exchange rates, interest rates or tax rates.

Due to the factors noted above and other risks described in this section, many of which are beyond our control, you should not rely on quarter-to-quarter or year-over-year comparisons to predict our future financial performance. Unfavorable changes in any of the above factors may seriously harm our business and cause our stock price to decline.

[Table of Contents](#)

The market for government-backed student loan auction-rate securities has suffered a decline in liquidity which may impact the liquidity and potential value of our investment portfolio.

The market for government-backed student loan auction-rate securities with interest rates that reset through a Dutch auction every 7 to 35 days, became illiquid in 2008. As of December 31, 2009, the Company's investment portfolio included \$35.6 million, net of impairment charges of \$1.8 million, in government-backed student loan auction-rate securities. As of that date, \$37.4 million, the face value of our auction-rate security investments, have failed to reset through successful auctions and it is unclear as to when these investments will regain their liquidity. The underlying maturity of these auction-rate securities is up to 38 years.

Based on certain assumptions described in Note 2 to our consolidated financial statements and the Liquidity and Capital Resources section of Part II, Item 7 of this annual report on Form 10-K, we recorded temporary and other-than-temporary impairment charges on these investments. The valuation is subject to fluctuations in the future, which will depend on many factors, including the collateral quality, potential to be called or restructured, underlying final maturity, insurance guaranty, liquidity and market conditions, among others. We experienced our first failed auction in mid-February 2008. Although we accepted an offer to participate in an auction-rate securities rights offering from UBS in October 2008 to sell up to \$16.9 million in eligible auction-rate securities held by us at par to UBS commencing in June 2010, if UBS does not follow through on its commitment to purchase the auction-rate securities at par or the auctions continue to fail, the liquidity of our investment portfolio may be negatively impacted and the value of our investment portfolio could decline.

Should there be further deterioration in the market for auction-rate securities or if the accounting rules for these securities change, the value of our portfolio may decline, which may have an adverse impact on our cash position and our earnings.

We may be unsuccessful in developing and selling new products or in penetrating new markets required to maintain or expand our business.

Our competitiveness and future success depend on our ability to design, develop, manufacture, assemble, test, market, and support new products and enhancements on a timely and cost-effective basis. A fundamental shift in technologies in any of our product markets could have a material adverse effect on our competitive position within these markets. Our failure to timely develop new technologies or to react quickly to changes in existing technologies could materially delay our development of new products, which could result in product obsolescence, decreased revenue, and/or a loss of market share to competitors.

As we develop new product lines, we must adapt to market conditions that are unfamiliar to us, such as competitors and distribution channels that are different from those we have known in the past. Some of our new product lines require us to re-equip our labs to test parameters we have not tested in the past. If we are unable to adapt rapidly to these new and additional conditions, we may not be able to successfully penetrate new markets.

The success of a new product depends on accurate forecasts of long-term market demand and future technological developments, as well as on a variety of specific implementation factors, including:

- timely and efficient completion of process design and device structure improvements;
- timely and efficient implementation of manufacturing, assembly, and test processes;
- the ability to secure and effectively utilize fabrication capacity in different geometries;
- product performance;

[Table of Contents](#)

- ☒ the quality and reliability of the product; and
- ☒ effective marketing, sales and service.

To the extent that we fail to timely introduce new products or to quickly penetrate new markets, our revenue and financial condition could be materially adversely affected.

We may be unsuccessful in developing and selling new products with margins similar to or better than what we have experienced in the past, which would impact our overall gross margin and financial performance.

Our success depends on products that are differentiated in the market, which result in gross margins that have historically been above the industry averages. Should we fail to develop and introduce sufficiently differentiated products that result in higher gross margins than industry averages, our financial condition could be materially adversely affected.

If demand for our products declines in the major end markets that we serve, our revenue will decrease.

We believe that the application of our products in the computer, consumer electronics and communications markets will continue to account for the majority of our revenue. If the demand for our products declines in the major end markets that we serve, our revenue will decrease. In addition, as technology evolves, the ability to integrate the functionalities of various components, including our discrete semiconductor products, onto a single chip and/or onto other components of systems containing our products increases. Should our customers require integrated solutions that we do not offer, demand for our products could decrease, and our business and results of operations could be adversely affected.

Certain of our products go into tubes that contain mercury, which is the subject of environmental concerns.

Our CCFL products go into tubes that contain mercury, which is the subject of environmental concerns, particularly in Europe. Should environmental issues impair the widespread use of our CCFL-based products, and should we be unable to produce replacement products based on LED lighting fast enough to compensate for the loss of our CCFL-related business, our business and results of operations could be adversely affected.

We may not experience growth rates comparable to past years.

In the past, our revenues increased significantly in certain years due to increased sales of certain of our products. Due to increased competition, reduced global electronics demand, end-customer market downturn, market acceptance and penetration of our current and future products and ongoing litigation, we may not experience growth rates comparable to past periods, which could affect our stock price and results of operations.

We may not be profitable on a quarterly or annual basis.

Our profitability is dependent on many factors, including:

- ☒ our sales, which because of our turns business (i.e., orders received and shipped within the same fiscal quarter), is difficult to accurately forecast;
- ☒ consumer electronic sales, which has experienced and may continue to experience a downturn as a result of the worldwide economic crisis;

[Table of Contents](#)

- ☒ our competition, which could adversely impact our selling prices and our potential sales;
- ☒ our manufacturing costs, including our ability to negotiate with our vendors and our ability to efficiently run our test facility in China; and
- ☒ our operating expenses, including general and administrative expenses, selling and marketing expenses, stock-based compensation expenses, litigation expenses, which we expect to be significant due to the litigation in which we are involved, and research and development expenses relating to products that will not be introduced and will not generate revenue until later periods, if at all.

We may not achieve profitability on a quarterly or annual basis in the future. Unfavorable changes in any of the factors noted above may have a material adverse effect on our quarterly or annual profitability.

The future trading price of our common stock could be subject to wide fluctuations in response to a variety of factors.

The future trading price of our common stock is likely to be highly volatile and could be subject to wide fluctuations in price in response to various factors, many of which are beyond our control, including:

- ☒ our results of operations and financial performance;
- ☒ general economic, industry and global market conditions;
- ☒ the depth and liquidity of the market for our common stock;
- ☒ developments generally affecting the semiconductor industry;
- ☒ commencement of or developments relating to our involvement in litigation, including the O2Micro and Linear matters;
- ☒ investor perceptions of us and our business;
- ☒ changes in securities analysts' expectations or our failure to meet those expectations;
- ☒ actions by institutional or other large stockholders;
- ☒ terrorist acts or acts of war;
- ☒ actual or anticipated fluctuations in our results of operations;
- ☒ developments with respect to intellectual property rights;
- ☒ announcements of technological innovations or significant contracts by us or our competitors;
- ☒ introduction of new products by us or our competitors;
- ☒ our sale of common stock or other securities in the future;
- ☒ conditions and trends in technology industries;
- ☒ changes in market valuation or earnings of our competitors; and
- ☒ changes in the estimation of the future size and growth rate of our markets.

In addition, the stock market in general often experiences substantial volatility that is seemingly unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our common stock.

[Table of Contents](#)

The highly cyclical nature of the semiconductor industry, which has produced significant and sometimes prolonged downturns, could materially adversely affect our operating results, financial condition and cash flows.

Historically, the semiconductor industry has been highly cyclical and, at various times, has experienced significant downturns and wide fluctuations in supply and demand. These conditions have caused significant variances in product demand and production capacity, as well as rapid erosion of average selling prices. The industry may experience severe or prolonged downturns in the future, which could result in downward pressure on the price of our products as well as lower demand for our products. Because significant portions of our expenses are fixed in the short term or incurred in advance of anticipated sales, we may not be able to decrease our expenses in a timely manner to offset any sales shortfall. These conditions could have a material adverse effect on our operating results, financial condition and cash flows.

The complexity of calculating our tax provision may result in errors that could result in restatements of our financial statements.

Due to the complexity associated with the calculation of our tax provision, we have hired independent tax advisors to assist us in the calculation. If we or our independent tax advisors fail to resolve or fully understand certain issues, we could be subject to errors, which would result in us having to restate our financial statements. Restatements are generally costly and could adversely impact our results of operations and/or have a negative impact on the trading price of our common stock.

We face risks in connection with our internal control over financial reporting related to income taxes.

Because of the complexity of our tax structure, we have had errors in our financial statements in the calculation of our tax provision that previously resulted in restatements of our prior year financial results. Although we believe that we have implemented appropriate internal control over financial reporting related to the computation of our income tax provision, we cannot be certain that any measures we have taken or may take in the future will ensure that we implement and maintain adequate internal control over financial reporting and that we will avoid any material weakness in the future. In addition, we cannot assure you that we will not in the future identify further material weaknesses in our internal control over financial reporting related to the calculation of our income tax provision that we have not discovered to date, which may impact the reliability of our financial reporting and financial statements.

Changes in effective tax rates or adverse outcomes resulting from examination of our income tax returns could adversely affect our results

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, by changes in the valuation of our deferred tax assets and liabilities, or by changes in tax laws, regulations, accounting principles or interpretations thereof. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition.

[Table of Contents](#)

We receive a significant portion of our revenue from our distribution channel, and the loss of any one of these distributors or value-added resellers or failure to collect a receivable from them could adversely affect our operations and financial position.

We market our products through distribution arrangements and value-added resellers and through our direct sales and applications support organization to customers that include OEMs, ODMs and electronic manufacturing service providers. Receivables from our customers are generally not secured by any type of collateral and are subject to the risk of being uncollectible. For the year ended December 31, 2009, sales to our three largest distributors and/or customers accounted for approximately 34% of our total revenue. Significant deterioration in the liquidity or financial condition of any of our major customers or any group of our customers could have a material adverse impact on the collectibility of our accounts receivable and our future operating results. We primarily conduct our sales on a purchase order basis, and we do not have any long-term supply contracts.

Moreover, we believe a high percentage of our products are eventually sold to a number of OEMs. Although we communicate with OEMs in an attempt to achieve "design wins," which are decisions by OEMs and/or ODMs to incorporate our products, we do not have purchase commitments from these end users. Therefore, there can be no assurance that the OEMs and/or ODMs will continue to incorporate our ICs into their products. OEM technical specifications and requirements can change rapidly, and we may not have products that fit new specifications from an end-customer for whom we have had previous design wins. We cannot be certain that we will continue to achieve design wins from large OEMs, that our direct customers will continue to be successful in selling to the OEMs, or that the OEMs will be successful in selling products which incorporate our ICs. The loss of any significant customer, any material reduction in orders by any of our significant customers or by their OEM customers, the cancellation of a significant customer order, or the cancellation or delay of a customer's or OEM's significant program or product could reduce our revenue and adversely affect our operations and financial condition.

Failure to protect our proprietary technologies or maintain the right to certain technologies may negatively affect our ability to compete.

We rely heavily on our proprietary technologies. Our future success and competitive position depend in part upon our ability to obtain and maintain protection of certain proprietary technologies used in our products. We pursue patents for some of our new products and unique technologies, and we also rely on a combination of nondisclosure agreements and other contractual provisions, as well as our employees' commitment to confidentiality and loyalty, to protect our technology, know-how, and processes. Despite the precautions we take, it may be possible for unauthorized third parties to copy aspects of our current or future technology or products or to obtain and use information that we regard as proprietary. We intend to continue to protect our proprietary technology, including through patents. However, there can be no assurance that the steps we take will be adequate to protect our proprietary rights, that our patent applications will lead to issued patents, that others will not develop or patent similar or superior products or technologies, or that our patents will not be challenged, invalidated, or circumvented by others. Furthermore, the laws of the countries in which our products are or may be developed, manufactured, or sold may not protect our products and intellectual property rights to the same extent as laws in the United States. Our failure to adequately protect our proprietary technologies could harm our business.

Our products must meet exacting specifications, and undetected defects and failures may occur, which may cause customers to return or stop buying our products and may expose us to product liability risk.

Our customers generally establish demanding specifications for quality, performance, and reliability that our products must meet. Integrated circuits as complex as ours often encounter

[Table of Contents](#)

development delays and may contain undetected defects or failures when first introduced or after commencement of commercial shipments, which might require product replacement or recall. Further, our third-party manufacturing processes or changes thereof, or raw material used in the manufacturing processes may cause our products to fail. We have from time to time in the past experienced product quality, performance or reliability problems. Our standard warranty period is one year, which exposes the company to significant risks of claims for defects and failures. If defects and failures occur in our products, we could experience lost revenue, increased costs, including warranty expense and costs associated with customer support, delays in, cancellations or rescheduling of orders or shipments, and product returns or discounts, any of which would harm our operating results.

In addition, product liability claims may be asserted with respect to our technology or products. Although we currently have insurance, there can be no assurance that we have obtained a sufficient amount of insurance coverage, that asserted claims will be within the scope of coverage of the insurance, or that we will have sufficient resources to satisfy any asserted claims.

We currently depend on two third-party suppliers to provide us with wafers for our products. If any of our wafer suppliers become insolvent and are unable and/or fail to provide us sufficient wafers at acceptable yields and at anticipated costs, our revenue and gross margin may decline or we may not be able to fulfill our customer orders.

We have a supply arrangement with two suppliers for the production of wafers. Should any of our suppliers become insolvent, we may not be able to fulfill our customer orders, which would likely cause a decline in our revenue. In the recent past, as a result of the global economic crisis, many wafer foundries in the semiconductor industry were operating well below normal capacity, including the two suppliers to MPS, potentially impairing our suppliers' ability to meet their financial obligations.

While certain aspects of our relationship with these suppliers are contractual, many important aspects of this relationship depend on our suppliers' continued cooperation and our management relationships. In addition, the fabrication of ICs is a highly complex and precise process. Problems in the fabrication process can cause a substantial percentage of wafers to be rejected or numerous ICs on each wafer to be non-functional. This could potentially reduce yields. The failure of our suppliers to supply us wafers at acceptable yields could prevent us from fulfilling our customer orders for our products and would likely cause a decline in our revenue.

Although we provide our suppliers with rolling forecasts of our production requirements, their ability to provide wafers to us is limited by the available capacity, particularly capacity in the geometries we require, at the facilities in which they manufacture wafers for us. An increased need for capacity to meet internal demands or demands of other customers could cause our suppliers to reduce capacity available to us. Our suppliers may also require us to pay amounts in excess of contracted or anticipated amounts for wafer deliveries or require us to make other concessions in order to acquire the wafer supply necessary to meet our customer requirements. If our suppliers extend lead times, limit supplies or the types of capacity we require, or increase prices due to capacity constraints or other factors, our revenue and gross margin may decline.

Further, as is common in the semiconductor industry, our customers may reschedule or cancel orders on relatively short notice. Under our agreement with our suppliers, we have an option to order wafers based on a committed forecast that can cover a period of one to six months. If our customers cancel orders after we submit a committed forecast to our suppliers for the corresponding wafers, we may be required to purchase wafers that we may not be able to resell, which would adversely affect our operating results, financial condition, and cash flows.

We might not be able to deliver our products on a timely basis if our relationships with our assembly and test subcontractors are disrupted or terminated.

All of our products are assembled by third-party subcontractors and a portion of our testing is currently performed by third-party subcontractors. We do not have any long-term agreements with these subcontractors. As a result, we may not have direct control over product delivery schedules or product quality. Also, due to the amount of time typically required to qualify assembly and test subcontractors, we could experience delays in the shipment of our products if we were forced to find alternate third parties to assemble or test our products. In addition, the current global economic crisis may materially impact our assembly supplier's ability to operate. Any future product delivery delays or disruptions in our relationships with our subcontractors could have a material adverse effect on our operating results, financial condition, and cash flows.

We derive most of our revenue from direct or indirect sales to customers in Asia and have significant operations in Asia, which may expose us to political, cultural, regulatory, economic, foreign exchange, and operational risks.

We derive most of our revenue from customers located in Asia through direct or indirect sales through distribution arrangements with parties located in Asia. As a result, we are subject to increased risks due to this geographic concentration of business and operations. For the year ended December 31, 2009, approximately 84% of our revenue was from customers in Asia. There are risks inherent in doing business in Asia, and internationally in general, including:

- ☒ changes in, or impositions of, legislative or regulatory requirements, including tax laws in the United States and in the countries in which we manufacture or sell our products;
- ☒ trade restrictions, including restrictions imposed by the United States government on trading with parties in foreign countries;
- ☒ currency exchange rate fluctuations impacting intra-company transactions;
- ☒ transportation delays;
- ☒ changes in tax regulations in China that may impact our tax status in Chengdu;
- ☒ multi-tiered distribution channels that lack visibility to end customer pricing and purchase patterns;
- ☒ international political relationships and threats of war;
- ☒ terrorism and threats of terrorism;
- ☒ epidemics and illnesses;
- ☒ work stoppages and infrastructure problems due to adverse weather conditions or natural disasters;
- ☒ economic and political instability;
- ☒ changes in import/export regulations, tariffs, and freight rates;
- ☒ longer accounts receivable collection cycles and difficulties in collecting accounts receivables;
- ☒ enforcing contracts generally; and
- ☒ less effective protection of intellectual property and contractual arrangements.

[Table of Contents](#)

The price and availability of commodities (e.g., gold, platinum, copper and silicon) may adversely impact our ability to deliver our products in a timely and cost-effective manner and may affect our business and results of operations.

Our products incorporate commodities such as gold, platinum, copper and silicon. The price and availability of these commodities and other like commodities that we use could negatively impact our business and results of operations.

Devaluation of the U.S. Dollar relative to other foreign currencies, including the Chinese Yuan, may adversely affect results of operations.

Our manufacturing and packaging suppliers are and will continue to be primarily located in China for the foreseeable future. Should the value of the Chinese Yuan continue to rise against the U.S. Dollar, there could be an increase in our manufacturing costs relative to competitors who have manufacturing facilities located in the U.S., which could adversely affect our operations. In addition, because we collect payments from all customers in U.S. dollars, fluctuations in the value of foreign currencies could have an adverse impact on our customers' business, which could negatively impact our business and results of operations.

We and our manufacturing partners are or will be subject to extensive Chinese government regulation, and the benefit of various incentives from Chinese governments that we and our manufacturing partners receive may be reduced or eliminated, which could increase our costs or limit our ability to sell products and conduct activities in China.

Most of our manufacturing partners are located in China. In addition, we have established a facility in China, initially for the testing of our ICs. The Chinese government has broad discretion and authority to regulate the technology industry in China. China's government has implemented policies from time to time to regulate economic expansion in China. It also exercises significant control over China's economic growth through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies. New regulations or the readjustment of previously implemented regulations could require us and our manufacturing partners to change our business plans, increase our costs, or limit our ability to sell products and conduct activities in China, which could adversely affect our business and operating results.

In addition, the Chinese government and provincial and local governments have provided, and continue to provide, various incentives to encourage the development of the semiconductor industry in China. Such incentives include tax rebates, reduced tax rates, favorable lending policies, and other measures, some or all of which may be available to our manufacturing partners and to us with respect to our facility in China. Any of these incentives could be reduced or eliminated by governmental authorities at any time. Any such reduction or elimination of incentives currently provided to our manufacturing partners could adversely affect our business and operating results.

There are inherent risks associated with the operation of our testing facility in China, which could increase product costs or cause a delay in product shipments.

We have a testing facility in China that began operations in 2006. In addition to the risks discussed elsewhere in this annual report, we face the following risks, among others:

- inability to maintain appropriate and acceptable manufacturing controls; and
- higher than anticipated overhead and other costs of operation.

If we are unable to continue a fully operational status with appropriate controls, we may incur higher costs than our current expense levels, which would affect our gross margins. In addition, if capacity restraints result in significant delays in product shipments, our business and results of operations would be adversely affected.

Due to the nature of our business as a component supplier, we may have difficulty both in accurately predicting our future revenue and appropriately budgeting our expenses.

Because we provide components for end products and systems, demand for our products is influenced by our customers' end product demand. As a result, we may have difficulty in accurately forecasting our revenue and expenses. Our revenue depends on the timing, size, and speed of commercial introductions of end products and systems that incorporate our products, all of which are inherently difficult to forecast, as well as the ongoing demand for previously introduced end products and systems. In addition, demand for our products is influenced by our customers' ability to manage their inventory. Our sales to distributors are subject to higher volatility because they service demand from multiple levels of the supply chain which, in itself, is inherently difficult to forecast. If our customers, including distributors, do not manage their inventory correctly or misjudge their customers' demand, our shipments to and orders from our customers may vary significantly on a quarterly basis.

The average selling prices of products in our markets have historically decreased over time and will likely do so in the future, which could harm our revenues and gross profits.

Average selling prices of semiconductor products in the markets we serve have historically decreased over time. Our gross profits and financial results will suffer if we are unable to offset any reductions in our average selling prices by reducing our costs, developing new or enhanced products on a timely basis with higher selling prices or gross profits, or increasing our sales volumes. Additionally, because we do not operate our own manufacturing or assembly facilities, we may not be able to reduce our costs as rapidly as companies that operate their own facilities, and our costs may even increase, which could also reduce our margins.

We purchase inventory in advance based on expected demand for our products, and if demand is not as expected, we may have insufficient or excess inventory, which could adversely impact our financial position.

As a fabless semiconductor company, we purchase our inventory from a third party manufacturer in advance of selling our product. We place orders with our manufacturer based on existing and expected orders from our customers for particular products. While our contracts with our customers and distributors include lead time requirements and cancellation penalties that are designed to protect us from misalignment between customer orders and inventory levels, we must nonetheless make some predictions when we place orders with our manufacturer. In the event that our predictions are inaccurate due to unexpected increases in orders or unavailability of product within the time frame that is required, we may have insufficient inventory to meet our customer demands. In the event that we order products that we are unable to sell due to a decrease in orders, unexpected order cancellations, injunctions due to patent litigations, or product returns, we may have excess inventory which, if not sold, may need to be disposed of. If any of these situations were to arise, it could have a material impact on our business and financial position.

Because of the lengthy sales cycles for our products and the fixed nature of a significant portion of our expenses, we may incur substantial expenses before we earn associated revenue and may not ultimately achieve our forecasted sales for our products.

The introduction of new products presents significant business challenges because product development plans and expenditures must be made up to two years or more in advance of any sales. It takes us up to 12 months or more to design and manufacture a new product prototype. Only after we have a prototype do we introduce the product to the market and begin selling efforts in an attempt to achieve design wins. This sales process, which averages six to twelve months, requires us to expend significant sales and marketing resources without any assurance of success. Volume production of

[Table of Contents](#)

products that use our ICs, if any, may not be achieved for an additional three to six months after an initial sale. Sales cycles for our products are lengthy for a number of reasons:

- ☒ our customers usually complete an in-depth technical evaluation of our products before they place a purchase order;
- ☒ the commercial adoption of our products by OEMs and ODMs is typically limited during the initial release of their product to evaluate product performance and consumer demand;
- ☒ our products must be designed into a customer's product or system; and
- ☒ the development and commercial introduction of our customers' products incorporating new technologies frequently are delayed.

As a result of our lengthy sales cycles, we may incur substantial expenses before we earn associated revenue because a significant portion of our operating expenses is relatively fixed and based on expected revenue. The lengthy sales cycles of our products also make forecasting the volume and timing of orders difficult. In addition, the delays inherent in lengthy sales cycles raise additional risks that customers may cancel or change their orders. Our sales are made by purchase orders. Because industry practice allows customers to reschedule or cancel orders on relatively short notice, backlog is not always a good indicator of our future sales. If customer cancellations or product changes occur, we could lose anticipated sales and not have sufficient time to reduce our inventory and operating expenses.

The loss of any of our key personnel or the failure to attract or retain specialized technical and management personnel could impair our ability to grow our business.

Our future success depends upon our ability to attract and retain highly qualified technical and managerial personnel. We are particularly dependent on the continued services of our key executives, including Michael Hsing, our President and Chief Executive Officer, who founded our company and developed our proprietary process technology. In addition, personnel with highly skilled analog and mixed-signal design engineering expertise are scarce and competition for personnel with these skills is intense. There can be no assurance that we will be able to retain existing key employees or that we will be successful in attracting, integrating or retaining other highly qualified personnel with critical capabilities in the future. If we are unable to retain the services of existing key employees or are unsuccessful in attracting new highly qualified employees quickly enough to meet the demands of our business, including design cycles, our business could be harmed.

If we fail to retain key employees in sales, applications, finance and legal or to make continued improvements to our internal systems, particularly in the accounting and finance area, our business may suffer.

Since 2006, we significantly increased the quantity and quality of our sales, applications, financial and legal staff. However, if we fail to continue to adequately staff these areas, maintain or upgrade our business systems and maintain internal controls that meet the demands of our business, our ability to operate effectively will suffer. The operation of our business also depends upon our ability to retain these employees, as these employees hold a significant amount of institutional knowledge about us and our products, and, if they were to terminate their employment, our sales and internal control over financial reporting could be adversely affected.

We intend to continue to expand our operations, which may strain our resources and increase our operating expenses.

We plan to continue to expand our domestic and foreign operations through internal growth, strategic relationships, and/or acquisitions. We expect that any such expansion will strain our systems

[Table of Contents](#)

and operational and financial controls. In addition, we are likely to incur significantly higher operating costs. To manage our growth effectively, we must continue to improve and expand our systems and controls, as well as hire experienced administrative and financial personnel. If we fail to do so, our growth will be limited. If we fail to effectively manage our planned expansion of operations, our business and operating results may be harmed.

We may engage in future acquisitions that dilute the ownership interests of our stockholders and cause us to incur debt or to assume contingent liabilities, and we may be unable to successfully integrate these companies into our operations, which would adversely affect our business.

As a part of our business strategy, from time to time we review acquisition prospects that would complement our current product offerings, enhance our design capability or offer other competitive opportunities. In the event of future acquisitions, we could use a significant portion of our available cash, cash equivalents and short-term investments, issue equity securities which would dilute current stockholders' percentage ownership, and/or incur substantial debt or contingent liabilities. Such actions by us could impact our operating results and/or the price of our common stock. In addition, if we are unsuccessful in integrating any acquired company into our operations or if integration is more difficult than anticipated, we may experience disruptions that could harm our business.

We compete against many companies with substantially greater financing and other resources, and our market share may be reduced if we are unable to respond to our competitors effectively.

The analog and mixed-signal semiconductor industry is highly competitive, and we expect competitive pressures to continue. Our ability to compete effectively and to expand our business will depend on our ability to continue to recruit applications and design talent, our ability to introduce new products, and our ability to maintain the rate at which we introduce these new products. We compete with domestic and non-domestic semiconductor companies, many of which have substantially greater financial and other resources with which to pursue engineering, manufacturing, marketing, and distribution of their products. We are in direct and active competition, with respect to one or more of our product lines, with at least 10 manufacturers of such products, of varying size and financial strength. The number of our competitors has grown due to the expansion of the market segments in which we participate. We consider our competitors to include, but not be limited to: Fairchild Semiconductor, Intersil, Linear, Maxim Integrated Products, Micrel, Microsemi, National Semiconductor, O2Micro, RichTek, Rohm, Semtech, STMicroelectronics, Texas Instruments and Volterra. We expect continued competition from existing competitors as well as competition from new entrants in the semiconductor market.

We cannot assure you that our products will continue to compete favorably or that we will be successful in the face of increasing competition from new products and enhancements introduced by existing competitors or new companies entering this market, which would materially and adversely affect our results of operations and our financial condition.

If securities or industry analysts downgrade our stock or do not continue to publish research or reports about our business, our stock price and trading volume could decline.

The trading market for our common stock will depend on the research and reports that industry or securities analysts publish about us or our business. We do not have any control over these analysts. If one or more of the analysts who cover us downgrade our stock, our stock price would likely decline. If one or more of these analysts cease coverage of us or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

[Table of Contents](#)

Because of their significant stock ownership, our officers and directors will be able to exert significant influence over our future direction.

Executive officers, directors, and affiliated entities beneficially owned in aggregate, approximately 14% of our outstanding common stock as of December 31, 2009. These stockholders, if acting together, would be able to significantly influence all matters requiring approval by our stockholders, including the election of directors and the approval of mergers or other business combination transactions.

Major earthquakes or other natural disasters and resulting systems outages may cause us significant losses.

Our corporate headquarters, the production facilities of our third-party wafer supplier, our IC testing facility, a portion of our assembly and research and development activities, and certain other critical business operations are located in or near seismically active regions and are subject to periodic earthquakes. We do not maintain earthquake insurance and could be materially and adversely affected in the event of a major earthquake. Much of our revenue, as well as our manufacturers and assemblers, are concentrated in Asia. Such concentration increases the risk that other natural disasters, labor strikes, terrorism, war, political unrest, epidemics, and/or health advisories could disrupt our operations. In addition, we rely heavily on our internal information and communications systems and on systems or support services from third parties to manage our operations efficiently and effectively. Any of these are subject to failure due to a natural disaster or other disruption. System-wide or local failures that affect our information processing could have material adverse effects on our business, financial condition, operating results, and cash flows.

Our facilities in Chengdu, China are located in a seismically active area, as evidenced by the May 2008 earthquake that was centered in the Sichuan Province of China. Although there was no damage to our facilities as a result of that earthquake, should there be additional earthquakes in the area, we may incur losses and our business, financial condition and/or operating results may suffer.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our primary operating locations are currently in San Jose, California and Chengdu, Sichuan, China. We currently lease approximately 55,110 square feet in San Jose which serves as our corporate headquarters, sales and research and development center. Certain test procedures and manufacturing also take place in our San Jose facility. We lease approximately 56,000 square feet in Chengdu which serves as our test facility and manufacturing hub and we are currently in the process of constructing a 140,000 square foot research and development facility in Chengdu, which will be operational in mid-2010. We also lease sales offices in Japan, China, Taiwan and Korea. We believe that our existing facilities are adequate for our current operations.

ITEM 3. LEGAL PROCEEDINGS

Chip Advanced Technology Inc.

On December 12, 2007, we filed a patent infringement lawsuit in the U.S. District Court for the Central District of California against Chip Advanced Technology Inc. ("CAT"), asserting that CAT willfully infringed a MPS patent that enables efficient low voltage, low current power conversions, such as DC-DC step down converters. CAT was subsequently acquired by ITE Technology ("ITE"), which

[Table of Contents](#)

became a successor in interest to CAT. On July 28, 2009, we entered into a license agreement and a settlement agreement with ITE in which the parties agreed to mutually release and dismiss the complaints.

O2Micro, Inc.

We have been engaged in a number of legal proceedings involving patent infringement claims with O2Micro, Inc. and its parent corporation, O2Micro. Currently, there are two proceedings pending, both involving O2 Micro's U.S. Patent No. 7,417,382 ('382 patent). One proceeding is pending in the International Trade Commission. The other is pending in the United States District Court for the Northern District of California. O2 Micro alleges that certain of our CCFL backlight inverter products infringe its patents. We allege that we do not infringe and the patent is invalid. The ITC Investigation was held on October 19, 2009. Trial in the Northern District of California case is scheduled for August 2, 2010. We are not able to reasonably estimate the probability of loss or the range of possible loss in this case.

Taiwan Sumida Electronics

During the quarter ended September 30, 2009, we completed the litigation process with respect to a lawsuit related to Taiwan Sumida Electronics ("TSE"), a customer. In connection with the completion of this lawsuit, we also jointly terminated an escrow agreement with TSE and retrieved the deposit of \$7.4 million. The escrow termination resulted in recording a reversal of a litigation provision of approximately \$7.4 million during the quarter ended September 30, 2009. This provision was recorded as a litigation provision in the second quarter of 2007 and the reversal of this provision in the quarter ended September 30, 2009 is reflected in the Patent Litigation Provision Reversal, net item in the Consolidated Statement of Operations.

Linear Technology Corporation

On July 1, 2008, the United States District Court for the District of Delaware held as a matter of law that we did not breach our October 1, 2005 Settlement and License Agreement with Linear Technology Corporation ("Linear"). Based upon that ruling, we anticipate filing a motion to seek recovery of its attorney fees when the final judgment is entered. The court has not issued its final judgment concerning the patent validity and enforceability issues.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDERS MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES.

Market Price of Our Common Stock

Our common stock is traded on the Nasdaq Global Select Market under the symbol "MPWR". The following table sets forth, for the periods indicated, the high and low sales price per share of our common stock on the Nasdaq Global Select Market. These prices represent quotations among dealers without adjustments for retail mark-ups, markdowns or commissions, and may not represent prices of actual transactions.

	High	Low
2009		
Fourth Quarter ended December 31, 2009	\$24.75	\$18.93
Third Quarter ended September 30, 2009	\$25.26	\$20.80
Second Quarter ended June 30, 2009	\$23.40	\$14.92
First Quarter ended March 31, 2009	\$16.90	\$10.67
2008		
Fourth Quarter ended December 31, 2008	\$17.37	\$ 6.96
Third Quarter ended September 30, 2008	\$29.07	\$15.98
Second Quarter ended June 30, 2008	\$27.50	\$17.88
First Quarter ended March 31, 2008	\$22.36	\$14.64

Holders of Our Common Stock

As of January 27, 2010, we had approximately 22 stockholders of record and the closing price of common stock was \$21.66 per share as reported by The Nasdaq Global Select Market. Many of our shares of common stock are held by brokers and other institutions on behalf of stockholders. Based on several factors, including our proxy mailing from 2009, we estimate the total number of stockholders represented by these record holders to be at least 1,852.

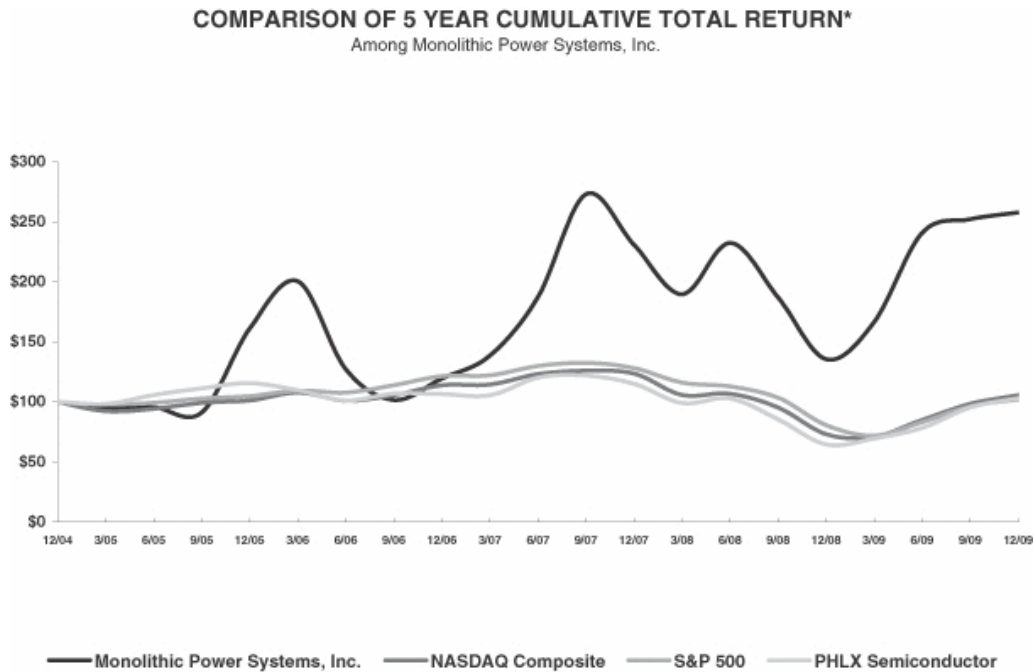

Dividend Policy

We have not paid cash dividends on our common stock since our inception. We currently expect to retain earnings for use in the operation and expansion of our business, and therefore do not anticipate paying any cash dividends for the next several years.

[Table of Contents](#)

Performance of Our Common Stock

The following graph compares the cumulative 60-month total return provided shareholders on our common stock relative to the cumulative total returns of the Nasdaq Composite Index, the S & P 500 Index and the Philadelphia Semiconductor Index. An investment of \$100 (with reinvestment of all dividends) is assumed to have been made in our common stock on 11/19/2004 and its relative performance is tracked through 12/31/2009.

*\$100 invested on 12/31/04 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

The information contained in the Stock Performance Graph section shall not be deemed to be “soliciting material” or “filed” or incorporated by reference in future filings with the SEC, or subject to the liabilities of Section 18 of the Exchange Act, except to the extent that the Company specifically incorporates it by reference into a document filed under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended.

Recent Sales of Unregistered Securities

There were no sales of unregistered securities during the year ended December 31, 2009.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

There were no purchases of the issuer’s equity securities by the issuer and affiliated purchasers during the year ended December 31, 2009.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the consolidated financial statements and related notes which appear elsewhere in this report on Form 10-K.

Overview

We are a fabless semiconductor company that designs, develops, and markets proprietary, advanced analog and mixed-signal semiconductors. We currently offer products that serve multiple markets, including flat panel televisions, wireless communications, telecommunications equipment, general consumer products, notebook computers, cellular handsets, and set top boxes, among others. We believe that we differentiate ourselves by offering solutions that are more highly integrated, smaller in size, more energy efficient, more accurate with respect to performance specifications and, consequently, more cost-effective than many competing solutions. We plan to continue to introduce additional new products within our existing product families, as well as in new product categories.

We operate in the cyclical semiconductor industry where there is seasonal demand for certain of our products. We are not and will not be immune from current and future industry downturns, but we have targeted product and market areas that we believe have the ability to offer above average industry performance over the long term.

We work with third parties to manufacture and assemble our integrated circuits ("ICs"). This has enabled us to limit our capital expenditures and fixed costs, while focusing our engineering and design resources on our core strengths.

Following the introduction of a product, our sales cycle generally takes six to twelve months to achieve revenue. Volume production is usually achieved in three to six months after we receive an initial customer order for a new product. Typical lead times for orders are fewer than 90 days. These factors, combined with the fact that orders in the semiconductor industry can typically be cancelled or rescheduled without significant penalty to the customer, make the forecasting of our orders and revenue difficult.

We derive most of our revenue from sales through distribution arrangements or direct sales to customers in Asia, where the components we produce are incorporated into an end-user product. 84% of our revenue for the year ended December 31, 2009 and 89% of our revenue for the year ended December 31, 2008 was attributable to direct or indirect sales to customers in Asia. We derive a majority of our revenue from the sales of our DC to DC converter product family which services the

[Table of Contents](#)

consumer electronics, communications and computing markets. We believe our ability to achieve revenue growth will depend, in part, on our ability to develop new products, enter new market segments, gain market share, manage litigation risk, diversify our customer base and successfully secure manufacturing capacity.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the U.S. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis, including those related to revenue recognition, stock-based compensation, long-term investments, short-term investments, inventories, income taxes, warranty obligations and contingencies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making the judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Estimates and judgments used in the preparation of our financial statements are, by their nature, uncertain and unpredictable, and depend upon, among other things, many factors outside of our control, such as demand for our products and economic conditions. Accordingly, our estimates and judgments may prove to be incorrect and actual results may differ, perhaps significantly, from these estimates.

We believe the following critical accounting policies reflect our more significant judgments used in the preparation of our consolidated financial statements.

Revenue Recognition. We recognize revenue in accordance with Financial Accounting Standards Board ("FASB")—Accounting Standards Codification ("ASC") 605-10-S25 *Revenue Recognition—Overall—Recognition*. ASC 605-10-S25 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services have been rendered; (3) the fee is fixed and determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) are based on management's judgment regarding the fixed nature of the fee charged for products delivered and the collectibility of those fees. The application of these criteria has resulted in our generally recognizing revenue upon shipment (when title passes) to customers. Should changes in conditions cause management to determine these criteria are not met for certain future transactions, revenue recognized for any reporting period could be adversely impacted.

Approximately 80% of our distributor sales are made through distribution arrangements with third parties. These arrangements do not include any special payment terms (our normal payment terms are 30-45 days), price protection or exchange rights. Returns are limited to our standard product warranty. Certain of our large distributors have contracts that include limited stock rotation rights that permit the return of a small percentage of the previous six months' purchases in return for a compensating new order of equal or greater dollar value.

We maintain a sales reserve for stock rotation rights, which is based on historical experience of actual stock rotation returns on a per distributor basis, where available, and information related to products in the distribution channel. This reserve is recorded at the time of sale. In the future, if we are unable to estimate our stock rotation returns accurately, we may not be able to recognize revenue from sales to our distributors based on when we sell inventory to our distributors. Instead, we may have to recognize revenue when the distributor sells through such inventory to an end-customer.

[Table of Contents](#)

We generally recognize revenue upon shipment of products to the distributor for the following reasons (based on ASC 605-15-25-1 *Revenue Recognition—Products—Recognition—Sales of Products When Right of Return Exists*):

- (1) Our price is fixed and determinable at the date of sale. We do not offer special payment terms, price protection or price adjustments to distributors where we recognize revenue upon shipment
- (2) Our distributors are obligated to pay us and this obligation is not contingent on the resale of our products
- (3) The distributor's obligation is unchanged in the event of theft or physical destruction or damage to the products
- (4) Our distributors have stand-alone economic substance apart from our relationship
- (5) We do not have any obligations for future performance to directly bring about the resale of our products by the distributor
- (6) The amount of future returns can be reasonably estimated. We have the ability and the information necessary to track inventory sold to and held at our distributors. We maintain a history of returns and have the ability to estimate the stock rotation returns on a quarterly basis.

If we enter into arrangements that have rights of return that are not estimable, we recognize revenue under such arrangements only after the distributor has sold our products to an end customer.

Approximately 20% of our distributor sales are made through small distributors based on purchase orders rather than formal distribution arrangements. These distributors do not receive any stock rotation rights. We do not have a history of accepting returns from these distributors.

The terms in a majority of our distribution agreements include the non-exclusive right to sell, and the agreement to use best efforts to promote and develop a market for, our products in certain regions of the world and the ability to terminate the distribution agreement by either party with up to three months notice. We provide a one year warranty against defects in materials and workmanship. Under this warranty, we will repair the goods, provide replacements at no charge, or, under certain circumstances, provide a refund to the customer for defective products. Estimated warranty returns and warranty costs are based on historical experience and are recorded at the time product revenue is recognized.

In 2006, we signed a distribution agreement with a U.S. distributor. Revenue from this distributor is recognized upon sale by the distributor to the end customer because the distributor has certain rights of return which management believes are not estimable. The deferred revenue balance from this distributor as of December 31, 2009 and 2008 was \$0.9 million and \$0.5 million, respectively.

Inventory Valuation. We value our inventory at the lower of the standard cost (which approximates actual cost on a first-in, first-out basis) or its current estimated market value. We write down inventory for obsolescence or lack of demand, based on assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required. On the contrary, if market conditions are more favorable, we may be able to sell inventory that was previously reserved.

Accounting for Income Taxes. ASC 740-10 *Income Taxes—Overall* prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on

[Table of Contents](#)

derecognition, classification, interest and penalties, accounting in interim periods and disclosure. In accordance with ASC 740-10, we recognize federal, state and foreign current tax liabilities or assets based on our estimate of taxes payable or refundable in the current fiscal year by tax jurisdiction. We also recognize federal, state and foreign deferred tax assets or liabilities for our estimate of future tax effects attributable to temporary differences and carryforwards. We record a valuation allowance to reduce any deferred tax assets by the amount of any tax benefits that, based on available evidence and judgment, are not expected to be realized.

Our calculation of current and deferred tax assets and liabilities is based on certain estimates and judgments and involves dealing with uncertainties in the application of complex tax laws. Our estimates of current and deferred tax assets and liabilities may change based, in part, on added certainty or finality or uncertainty to an anticipated outcome, changes in accounting or tax laws in the U.S., or foreign jurisdictions where we operate, or changes in other facts or circumstances. In addition, we recognize liabilities for potential U.S. and foreign income tax for uncertain income tax positions taken on our tax returns if it has less than a 50% likelihood of being sustained. If we determine that payment of these amounts is unnecessary or if the recorded tax liability is less than our current assessment, we may be required to recognize an income tax benefit or additional income tax expense in our financial statements in the period such determination is made. We have calculated our uncertain tax positions which were attributable to certain estimates and judgments primarily related to transfer pricing, cost sharing and our international tax structure exposure.

As of December 31, 2009, 2008 and 2007, we had a valuation allowance of \$14.6 million, \$14.4 million and \$11.9 million, respectively, attributable to management's determination that none of the deferred tax assets will be realized, except for certain deferred tax assets related to uncertain income tax positions. Should it be determined that all or part of the net deferred tax asset will not be realized in the future, an adjustment to increase the deferred tax asset valuation allowance will be charged to income in the period such determination is made. Likewise, in the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of our net recorded amount, an adjustment to the valuation allowance for the deferred tax asset would increase income in the period such determination was made.

Contingencies. We are engaged in legal proceedings resulting from several patent infringement actions against us. In addition, from time to time, we become aware that we are subject to other contingent liabilities. When this occurs, we will evaluate the appropriate accounting for the potential contingent liabilities using ASC 450-20-25-2 *Contingencies—Loss Contingencies—Recognition* to determine whether a contingent liability should be recorded. In making this determination, management may, depending on the nature of the matter, consult with internal and external legal counsel and technical experts. Based on the facts and circumstances in each matter, we use our judgment to determine whether it is probable that a contingent loss has occurred and whether the amount of such loss can be estimated. If we determine a loss is probable and estimable, we record a contingent loss in accordance with ASC 450-20-25-2. In determining the amount of a contingent loss, we take into account advice received from experts for each specific matter regarding the status of legal proceedings, settlement negotiations (which may be ongoing), prior case history and other factors. Should the judgments and estimates made by management need to be adjusted as additional information becomes available, we may need to record additional contingent losses that could materially and adversely impact our results of operations. Alternatively, if the judgments and estimates made by management are adjusted, for example, if a particular contingent loss does not occur, the contingent loss recorded would be reversed which could result in a favorable impact on our results of operations.

Accounting for Stock-Based Compensation. We have adopted the provisions of ASC 718-10-30 *Compensation—Stock Compensation—Overall—Initial Measurement*, under the modified

[Table of Contents](#)

prospective method. ASC 718-10-30 eliminates the alternative of applying the intrinsic value measurement to stock compensation awards issued to employees. Rather, the standard requires us to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period). We currently use the Black-Scholes option-pricing model to estimate the fair value of our share-based payments. The Black-Scholes option-pricing model is based on a number of assumptions, including historical volatility, expected life, risk-free interest rate and expected dividends. If these assumptions change, stock-based compensation may differ significantly from what we have recorded in the past. The amount of stock-based compensation that we recognize is also based on an expected forfeiture rate. If there is a difference between the forfeiture assumptions used in determining stock-based compensation costs and the actual forfeitures which become known over time, we may change the forfeiture rate, which could have a significant impact on our stock-based compensation expense.

Warranty Reserves. We currently provide a 12-month warranty against defects in materials and workmanship and will either repair the goods or provide replacement products at no charge to the customer for defective products. We record estimated warranty costs by product, which are based on historical experience over the preceding 12 months, at the time we recognize product revenue. Reserve requirements are recorded in the period of sale and are based on an assessment of the products sold with warranty and historical warranty costs incurred. As the complexity of our products increases, we could experience higher warranty claims relative to sales than we have previously experienced, and we may need to increase these estimated warranty reserves.

Fair Value of Financial Instruments. We adopted the provisions of ASC 820-10 *Fair Value Measurements and Disclosures—Overall*, effective January 1, 2008. This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles in the United States of America, and requires that assets and liabilities carried at fair value be classified and disclosed in one of the three categories, as follows:

- ☒ Level 1: Quoted prices in active markets for identical assets;
- ☒ Level 2: Significant other observable inputs; and
- ☒ Level 3: Significant unobservable inputs.

We also adopted the provisions of ASC 820-10-35-51 *Fair Value Measurement and Disclosure—Overall—Subsequent Measurement—Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, effective April 1, 2009. This FSP provides additional guidance for estimating fair value in accordance with ASC 820-10 *Fair Value Measurements and Disclosures—Overall*, when the volume and level of activity for the asset or liability have significantly decreased.

Our financial instruments include cash and cash equivalents and short-term and long-term investments. Cash equivalents are stated at cost, which approximates fair market value based on quoted market prices. Short-term and long-term investments are stated at their fair market value.

The face value of our holdings in auction rate securities is \$37.4 million, of which \$20.5 million is currently classified as long-term available-for-sale investments and \$16.9 million is classified as short-term trading investments. The securities that are classified as short-term trading securities have been classified as such because the Company intends to exercise its put option to sell these securities to UBS in June of 2010. These investments are accounted for in accordance with ASC 320-10, *Investments—Debt and Equity Securities—Overall*. Investments in available-for-sale securities are recorded at fair value, and unrealized gains or losses (that are deemed to be temporary) are

[Table of Contents](#)

recognized through shareholders' equity, as a component of accumulated other comprehensive income in our consolidated balance sheet. We record an impairment charge to earnings when an available-for-sale investment has experienced a decline in value that is deemed to be other-than-temporary. Investments in trading securities are recorded at fair value and unrealized gains and losses are recognized in other income (expense) in our consolidated statement of operations.

We adopted the provisions of ASC 320-10-35 *Investments—Debt and Equity Securities—Overall—Subsequent Measurement* and ASC 320-10-50 *Investments—Debt and Equity Securities—Overall—Disclosure*, effective April 1, 2009 and used the guidelines therein to determine whether the impairment is temporary or other-than-temporary. Other-than-temporary impairment charges exists when the entity has the intent to sell the security or it will more likely than not be required to sell the security before anticipated recovery. During the year ended December 31, 2009, we recognized a credit loss of \$70,000, which was deemed to be other-than-temporary in other income (expense) in our Consolidated Statement of Operations.

The UBS put right is accounted for in accordance with ASC 820-10-35 *Fair Value Measurement and Disclosures—Overall—Subsequent Measurement*. We value the UBS put right at fair value, which is estimated to be equal to the par value of the auction-rate securities less their fair value as determined by management. Refer to Note 2 to our consolidated financial statements for further information.

Based on certain assumptions described in Note 2 to our consolidated financial statements and the Liquidity and Capital Resources section of Part II, Item 7 of this annual report on Form 10-K, we recorded impairment charges on our holdings in auction-rate securities. The valuation of these securities is subject to fluctuations in the future, which will depend on many factors, including the collateral quality, potential to be called or restructured, underlying final maturity, insurance guaranty, liquidity and market conditions, among others.

Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2009-13, "Multiple-Deliverable Revenue Arrangements" ("ASU 2009-13"). The new standard changes the requirements for establishing separate units of accounting in a multiple element arrangement and requires the allocation of arrangement consideration to each deliverable to be based on the relative selling price. ASU 2009-13 is effective for fiscal years beginning on or after June 15, 2010. The Company is currently evaluating ASU 2009-13 and the impact, if any, that it may have on its results of operations or financial position.

In April 2009, the FASB issued transition guidance Accounting Standards Codification ("ASC") 820-10-65-4 *Fair Value Measurements and Disclosures—Overall—Transition Guidance*, the provisions of which have been incorporated in ASC 820-10-50-2 *Fair Value Measurements and Disclosures—Overall—Disclosures*. ASC 820-10-50-2 requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance is effective for interim and annual periods ending after June 15, 2009. The Company adopted this standard effective April 1, 2009, the results of which are disclosed in Note 2 Fair Value Measurements.

In April 2009, the FASB issued transition guidance ASC 320-10-65-1 *Transition Related to FASB Staff Position ("FSP") SFAS No. 115-2 and SFAS No. 124-2, Recognition and Presentation of Other-Than-Temporary Impairments*, the provisions of which have been incorporated in ASC 320-10-35 *Investments—Debt and Equity Securities—Overall—Subsequent Measurement* and ASC 320-10-50 *Investments—Debt and Equity Securities—Overall—Disclosure*. The objective of an other-than-temporary impairment analysis under existing U.S. generally accepted accounting principles (GAAP) is

[Table of Contents](#)

to determine whether the holder of an investment in a debt or equity security for which changes in fair value are not regularly recognized in earnings (such as securities classified as held-to-maturity or available-for-sale) should recognize a loss in earnings when the investment is impaired. An investment is impaired if the fair value of the investment is less than its amortized cost basis. ASC 320-10-35 and ASC 320-10-50 amend the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. ASC 320-10-35 and ASC 320-10-50 do not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This guidance is effective for interim and annual periods ending after June 15, 2009. In response to this guidance, in April 2009, the SEC published ASC 320-10-S99-1 *Investments—Debt and Equity Securities—Overall—SEC Materials—Staff Accounting Bulletin (“SAB”) Topic 5M, Other than Temporary Impairment of Certain Investments in Equity Securities*. ASC 320-10-S99-1 maintains the staff’s previous views related to equity securities and excludes debt securities from its scope. The Company adopted this standard effective April 1, 2009, the results of which are disclosed in Note 2 Fair Value Measurements.

In April 2009, the FASB issued transition guidance ASC 820-10-65-4 *Fair Value Measurement and Disclosure—Overall—Transition Related to FASB FSP SFAS No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, the provisions of which have been incorporated in ASC 820-10-35-51 *Fair Value Measurement and Disclosure—Overall—Subsequent Measurement—Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. ASC 820-10-35-51 provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased and includes guidance on identifying circumstances that indicate a transaction is not orderly. ASC 820-10-35-51 emphasizes that even if there has been a significant decrease in the volume and level of activity for the asset or liability and regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. This guidance is effective for interim and annual periods ending after June 15, 2009. The Company adopted this standard effective April 1, 2009, the results of which are disclosed in Note 2 Fair Value Measurements.

In December 2007, the FASB issued transition guidance ASC 805-10-65-1 *Business Combinations—Overall—Transition Related to SFAS No. 141 (revised 2007), Business Combinations (SFAS 141(R)) and SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment of Accounting Review Bulletin (“ARB”) No. 51 (SFAS 160)*, the provisions of which have been incorporated in ASC 805-10 *Business Combinations—Overall* and ASC 805-20 *Business Combinations—Identifiable Assets and Liabilities, and Any Noncontrolling Interest*. ASC 805-10 will significantly change current practices regarding business combinations. Among the more significant changes, ASC 805-10 expands the definition of a business and a business combination; requires the acquirer to recognize the assets acquired, liabilities assumed and noncontrolling interests (including goodwill), measured at fair value at the acquisition date; requires acquisition-related expenses and restructuring costs to be recognized separately from the business combination; requires assets acquired and liabilities assumed from contractual and non-contractual contingencies to be recognized at their acquisition-date fair values with subsequent changes recognized in earnings; and requires in-process research and development to be capitalized at fair value as an indefinite-lived intangible asset. ASC 805-20 will change the accounting and reporting for minority interests, reporting them as equity separate from the parent entity’s equity, as well as requiring expanded disclosures. ASC 805-10 and ASC 805-20 are effective for financial statements issued for fiscal years beginning after December 15, 2008. The adoption of ASC 805-10 and ASC 805-20 did not have a significant impact on

[Table of Contents](#)

the Company's consolidated financial statements or financial position, but the nature and magnitude of the specific effects will depend upon the nature, terms and size of the acquisitions, if any, the Company completes after the effective date.

In May 2009, the FASB issued ASC 855, *Subsequent Events*. The objective of this guidance is to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In particular, this guidance sets forth:

1. The period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements;
2. The circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements; and
3. The disclosures that an entity should make about events or transactions that occurred after the balance sheet date.

In accordance with this guidance, an entity should apply the requirements to interim or annual financial periods ending after June 15, 2009. The Company adopted this standard effective April 1, 2009 and has and will make the appropriate disclosures, as required.

In June 2009, the FASB issued transition guidance ASC 105-10-65-1, *Transition Related to SFAS No. 168, The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles*, the guidance of which was incorporated in ASC 105-10 *Generally Accepted Accounting Principles ("GAAP")—Overall*. The *FASB Accounting Standards Codification™* (Codification) will become the source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. On the effective date of this guidance, the Codification will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the Codification will become nonauthoritative. This guidance is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company adopted this standard effective July 1, 2009, and has incorporated the current codification in this Form 10-K.

Results of Operations

The table below shows the Consolidated Statements of Operations amounts (in thousands) and shows each as a percentage of revenue.

	Year ended December 31,					
	2009		2008		2007	
	(in thousands, except percentages)					
Revenue	\$165,008	100.0%	\$160,511	100.0%	\$134,004	100.0%
Cost of revenue	67,330	40.8	61,184	38.1	48,781	36.4
Gross profit	97,678	59.2	99,327	61.9	85,223	63.6
Operating expenses:						
Research and development	38,295	23.3	34,850	21.7	27,342	20.5
Selling, general and administrative	36,752	22.3	35,256	22.0	29,537	22.0
Lease abandonment	—	—	—	—	(496)	(0.4)
Litigation expense	9,457	5.7	6,714	4.2	9,370	7.0
Patent litigation settlement (provision reversal)	(6,356)	(3.9)	—	—	9,800	7.3
Total operating expenses	78,148	47.4	76,820	47.9	75,553	56.4
Income from operations	19,530	11.8	22,507	14.0	9,670	7.2
Interest and other income	1,047	0.6	3,587	2.2	4,741	3.5
Other expense	(429)	(0.2)	(652)	(0.4)	(139)	(0.1)
Total other income, net	618	0.4	2,935	1.8	4,602	3.4
Income before income taxes	20,148	12.2	25,442	15.9	14,272	10.6
Income tax provision	474	0.3	1,216	0.8	2,692	2.0
Net income	\$ 19,674	11.9%	\$ 24,226	15.1%	\$ 11,580	8.6%

The following table shows our revenue by product family (amounts in thousands, except percentages):

Product Family	Year ended December 31,						Percent Change	
	2009		2008		2007		2009 to 2008	2008 to 2007
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue	Change	Change
DC to DC Converters	\$123,581	74.9%	\$115,373	71.9%	\$ 86,701	64.7%	7.1%	33.1%
LCD Backlight Inverters	27,836	16.9%	32,308	20.1%	35,713	26.7%	(13.8)%	(9.5)%
Audio Amplifiers	13,591	8.2%	12,830	8.0%	11,590	8.6%	5.9%	10.7%
Total	\$165,008	100.0%	\$160,511	100.0%	\$134,004	100.0%		

Revenue. Revenue for the year ended December 31, 2009 was \$165.0 million, an increase of \$4.5 million, or 2.8%, from \$160.5 million for the year ended December 31, 2008. The increase in revenue between these two periods resulted primarily from increased sales of our DC to DC products of \$8.2 million as a result of an increase in demand for electronic products in the consumer and communications markets. This was partially offset by a decrease in the sales of our lighting control products in the amount of \$4.5 million as a result of the continuing shift of notebook backlighting from CCFL solutions to WLED solutions. Sales for our audio products for the year ended December 31, 2009 remained relatively flat year over year.

[Table of Contents](#)

Revenue for the year ended December 31, 2008 was \$160.5 million, an increase of \$26.5 million, or 19.8%, from \$134.0 million for the year ended December 31, 2007. The increase in revenue between these two periods resulted primarily from increased sales of our DC to DC converters of \$28.7 million as a result of increased sales of consumer and communications end market devices. We experienced a decrease in the sales of our lighting control products in the amount of \$3.4 million due to a decrease in product demand, particularly notebook computers. The sales of our audio products increased by \$1.2 million due to increased sales of consumer electronics products.

Gross Profit. Gross profit as a percentage of revenue was 59.2% for the year ended December 31, 2009 and 61.9% for the year ended December 31, 2008. For the year ended December 31, 2009 and 2008, gross margin declined year-over-year as a result of increasing price pressure and therefore declining average selling prices, and an increase in inventory reserves resulting from a decrease in the general demand for certain of our lighting control products.

Gross profit as a percentage of revenue, or gross margin, was 61.9% for the year ended December 31, 2008 and 63.6% for the year ended December 31, 2007. Gross margin declined year-over-year as a result of a decrease in the average selling price of certain of our mature products and an increase in inventory reserves, particularly in the fourth quarter due to the deterioration in the general demand for electronic products.

Research and Development. Research and development (R&D) expenses consist of salary and benefit expenses for design and product engineers, expenses related to new product development, and related facility costs.

	Year ended December 31,			Percentage Change	
	2009	2008	2007	2009 to 2008	2008 to 2007
	(in thousands, except percentages)				
Revenue	\$165,008	\$160,511	\$134,004	2.8%	19.8%
Research and development ("R&D"), excluding stock-based compensation	31,887	29,029	22,717	9.8%	27.8%
R&D stock-based compensation	6,408	5,821	4,625	10.1%	25.9%
Total R&D	<u>\$ 38,295</u>	<u>\$ 34,850</u>	<u>\$ 27,342</u>	9.9%	27.5%
R&D as a percentage of net revenue	23.2%	21.7%	20.4%		

R&D expenses were \$38.3 million, or 23.2% of revenue, for year ended December 31, 2009 and \$34.9 million, or 21.7% of revenue, for the year ended December 31, 2008. The year-over-year increase was primarily due to an increase in personnel and new product development expenses to support new product development. Stock-based compensation expenses increased by \$0.6 million, primarily due to the acceleration of certain awards.

R&D expenses were \$34.9 million, or 21.7% of revenue, for the year ended December 31, 2008 and \$27.3 million, or 20.4% of revenue, for the year ended December 31, 2007. The year-over-year increase in R&D expenses was primarily due to an increase in R&D headcount, new product development activities, additional employee bonus payments and patent-related activities. The year-over-year increase was also due to an increase in stock-based compensation expenses of \$1.2 million.

[Table of Contents](#)

Selling, General and Administrative. Selling, general and administrative (SG&A) expenses include salary and benefit expenses, sales commissions, travel expenses, related facilities costs, outside legal and accounting fees, and fees associated with Sarbanes-Oxley compliance requirements.

	Year ended December 31,			Percentage Change	
	2009	2008	2007	2009 to 2008	2008 to 2007
	(in thousands, except percentages)				
Revenue	\$165,008	\$160,511	\$134,004	2.8%	19.8%
Selling, general and administrative ("SG&A"), excluding stock-based compensation	28,795	28,263	23,473	1.9%	20.4%
SG&A stock-based compensation	7,957	6,993	6,064	13.8%	15.3%
Total SG&A	\$ 36,752	\$ 35,256	\$ 29,537	4.2%	19.4%
SG&A as a percentage of net revenue	22.3%	22.0%	22.0%		

SG&A expenses were \$36.8 million, or 22.3% of revenue, for the year ended December 31, 2009 and \$35.3 million, or 22.0% of revenue, for the year ended December 31, 2008. For the year ended December 31, 2009, SG&A expenses increased compared to the corresponding period in the prior year due to an increase in sales and sales-related expenses. Stock-based compensation increased by \$1.0 million, primarily related to certain severance arrangements and the acceleration of certain awards.

SG&A expenses were \$35.3 million, or 22.0% of revenue, for the year ended December 31, 2008 and \$29.5 million, or 22.0% of revenue, for the year ended December 31, 2007. SG&A expenses increased year-over-year due to an increase in headcount to support the growth in business, sales commissions, sales representative contractual obligations and bonus expenses. The year-over-year increase was also due to an increase in stock-based compensation expenses in the amount of \$0.9 million.

Litigation Expense, excluding Patent Litigation Settlement and Provision Reversal, net.

	Year ended December 31,			Percentage Change	
	2009	2008	2007	2009 to 2008	2008 to 2007
	(in thousands, except percentages)				
Revenue	\$165,008	\$160,511	\$134,004	2.8%	19.8%
Litigation expense	9,457	6,714	9,370	40.9%	(28.3)%
Litigation expense as a percentage of net revenue	5.7%	4.2%	7.0%		

Litigation expenses, excluding patent litigation settlements and provision reversals were \$9.5 million, or 5.7% of revenue, for the year ended December 31, 2009 as compared to \$6.7 million, or 4.2% of revenue, for the year ended December 31, 2008. During the year ended December 31, 2009, we incurred significant legal expenses to defend our lawsuit against O2Micro. During the year ended December 31, 2008, we incurred significant legal expenses to defend our lawsuit against Linear Technology.

Litigation expenses, excluding patent litigation settlements and provision reversals were \$6.7 million, or 4.2% of revenue, for the year ended December 31, 2008 as compared to \$9.4 million, or 7.0% of revenue, for the year ended December 31, 2007. We incurred significant legal expenses during the first six months of 2008 for our lawsuit with Linear Technology. For the year ended December 31, 2007, we incurred significant legal expenses to prepare for and try our cases against O2Micro and TSE.

For a more complete description of our litigation matters, please see Part I, Item 3 "Legal Proceedings" and Note 10 "Litigation" of Notes to Consolidated Financial Statements.

[Table of Contents](#)**Patent Litigation Settlement (Provision Reversal, net).**

	Year ended December 31,			Percentage Change	
	2009	2008	2007	2009 to 2008	2008 to 2007
	(in thousands, except percentages)				
Revenue	\$165,008	\$160,511	\$134,004	2.8%	19.8%
Patent litigation settlement (provision reversal)	(6,356)	—	9,800	—	—
Patent litigation settlement (provision reversal) as a percentage of net revenue	(3.9)%	0.0%	7.3%		

Patent litigation provision reversal, net was \$6.4 million for the year ended December 31, 2009. In 2009, we completed the litigation process with respect to the lawsuit related to TSE, a customer. The conclusion of this lawsuit resulted in recording a reversal of a patent litigation provision of approximately \$7.4 million. This provision was recorded as a patent litigation provision in the second quarter of 2007 and the reversal of this provision in this fiscal year is reflected in the Patent Litigation Settlement and Provision Reversal, net item in the Consolidated Statement of Operations. In connection with the completion of this lawsuit, the Company also jointly terminated an escrow agreement with TSE and retrieved the deposit of \$7.4 million. This recovery was reduced by certain litigation stipulations for other parties involved in the case in the amount of \$1.0 million.

There were no patent litigation settlements or provision reversals in 2008. In July 2007, we received an unfavorable ruling in our litigation with TSE, for which we recorded an accrual for a patent litigation settlement of \$9.8 million in the second quarter of 2007, of which \$2.5 million was paid in the third quarter of 2007 and the remainder was held in escrow.

Lease Abandonment.

	Year ended December 31,			Percentage Change	
	2009	2008	2007	2009 to 2008	2008 to 2007
	(in thousands, except percentages)				
Revenue	\$165,008	\$160,511	\$134,004	2.8%	19.8%
Lease abandonment	—	—	(496)	—	—
Lease abandonment as a percentage of net revenue	0.0%	0.0%	(0.4)%		

We did not abandon any of our leases in 2009 and 2008. In December 2006, we abandoned our lease in Los Gatos and wrote off \$1.2 million in operating expenses based on the fair value of the liability in accordance with ASC 420-10, *Exit or Disposal Cost Obligations—Overall*. In May 2007, we entered into a sublease agreement to rent a portion of our Los Gatos facility for a period of 21 months commencing on June 1, 2007 during which we were to receive gross payments of \$0.7 million. As the amount we expected to receive was greater than the amount we originally estimated, we reduced the estimate of our remaining liability by \$0.5 million in the second quarter of 2007.

Interest and Other Income. For the years ended December 31, 2009, 2008 and 2007, interest and other income was \$1.0 million, \$3.6 million and \$4.7 million, respectively. Despite year over year increases cash, cash equivalents and investment balances, interest income decreased due to significant declines in interest rates resulting from the global financial crisis.

Other Expense. Other expense, comprised mainly of foreign exchange losses, was \$0.4 million, \$0.7 million and \$0.1 million for the years ended December 31, 2009, 2008 and 2007 respectively.

[Table of Contents](#)

Income Tax Provision. The income tax provision for the year ended December 31, 2009 was \$0.5 million or 2.4% of the pre-tax income, respectively. This differs from the U.S. federal statutory rate of 34% primarily because our foreign income is taxed at lower rates and because of the benefit that we realized as a result of stock options exercised and restricted units released.

The income tax provision for the year ended December 31, 2008 was \$1.2 million or 4.8% of our income before income taxes. This was lower than the U.S. federal statutory rate of 34% due primarily to a benefit from earnings in low foreign tax jurisdictions and a decrease in prior-year uncertain tax position reserves under ASC 740-10, which was partially offset by an increase in current-year ASC 740-10 reserves, additional ASC 740-10 interest accruals, an increase in the valuation allowance in the U.S. and non-deductible stock option compensation expenses.

The income tax provision for the year ended December 31, 2007 was \$2.7 million or 18.9% of our pre-tax income. This differed from the U.S. federal statutory rate primarily because we recorded an increase in the valuation allowance of our deferred tax assets in the amount of \$1.5 million as we no longer expected that our deferred tax assets will be realized. Furthermore, we provided a full valuation allowance against the tax benefits from the unpaid portion of the TSE litigation settlement, which was offset by deductions from stock option exercises and the paid portion of the TSE litigation settlement in the second quarter of 2007.

For additional information, see Note 8 "Income Taxes" of the Notes to Consolidated Financial Statements.

Liquidity and Capital Resources

As of December 31, 2009, we had working capital of \$179.6 million, including cash and cash equivalents of \$46.7 million and short-term investments of \$118.9 million compared to working capital of \$117.4 million, including cash and cash equivalents of \$83.3 million and short-term investments of \$21.9 million as of December 31, 2008. Our working capital increased year-over-year primarily due to cash generated from operating activities, the reclassification of \$16.9 million in auction-rate securities from long-term to short-term investments because of the UBS put right, which is an auction-rate security rights offering from UBS to sell up to \$16.9 million in face value of eligible auction-rate securities commencing in June 2010 and proceeds from the issuance of common stock.

For the year ended December 31, 2009, net cash provided by operating activities was \$31.8 million, primarily due to strong operating results during the year. This was offset by an increase in accounts receivable as a result of increased shipments at the end of the quarter ended December 31, 2009 for which collections had not yet been made and a decrease in accrued and long-term liabilities. For the year ended December 31, 2008, net cash provided by operating activities was \$39.6 million, primarily due to strong operating results. For the year ended December 31, 2007, net cash provided by operating activities was \$26.1 million, primarily due to strong operating results, partially offset by an increase in inventory purchases in anticipation of future demand requirements.

For the year ended December 31, 2009, net cash used in investing activities was \$82.1 million, primarily related to the purchase of short-term investments. For the year ended December 31, 2008, net cash used in investing activities was \$29.6 million, primarily related to the purchase of \$28.1 million in auction-rate securities, which became illiquid in February 2008 and which we have not been able to sell, and the purchase of \$5.2 million in capital equipment. This was offset by the release of \$8.6 million in restricted assets as a result of an agreement between O2Micro and us relating to certain legal proceedings in Taiwan. For the year ended December 31, 2007, net cash used by investing activities was \$13.9 million, primarily due to capital equipment purchases of \$6.7 million. In addition, we placed in escrow \$7.4 million in connection with the TSE litigation, for which we could have been

[Table of Contents](#)

liable subject to the outcome of certain legal activities. The conclusion of this lawsuit resulted in recording a reversal of a patent litigation provision of approximately \$7.4 million due to the release of the restricted cash in escrow in the third quarter of 2009.

We use professional investment management firms to manage the majority of our invested cash. Within the U.S., the fixed income portfolio is primarily invested in municipal bonds. Outside of the U.S., our fixed income portfolio is primarily invested in U.S. Treasury notes and other sovereign obligations, and highly rated corporate notes. The balance of the fixed income portfolio is managed internally and invested primarily in money market funds for working capital purposes.

The market for auction-rate securities with interest rates that reset through a Dutch auction every 7 to 35 days, became illiquid in 2008. As of December 31, 2009, our investment portfolio included \$35.6 million, net of impairment charges of \$1.8 million, in government-backed student loan auction-rate securities. The portfolio also included a UBS auction-rate put right, which was valued at \$0.7 million in accordance with the fair value measurement provisions of ASC 820-10-35. During the year ended December 31, 2009, auction rate securities with a face value of \$1.3 million were sold at par through successful auctions. However, the remaining auction rate securities in the portfolio with a face value of approximately \$37.4 million have failed to reset through successful auctions and it is unclear as to when these investments will regain their liquidity. The underlying maturity of these auction-rate securities is up to 38 years and the underlying credit quality of these instruments in which we have invested remain generally AAA rated, with \$12.1 million of our auction rate securities having been downgraded by Moody's to Aa1-Baa3.

We adopted the provisions of ASC 320-10-35 *Investments—Debt and Equity Securities—Overall—Subsequent Measurement* and ASC 320-10-50 *Investments—Debt and Equity Securities—Overall—Disclosure*, effective April 1, 2009 and used the guidelines therein to determine whether the impairment is temporary or other-than temporary. Temporary impairment charges are recorded in accumulated other comprehensive income (loss) within equity and have no impact on net income. Other-than-temporary impairment charges exist when the entity has the intent to sell the security or it will more likely than not be required to sell the security before anticipated recovery. Other-than-temporary impairment charges are recorded in other income (expenses) in the Consolidated Statement of Operations.

In October 2008, we accepted an offer to participate in an auction-rate security rights offering from UBS to sell up to \$18.2 million in face value amount of eligible auction-rate securities commencing in June 2010. Since then, \$1.3 million of these auction-rate securities were called at par, leaving \$16.9 million in eligible auction-rate securities remaining at UBS. The offer gives us the right but not the obligation to sell these securities at par to UBS and allows us to borrow up to \$16.9 million. In accepting the offer, we also entered into a release of claims in favor of UBS.

Since we accepted this put right from UBS, we intend to sell these auction-rate securities at par to UBS commencing in June 2010. These securities have been reclassified as trading securities and the cumulative impairment related to these auction-rate securities was \$0.7 million and \$1.3 million at December 31, 2009 and 2008, respectively. Therefore, the impairment related to these securities has been recorded in other income (expense) in the Consolidated Statement of Operations.

Having accepted UBS' rights offering, we valued the put right at fair value, which was estimated to be equal to the par value of the auction-rate securities less their fair value as determined by management. The value of the put right was \$0.7 million and \$1.3 million, at December 31, 2009 and 2008, respectively, the effect of which has been recorded by the Company in other income in the Consolidated Statement of Operations. The UBS rights offering is being accounted for as a fair-value instrument under ASC 820-10-35 and as such, all future changes in the fair value of these instruments will be recognized in other income (expense) in the Consolidated Statement of Operations.

[Table of Contents](#)

For the remaining auction-rate securities for which the rights offering (described above) does not apply, and which have a face value of \$20.5 million and \$20.6 million as of December 31, 2009 and 2008, respectively, management concluded that as of December 31, 2009 and 2008, the cumulative impairment of \$1.1 million and \$1.4 million, respectively, was temporary based on the following analysis:

1. The decline in the fair value of these securities is not attributable to adverse conditions specifically related to these securities or to specific conditions in an industry or in a geographic area;
2. Management possesses both the intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in fair value;
3. Management believes that it is more likely than not that the Company will not have to sell these securities before recovery of its cost basis;
4. Except for the credit loss of \$70,000 recognized in year ended December 31, 2009 for the Company's holdings in auction rate securities described below, the Company does not believe that there is any additional credit loss associated with other auction-rate securities because the Company expects to recover the entire amortized cost basis;
5. All securities were AAA rated at December 31, 2008. The majority of the securities remain AAA rated, with \$9.0 million of the auction rate securities having been downgraded by Moody's to A3-Baa3, and there have been no downgrades in the three months ended December 31, 2009; and
6. All scheduled interest payments have been made pursuant to the reset terms and conditions.

Based on the guidance of ASC 320-10-35 and ASC 320-10-50, the Company evaluated the potential credit loss of each of the auction-rate securities for which a put right was not provided. Based on such analysis, the Company determined that those securities that are not 100% FFELPS guaranteed are potentially subject to credit risks based on the extent to which the underlying debt is collateralized and the security-specific student-loan default rates. MPS' portfolio includes three such securities, one of which has a senior parity ratio of approximately 115%, which is substantially above the expected student-loan default rate for that security. Conversely, the senior parity ratio for the other two securities is approximately 105%. If, therefore, the student-loan default rate and borrowing rate increases for these issuers, the remaining balance in these trusts may not be sufficient to cover the senior debt. The Company therefore concluded that there is potential credit risk for these two securities and as such, used the discounted cash flow model to determine the amount of credit loss to be recorded. In valuing the potential credit loss, the following parameters were used: 20 year expected term, cash flows based on the 90-day t-bill rates for 20 year forwards and a risk premium of 5.9%, the amount of interest that the Company was receiving on these securities when the market was last active. The potential credit loss associated with these securities was \$70,000, which the Company recorded in other expense in its Consolidated Statement of Operations during the year ended December 31, 2009.

Unless another rights offering or other similar offers are made to redeem at par and accepted by us, we intend to hold the balance of these investments through successful auctions at par, which we believe could take approximately 2.0 years.

The valuation of the auction-rate securities is subject to fluctuations in the future, which will depend on many factors, including the collateral quality, potential to be called or restructured, underlying final maturity, insurance guaranty, liquidity and market conditions, among others. To determine the fair value of the auction-rate securities at December 31, 2009, September 30, 2009, June 30, 2009, March 31, 2009 and December 31, 2008, we used a discounted cash flow model,

Table of Contents

for which there are three valuation parameters, including time-to-liquidity, discount rate and expected return. The following are the values used in the discounted cash flow model:

	December 31, 2008	March 31, 2009	June 30, 2009	September 30, 2009	December 31, 2009
Time-to-Liquidity	18 months	24 months	21 months	24 months	24 months
Expected Return (Based on the requisite treasury rate, plus a contractual penalty rate)	2.3%	1.6%	2.1%	2.1%	2.4%
Discount Rate (Based on the requisite LIBOR, the cost of debt and a liquidity risk premium)	6.8%	5.5% – 8.5%, depending on the credit-rating of the security	5.3% – 10.1%, depending on the credit-rating of the security	4.8% – 9.6%, depending on the credit-rating of the security	5.2% – 10.0%, depending on the credit-rating of the security

From the fourth quarter of 2008 to the first quarter of 2009, we increased the time-to-liquidity from 1.5 years to 2.0 years, as we did not believe that liquidity would return to the market until then. We also experienced a downgrade in certain of our auction-rate securities by Moody's. These changes increased the impairment of these securities. However, there was a decrease in the FFELPS-guaranteed student-loan credit default swap spread from 325 basis points at the end of the fourth quarter of 2008 to 150 basis points at the end of the first quarter of 2009, which significantly reduced the impairment of these securities. As a result of offsetting charges, the total cumulative impairment charge of \$2.7 million did not change from December 31, 2008. However, the temporary impairment charge increased from \$1.4 million at the end of 2008 to \$1.5 million at the end of the first quarter of 2009. Other-than-temporary impairment charges decreased from \$1.3 million at the end of 2008 to \$1.2 million at the end of the first quarter of 2009.

From the first quarter of 2009 to the second quarter of 2009, we decreased the time to liquidity from 2.0 years to 1.8 years, as three months had elapsed between periods. We also experienced a decrease in the FFELPS-guaranteed student-loan credit default swap spread from 150 basis points at the end of the first quarter of 2009 to 80 basis points at the end of the second quarter of 2009. Based on the quarterly change in the parameters used in the discounted cash flow model, the total cumulative impairment charge decreased from \$2.7 million at the end of the first quarter of 2009 to \$2.0 million at the end of the second quarter of 2009. Temporary impairment charges decreased from \$1.5 million at the end of the first quarter of 2009 to \$1.1 million at the end of the second quarter of 2009. We also recognized \$70,000 in credit losses in other income (expense) in the Consolidated Statement of Operations as detailed in Note 8 Fair Value Measurements.

From the second quarter of 2009 to the third quarter of 2009, we increased the time to liquidity from 1.8 years to two years even though \$1.3 million of our holdings in auction rate securities were called at par. The credit markets for these types of securities remained tight and it was unclear as to when the markets would regain its liquidity. We also experienced a decrease in the FFELPs-guaranteed student loan credit default swap spread from 80 basis points at the end of the second quarter of 2009 to 30 basis points at the end of the third quarter of 2009. Based on the quarterly change in the parameters used in the discounted cash flow model, the cumulative impairment decreased from \$2.0 million at the end of the second quarter to \$1.8 million at the end of the third quarter. Temporary impairment charges remained relatively constant between quarters. However, we experienced a \$0.2 million decrease in other-than-temporary impairment charges related to the auction-rate securities held at UBS, which was fully offset by the change in the value of the UBS put right.

[Table of Contents](#)

From the third quarter of 2009 to the fourth quarter of 2009, we held the time to liquidity to two years. The parameters used in the discounted cash flow model remained relatively constant and as such, the cumulative impairment did not change from \$1.8 million in the prior quarter.

Net cash provided by financing activities for the year ended December 31, 2009 was \$13.6 million, primarily from the issuance of common stock in the amount of \$13.0 million and excess tax benefits from stock option transactions in the amount of \$0.6 million.

Net cash used by financing activities for the year ended December 31, 2008 was \$9.8 million, primarily from the repurchase of \$25.0 million of our common stock of which our Board approved a repurchase of up to \$25.0 million. This was partially offset by the proceeds related to the issuance of common stock in the amount of \$14.5 million and excess tax benefits related to the exercise of options of \$0.8 million. Net cash provided by financing activities for the year ended December 31, 2007 was \$20.0 million, primarily from the proceeds related to the issuance of common stock in the amount of \$17.3 million and excess tax benefits related to the exercise of options in the amount of \$2.7 million.

Although cash requirements will fluctuate based on the timing and extent of many factors such as those discussed above, we believe that cash generated from operations, together with the liquidity provided by existing cash balances and short term investments, will be sufficient to satisfy our liquidity requirements for the next 12 months. For further details regarding our operating, investing and financing activities, see the Consolidated Statement of Cash Flows.

Contractual Obligations

We lease our headquarters and sales offices in San Jose, California under a non-cancelable operating lease which expires in October 2016. Although we relocated our headquarters from Los Gatos, California to San Jose, we had a non-cancelable lease on our Los Gatos facility which expired in February 2009, for which we signed an agreement in May 2007 to sublease a portion of the property for the remaining term. In the second quarter of 2007, we reversed \$0.5 million of the \$1.3 million write-off that we recorded in the fourth quarter of 2006 as a result of the aforementioned sublease. Certain of our facility leases provide for periodic rent increases. In addition, as described below, we have a five-year lease arrangement which we entered into in September 2004 for our manufacturing facility located in Chengdu, China, which will expire in March 2011. We also lease our sales offices in Japan, China, Taiwan and Korea.

In the fourth quarter of 2007, we qualified a second source foundry and have incorporated their wafers in our production units. As of December 31, 2009, our total outstanding purchase commitments were \$13.2 million, which includes wafer purchases from our two foundries, the purchase of assembly services primarily from multiple contractors in Asia and purchase commitments related to the construction of our Chengdu facility. This compares to purchase commitments of \$10.3 million as of December 31, 2008.

In September 2004, we signed an agreement with a Chinese local authority to construct a facility in Chengdu, China, initially for the testing of our ICs. Pursuant to this agreement, we agreed to contribute capital in the form of cash, in-kind assets, and/or intellectual property, of at least \$5.0 million to our wholly-owned Chinese subsidiary as the registered capital for the subsidiary and exercised the option to purchase land use rights for the facility of approximately \$0.2 million. We also have the option to acquire the facility after a five-year lease term for the original construction cost less rents paid, which is currently estimated at \$2.0 million, which option becomes exercisable in March 2011. We will likely enter into a purchase agreement for this facility at the end of the lease term.

We are currently in the process of constructing a 140,000 square foot research and development facility in Chengdu, China which will be operational in mid-2010 and for which we have outstanding purchase commitments which are included in the table below.

[Table of Contents](#)

The following table summarizes our contractual obligations at December 31, 2009, and the effect such obligations are expected to have on our liquidity and cash flow over the next five years (in thousands).

	Payments by Period						
	Total	2010	2011	2012	2013	2014	Thereafter
Operating leases	\$ 8,278	\$ 1,432	\$ 1,213	\$ 1,080	\$ 1,124	\$ 1,168	\$ 2,261
Outstanding purchase commitments	\$ 13,214	\$ 13,214	\$ —	\$ —	\$ —	\$ —	\$ —
	<u>\$ 21,492</u>	<u>\$ 14,646</u>	<u>\$ 1,213</u>	<u>\$ 1,080</u>	<u>\$ 1,124</u>	<u>\$ 1,168</u>	<u>\$ 2,261</u>

Because of the uncertainty as to the timing of payments related to our liabilities for unrecognized tax benefits, we have excluded estimated obligations of \$4.9 million from the table above.

Off Balance Sheet Arrangements

As of December 31, 2009, we had no off-balance sheet arrangements as defined in Item 303(a)(4) of the Securities and Exchange Commission's Regulation S-K.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

Our cash equivalents and investments are subject to market risk, primarily interest rate and credit risk. Our investments are managed by outside professional managers within investment guidelines set by us. Such guidelines include security type, credit quality and maturity and are intended to limit market risk by restricting our investments to high quality debt instruments with relatively short-term maturities.

We do not use derivative financial instruments in our investment portfolio. Investments in debt securities are classified as available-for-sale or trading. For available-for-sale investments, no gains or losses are recognized by us in our results of operations due to changes in interest rates unless such securities are sold prior to maturity or are determined to be other-than-temporarily impaired. Available-for-sale investments are reported at fair value with the related unrealized gains or losses being included in accumulated other comprehensive income, a component of stockholders' equity. Trading securities are reported at fair value with unrealized gains and losses included in earnings.

Fluctuations in interest rates of +/- 10% could impact our annual results of operations by approximately \$0.1 million.

Foreign Currency Exchange Risk

Our sales outside the United States are transacted in U.S. dollars. Accordingly, our sales are not generally impacted by foreign currency rate changes. In 2009, the primary functional currency of the Company's offshore operations was the local currency, primarily the New Taiwan Dollar and the Chinese Yuan. To date, fluctuations in foreign currency exchange rates have not had a material impact on our results of operations. However, fluctuations of +/- 10% in such local currencies could impact our annual results of operations by approximately \$2.6 million.

Value Change to Investments

As of December 31, 2009, all of our holdings in auction rate securities, which have a face value of \$37.4 million, have failed to reset as a result of current market conditions. Should these auctions

[Table of Contents](#)

continue to fail and if the credit rating for these securities decline, a 10% decline in the fair value could impact our results of operations by approximately \$3.7 million.

In valuing the auction-rate securities using the discounted cash flow model, a change in either the liquidity risk premium or time-to-liquidity by 10% would result in a \$0.1 million change in the value of our auction-rate securities portfolio.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
of Monolithic Power Systems, Inc.

We have audited the accompanying consolidated balance sheets of Monolithic Power Systems, Inc. and subsidiaries (collectively, the "Company") as of December 31, 2009 and 2008, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Monolithic Power Systems, Inc. and subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2009, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 12, 2010 expressed an unqualified opinion on the Company's internal control over financial reporting.

/s/ Deloitte & Touche LLP

San Jose, California
February 12, 2010

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
of Monolithic Power Systems, Inc.

We have audited the internal control over financial reporting of Monolithic Power Systems, Inc. and subsidiaries (collectively, the "Company") as of December 31, 2009, based on the criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on the criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

[Table of Contents](#)

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2009, of the Company and our report dated February 12, 2010 expressed an unqualified opinion on those consolidated financial statements.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Business—Monolithic Power Systems, Inc. (MPS or the Company) was incorporated in the State of California on August 22, 1997. On November 17, 2004, the Company was reincorporated in the State of Delaware. MPS designs, develops and markets proprietary, advanced analog and mixed-signal semiconductors. The company combines advanced process technology with its highly experienced analog designers to produce high-performance power management integrated circuits (ICs) for DC to DC converters, LED drivers, Cold Cathode Fluorescent Lamp (CCFL) backlight controllers, Class-D audio amplifiers, and other Linear ICs. MPS products are used extensively in computing and network communications products, LCD monitors and TVs, and a wide variety of consumer and portable electronics products. MPS partners with world-class manufacturing organizations to deliver top quality, ultra-compact, high-performance solutions through productive, cost-efficient channels.

Basis of Presentation—The consolidated financial statements include the accounts of Monolithic Power Systems, Inc. and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

The Company has performed a review of subsequent events as of February 12, 2010, which is the date the financial statements were available for issuance.

Foreign Currency Transactions—The Company's foreign subsidiaries operate primarily using their respective local currencies, and therefore, the local currency has been determined to be the functional currency for each foreign subsidiary. Accordingly, all assets and liabilities of the Company's foreign subsidiaries are translated using exchange rates in effect at the end of the period. Revenue and costs are translated using average exchange rates for the period. The resulting translation adjustments are presented as a separate component of accumulated other comprehensive income (loss) in stockholders' equity.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Certain Significant Risks and Uncertainties—Financial instruments which potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents, short-term and long-term investments and accounts receivable. The Company's cash consists of checking and savings accounts. The Company's cash equivalents include short-term, highly liquid investments purchased with remaining maturities at the date of purchase of three months or less. The Company's short-term investments consist primarily of commercial paper and the Company's long-term investments consist of government-backed student loan auction-rate securities. The Company generally does not require its customers to provide collateral or other security to support accounts receivable. To manage credit risk, management performs ongoing credit evaluations of its customers' financial condition.

The Company participates in the dynamic high technology industry and believes that changes in any of the following areas could have a material adverse effect on the Company's future financial position, results of operations or cash flows: advances and trends in new technologies and industry

MONOLITHIC POWER SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

standards; competitive pressures in the form of new products or price reductions on current products; changes in product mix; changes in the overall demand for products offered by the Company; changes in third-party manufacturers; changes in key suppliers; changes in certain strategic relationships or customer relationships; litigation or claims against the Company based on intellectual property, patent, product, regulatory or other factors; fluctuations in foreign currency exchange rates; risk associated with changes in domestic and international economic and/or political regulations; availability of necessary components or subassemblies; availability of foundry capacity; and the Company's ability to attract and retain employees necessary to support its growth.

The Company is also a party to litigation with several competitors (see Note 10).

Fair Value of Financial Instruments—The Company adopted the provisions of Financial Accounting Standards Board ("FASB")—Accounting Standards Codification ("ASC") 820-10 *Fair Value Measurements and Disclosures—Overall*, effective January 1, 2008. This Statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles in the United States of America, and requires that assets and liabilities carried at fair value be classified and disclosed in one of the three categories, as follows:

- Level 1: Quoted prices in active markets for identical assets;
- Level 2: Significant other observable inputs; and
- Level 3: Significant unobservable inputs.

The Company also adopted the provisions of ASC 820-10-35-51 *Fair Value Measurement and Disclosure—Overall—Subsequent Measurement—Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, effective April 1, 2009. This standard provides additional guidance for estimating fair value in accordance with ASC 820-10 *Fair Value Measurements and Disclosures—Overall*, when the volume and level of activity for the asset or liability have significantly decreased.

The Company's financial instruments include cash and cash equivalents and short-term and long-term investments. Cash equivalents are stated at cost, which approximates fair market value based on quoted market prices. Short-term and long-term investments are stated at their fair market value.

The face value of the Company's holdings in auction rate securities is \$37.4 million, of which \$20.5 million is currently classified as long-term available-for-sale investments and \$16.9 million is classified as short-term trading investments. The securities that are classified as short-term trading securities have been classified as such because the Company intends to exercise its put option to sell these securities to UBS in June of 2010. These investments are accounted for in accordance with ASC 320-10, *Investments—Debt and Equity Securities—Overall*. Investments in available-for-sale securities are recorded at fair value, and unrealized gains or losses (that are deemed to be temporary) are recognized through shareholders' equity, as a component of accumulated other comprehensive income in the Company's consolidated balance sheet. The Company records an impairment charge to earnings when an available-for-sale investment has experienced a decline in value that is deemed to be other-than-temporary. Investments in trading securities are recorded at fair value and unrealized gains and losses are recognized in other income (expense) in the Company's Consolidated Statement of Operations.

The Company adopted the provisions of ASC 320-10-35 *Investments—Debt and Equity Securities—Overall—Subsequent Measurement* and ASC 320-10-50 *Investments—Debt and Equity*

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Securities—Overall—Disclosure, effective April 1, 2009 and used the guidelines therein to determine whether the impairment of its available-for-sale securities is temporary or other-than temporary. Other-than-temporary impairment charges exists when the entity has the intent to sell the security or it will more likely than not be required to sell the security before anticipated recovery. In 2009, the Company recognized a credit loss of \$70,000, which was deemed to be other-than-temporary in other income (expense) in the Company's Consolidated Statement of Operations.

The UBS put right is accounted for in accordance with ASC 820-10-35 *Fair Value Measurement and Disclosures—Overall—Subsequent Measurement*. The Company values the UBS put right at fair value, which is estimated to be equal to the par value of the auction-rate securities less their fair value as determined by management. Refer to Note 2, Fair Value Measurements for further information.

Based on certain assumptions described in Note 2 to our consolidated financial statements of this annual report on Form 10-K, the Company recorded impairment charges on our holdings in auction-rate securities. The valuation of these securities is subject to fluctuations in the future, which will depend on many factors, including the collateral quality, potential to be called or restructured, underlying final maturity, insurance guaranty, liquidity and market conditions, among others.

Inventories—Inventories are stated at the lower of the standard cost (which approximates actual cost on a first-in, first-out basis) or current estimated market value. The Company monitors manufacturing variances and revises standard costs if necessary. Due to continued demand changes, potential obsolescence, and product life cycle, the Company writes down inventory to net realizable values, as needed.

Property and Equipment—Property and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally three to five years. Leasehold improvements are amortized over the shorter of the estimated useful life or the lease period.

Long-Lived Assets—The Company evaluates long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss would be recognized when the sum of the undiscounted future net cash flows expected to result from the use of the asset and its eventual disposition is less than its carrying amount. Such impairment loss would be measured as the difference between the carrying amount of the asset and its fair value based on the present value of estimated future cash flows.

Other Assets—Other assets consist primarily of intangible assets for the land use rights in Chengdu, purchased patents and long-term lease deposits.

Restricted Cash—At December 31, 2008, the Company had restricted assets of \$7.4 million. In July 2007, the Company placed in escrow \$7.4 million as a result of a settlement with Taiwan Sumida Electronics, Inc. ("TSE") and for which the Company could have been liable if certain conditions were met. In 2009, in connection with the completion of this lawsuit, the Company recorded a provision reversal in the amount of \$7.4 million and jointly with TSE, terminated the escrow agreement, for which the deposit of \$7.4 million was retrieved (see Note 10). As of December 31, 2009, the Company did not have any restricted assets.

Revenue Recognition—The Company recognizes revenue in accordance with ASC 605-10-S25 *Revenue Recognition—Overall—Recognition*. ASC 605-10-S25 requires that four basic criteria must

MONOLITHIC POWER SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services have been rendered; (3) the fee is fixed and determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) are based on management's judgment regarding the fixed nature of the fee charged for products delivered and the collectibility of those fees. The application of these criteria has resulted in the Company generally recognizing revenue upon shipment (when title passes) to customers. Should changes in conditions cause management to determine these criteria are not met for certain future transactions, revenue recognized for any reporting period could be adversely impacted.

Approximately 80% of the Company's distributor sales are made through distribution arrangements with third parties. These arrangements do not include any special payment terms (our normal payment terms are 30-45 days), price protection or exchange rights. Returns are limited to the Company's standard product warranty. Certain of the Company's large distributors have contracts that include limited stock rotation rights that permit the return of a small percentage of the previous six months' purchases in return for a compensating new order of equal or greater dollar value.

The Company maintains a sales reserve for stock rotation rights, which is based on historical experience of actual stock rotation returns on a per distributor basis, where available, and information related to products in the distribution channel. This reserve is recorded at the time of sale. In the future, if the Company is unable to estimate its stock rotation returns accurately, the Company may not be able to recognize revenue from sales to its distributors based on when it sells inventory to its distributors. Instead, the Company may have to recognize revenue when the distributor sells through such inventory to an end-customer.

The Company generally recognizes revenue upon shipment of products to the distributor for the following reasons (based on ASC 605-15-25-1 *Revenue Recognition—Products—Recognition—Sales of Products When Right of Return Exists*):

- (1) The Company's price is fixed and determinable at the date of sale. The Company does not offer special payment terms, price protection or price adjustments to distributors where the Company recognizes revenue upon shipment
- (2) The Company's distributors are obligated to pay the Company and this obligation is not contingent on the resale of the Company's products
- (3) The distributor's obligation is unchanged in the event of theft or physical destruction or damage to the products
- (4) The Company's distributors have stand-alone economic substance apart from the Company's relationship
- (5) The Company does not have any obligations for future performance to directly bring about the resale of the Company's products by the distributor
- (6) The amount of future returns can be reasonably estimated. The Company has the ability and the information necessary to track inventory sold to and held at its distributors. The Company maintains a history of returns and has the ability to estimate the stock rotation returns on a quarterly basis.

If the Company enters into arrangements that have rights of return that are not estimable, the Company recognizes revenue under such arrangements only after the distributor has sold the Company's products to an end customer.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Approximately 20% of the Company's distributor sales are made through small distributors based on purchase orders rather than formal distribution arrangements. These distributors do not receive any stock rotation rights.

The terms in a majority of the Company's distribution agreements include the non-exclusive right to sell, and the agreement to use best efforts to promote and develop a market for, our products in certain regions of the world and the ability to terminate the distribution agreement by either party with up to three months notice. The Company provides a one year warranty against defects in materials and workmanship. Under this warranty, the Company will repair the goods, provide replacements at no charge, or, under certain circumstances, provide a refund to the customer for defective products. Estimated warranty returns and warranty costs are based on historical experience and are recorded at the time product revenue is recognized.

In 2006, the Company signed a distribution agreement with a U.S. distributor. Revenue from this distributor is recognized upon sale by the distributor to the end customer because the distributor has certain rights of return which management believes are not estimable. For the years ended December 31, 2009 and 2008, the deferred revenue balance from this distributor was \$0.9 million and \$0.5 million, respectively.

Stock-Based Compensation—The Company adopted the provisions of ASC 718-10-30 *Compensation—Stock Compensation—Overall—Initial Measurement*, under the modified prospective method. ASC 718-10-30 eliminated the alternative of applying the intrinsic value measurement to stock compensation awards issued to employees. Rather, the standard requires the Company to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period). The Company currently use the Black-Scholes option-pricing model to estimate the fair value of its share-based payments. The Black-Scholes option-pricing model is based on a number of assumptions, including historical volatility, expected life, risk-free interest rate and expected dividends.

Research and Development—Costs incurred in research and development are charged to operations as incurred.

Income Taxes—ASC 740-10 *Income Taxes—Overall* prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure. In accordance with ASC 740-10, the Company recognizes federal, state and foreign current tax liabilities or assets based on its estimate of taxes payable or refundable in the current fiscal year by tax jurisdiction. The Company also recognizes federal, state and foreign deferred tax assets or liabilities for its estimate of future tax effects attributable to temporary differences and carryforwards. The Company records a valuation allowance to reduce any deferred tax assets by the amount of any tax benefits that, based on available evidence and judgment, are not expected to be realized.

The Company's calculation of current and deferred tax assets and liabilities is based on certain estimates and judgments and involves dealing with uncertainties in the application of complex tax laws. The Company's estimates of current and deferred tax assets and liabilities may change based, in part, on added certainty or finality or uncertainty to an anticipated outcome, changes in accounting or tax laws in the U.S., or foreign jurisdictions where we operate, or changes in other facts or circumstances.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In addition, the Company recognizes liabilities for potential U.S. and foreign income tax for uncertain income tax positions taken on its tax returns if it has less than a 50% likelihood of being sustained. If the Company determines that payment of these amounts is unnecessary or if the recorded tax liability is less than the Company's current assessment, the Company may be required to recognize an income tax benefit or additional income tax expense in its financial statements in the period such determination is made. The Company has calculated its uncertain tax positions which were attributable to certain estimates and judgments primarily related to transfer pricing, cost sharing and the Company's international tax structure exposure.

As of December 31, 2009 and 2008, the Company had a valuation allowance of \$14.6 million and \$14.4 million, respectively, attributable to management's determination that none of the deferred tax assets will be realized, except for certain deferred tax assets related to uncertain income tax positions. Should it be determined that all or part of the net deferred tax asset will not be realized in the future, an adjustment to increase the deferred tax asset valuation allowance will be charged to income in the period such determination is made. Likewise, in the event that the Company were to determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the valuation allowance for the deferred tax asset would increase income in the period such determination was made.

The Company adopted the provisions of ASC 718-10-30, and as a result, incurred significant stock-based compensation expense, some of which related to incentive stock options for which no corresponding tax benefit is recognized unless a disqualifying disposition occurs. Disqualifying dispositions result in a reduction of income tax expense in the period when the disqualifying disposition occurs in an amount equal to the tax benefit relating to previously recognized stock compensation expense. Tax benefits related to realized tax deductions in excess of previously expensed stock compensation are recorded as an addition to paid-in-capital.

Patent Litigation—Costs incurred in registering and defending the Company's patents and other proprietary rights are charged to operations as incurred (See Note 10).

Comprehensive Income (Loss)—Comprehensive income represents the change in the Company's net assets during the period from non-owner sources. Comprehensive income (loss) includes unrealized gains/(losses) on investments and foreign exchange gains/(losses) for the years ended December 31, 2009, 2008 and 2007.

	Years Ended December 31,		
	2009	2008	2007
Net income	\$19,674	\$24,226	\$11,580
Other comprehensive income (loss):			
Change in value of temporary impairment of auction-rate securities	270	(1,400)	—
Credit loss on auction-rate securities	70	—	—
Unrealized gain (loss) on available-for-sale securities	(109)	(1)	46
Foreign currency translation adjustments	187	872	617
Comprehensive income	<u>\$20,092</u>	<u>\$23,697</u>	<u>\$12,243</u>

Accumulated other comprehensive income presented in the Consolidated Balance Sheet at December 31, 2009 consisted primarily of \$1.5 million related to translation gains, offset by \$1.1 million

MONOLITHIC POWER SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

related to the impairment of the Company's holdings in auction-rate securities. Accumulated other comprehensive loss presented in the Consolidated Balance Sheet at December 31, 2008 consisted primarily of an impairment of the Company's holdings in auction-rate securities in the amount of \$1.4 million, offset by \$1.3 million related to translation gains.

New Accounting Standards To Be Adopted—In October 2009, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2009-13, "Multiple-Deliverable Revenue Arrangements" ("ASU 2009-13"). The new standard changes the requirements for establishing separate units of accounting in a multiple element arrangement and requires the allocation of arrangement consideration to each deliverable to be based on the relative selling price. ASU 2009-13 is effective for fiscal years beginning on or after June 15, 2010. The Company is currently evaluating ASU 2009-13 and the impact, if any, that it may have on its results of operations or financial position.

In April 2009, the FASB issued transition guidance Accounting Standards Codification ("ASC") 820-10-65-4 *Fair Value Measurements and Disclosures—Overall—Transition Guidance*, the provisions of which have been incorporated in ASC 820-10-50-2 *Fair Value Measurements and Disclosures—Overall—Disclosures*. ASC 820-10-50-2 requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance is effective for interim and annual periods ending after June 15, 2009. The Company adopted this standard effective April 1, 2009, the results of which are disclosed in Note 2 Fair Value Measurements.

In April 2009, the FASB issued transition guidance ASC 320-10-65-1 *Transition Related to FASB Staff Position ("FSP") SFAS No. 115-2 and SFAS No. 124-2, Recognition and Presentation of Other-Than-Temporary Impairments*, the provisions of which have been incorporated in ASC 320-10-35 *Investments—Debt and Equity Securities—Overall—Subsequent Measurement* and ASC 320-10-50 *Investments—Debt and Equity Securities—Overall—Disclosure*. The objective of an other-than-temporary impairment analysis under existing U.S. generally accepted accounting principles (GAAP) is to determine whether the holder of an investment in a debt or equity security for which changes in fair value are not regularly recognized in earnings (such as securities classified as held-to-maturity or available-for-sale) should recognize a loss in earnings when the investment is impaired. An investment is impaired if the fair value of the investment is less than its amortized cost basis. ASC 320-10-35 and ASC 320-10-50 amend the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. ASC 320-10-35 and ASC 320-10-50 do not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This guidance is effective for interim and annual periods ending after June 15, 2009. In response to this guidance, in April 2009, the SEC published ASC 320-10-S99-1 *Investments—Debt and Equity Securities—Overall—SEC Materials—Staff Accounting Bulletin ("SAB") Topic 5M, Other than Temporary Impairment of Certain Investments in Equity Securities*. ASC 320-10-S99-1 maintains the staff's previous views related to equity securities and excludes debt securities from its scope. The Company adopted this standard effective April 1, 2009, the results of which are disclosed in Note 2 Fair Value Measurements.

In April 2009, the FASB issued transition guidance ASC 820-10-65-4 *Fair Value Measurement and Disclosure—Overall—Transition Related to FASB FSP SFAS No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, the provisions of which have been incorporated in ASC

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

820-10-35-51 *Fair Value Measurement and Disclosure—Overall—Subsequent Measurement—Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. ASC 820-10-35-51 provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased and includes guidance on identifying circumstances that indicate a transaction is not orderly. ASC 820-10-35-51 emphasizes that even if there has been a significant decrease in the volume and level of activity for the asset or liability and regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. This guidance is effective for interim and annual periods ending after June 15, 2009. The Company adopted this standard effective April 1, 2009, the results of which are disclosed in Note 2 Fair Value Measurements.

In December 2007, the FASB issued transition guidance ASC 805-10-65-1 *Business Combinations—Overall—Transition Related to SFAS No. 141 (revised 2007), Business Combinations (SFAS 141(R)) and SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment of Accounting Review Bulletin (“ARB”) No. 51 (SFAS 160)*, the provisions of which have been incorporated in ASC 805-10 *Business Combinations—Overall* and ASC 805-20 *Business Combinations—Identifiable Assets and Liabilities, and Any Noncontrolling Interest*. ASC 805-10 will significantly change current practices regarding business combinations. Among the more significant changes, ASC 805-10 expands the definition of a business and a business combination; requires the acquirer to recognize the assets acquired, liabilities assumed and noncontrolling interests (including goodwill), measured at fair value at the acquisition date; requires acquisition-related expenses and restructuring costs to be recognized separately from the business combination; requires assets acquired and liabilities assumed from contractual and non-contractual contingencies to be recognized at their acquisition-date fair values with subsequent changes recognized in earnings; and requires in-process research and development to be capitalized at fair value as an indefinite-lived intangible asset. ASC 805-20 will change the accounting and reporting for minority interests, reporting them as equity separate from the parent entity’s equity, as well as requiring expanded disclosures. ASC 805-10 and ASC 805-20 are effective for financial statements issued for fiscal years beginning after December 15, 2008. The adoption of ASC 805-10 and ASC 805-20 did not have a significant impact on the Company’s consolidated financial statements or financial position, but the nature and magnitude of the specific effects will depend upon the nature, terms and size of the acquisitions, if any, the Company completes after the effective date.

In May 2009, the FASB issued ASC 855, *Subsequent Events*. The objective of this guidance is to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In particular, this guidance sets forth:

- 1) The period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements;
- 2) The circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements; and
- 3) The disclosures that an entity should make about events or transactions that occurred after the balance sheet date.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In accordance with this guidance, an entity should apply the requirements to interim or annual financial periods ending after June 15, 2009. The Company adopted this standard effective April 1, 2009 and has and will make the appropriate disclosures, as required.

In June 2009, the FASB issued transition guidance ASC 105-10-65-1, *Transition Related to SFAS No. 168, The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles*, the guidance of which was incorporated in ASC 105-10 *Generally Accepted Accounting Principles (“GAAP”)—Overall*. The *FASB Accounting Standards Codification™* (Codification) will become the source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. On the effective date of this guidance, the Codification will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the Codification will become nonauthoritative. This guidance is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company adopted this standard effective July 1, 2009, and has incorporated the current codification in this Form 10-K.

2. Fair Value Measurements

The following is a schedule of the Company's cash and cash equivalents and short-term and long-term investments as of December 31, 2009 and 2008.

	Adjusted Cost and Estimated Fair Market Value as of December 31,	
	2009	2008
Cash, Cash Equivalents and Investments		
Cash in Banks	\$ 44,717	\$ 68,269
Government Agencies / Treasuries	104,064	8,878
Commercial Paper	—	28,041
Auction-Rate Securities backed by Student-Loan Notes	35,570	36,175
Put Right	725	1,250
Restricted Cash	—	7,360
Total Cash, Cash Equivalents and Investments	<u>\$ 185,076</u>	<u>\$ 149,973</u>
Reported as:		
Cash and Cash Equivalents	\$ 46,717	\$ 83,266
Short-term Available-for-Sale Investments	102,064	21,922
Short-term Trading Investments	16,850	—
Long-term Investments	19,445	37,425
Restricted Cash	—	7,360
Total Cash, Cash Equivalents and Investments	<u>\$ 185,076</u>	<u>\$ 149,973</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The contractual maturities of the Company's investments classified as available-for-sale or trading securities as of December 31, 2009 and 2008 is as follows:

	2009	2008
Less than 1 year	\$ 73,566	\$ 21,922
1 – 5 years	20,053	—
Greater than 5 years	44,740	37,425
	<u>\$ 138,359</u>	<u>\$ 59,347</u>

The Company adopted the provisions of ASC 820-10 *Fair Value Measurements and Disclosures—Overall*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles in the United States of America, and requires that assets and liabilities carried at fair value be classified and disclosed in one of the three categories noted below. The Company also adopted the provisions of ASC 820-10-35-51 *Fair Value Measurement and Disclosure—Overall—Subsequent Measurement—Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, effective April 1, 2009, which provides additional guidance for estimating fair value in accordance with ASC 820-10 *Fair Value Measurements and Disclosures—Overall*, when the volume and level of activity for the asset or liability have significantly decreased.

The following tables detail the fair value measurements as of December 31, 2009 and 2008 within the fair value hierarchy of the financial assets that are required to be recorded at fair value (in thousands):

	Fair Value Measurements at December 31, 2009 Using			
	Total	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
		Level 1	Level 2	Level 3
Government Agencies / Treasuries	\$104,064	\$ 104,064	\$ —	\$ —
Long-term available-for-sale auction-rate securities	19,445	—	—	19,445
Short-term trading auction-rate securities	16,125	—	—	16,125
Put right	725	—	—	725
	<u>\$140,359</u>	<u>\$ 104,064</u>	<u>\$ —</u>	<u>\$ 36,295</u>

	Fair Value Measurements at December 31, 2008 Using			
	Total	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
		Level 1	Level 2	Level 3
Commercial Paper	\$28,041	\$ 28,041	\$ —	\$ —
Government Agencies / Treasuries	8,878	8,878	—	—
Auction-rate securities	36,175	—	—	36,175
Put Right	1,250	—	—	1,250
	<u>\$74,344</u>	<u>\$ 36,919</u>	<u>\$ —</u>	<u>\$ 37,425</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

At December 31, 2009, fixed income available-for-sale securities include securities issued by government agencies and treasuries, \$102.1 million of which are classified as short-term investments and \$2.0 million which are classified as cash equivalents on the Consolidated Balance Sheet. At December 31, 2009, the Company had \$18.0 million invested in money market funds. At December 31, 2009, there was \$0.1 million in unrealized losses from these investments. The impact of gross unrealized gains and losses was not material.

At December 31, 2008, fixed income available-for-sale securities include securities issued by government agencies and treasuries and commercial paper, \$21.9 million of which are classified as short-term investments and the remainder of which is classified as cash and cash equivalents on the Consolidated Balance Sheet. At December 31, 2008, we had \$45.0 million invested in money market funds. At December 31, 2008, there was an immaterial amount of unrealized gains and losses from these investments.

The face value of our holdings in auction rate securities is \$37.4 million, of which \$20.5 million is currently classified as long-term available-for-sale investments and \$16.9 million is classified as short-term trading investments. The securities that are classified as short-term trading securities have been classified as such because the Company intends to exercise its put option to sell these securities to UBS in June of 2010 (see below). These investments are accounted for in accordance with ASC 320-10, *Investments—Debt and Equity Securities—Overall*.

The Company adopted the provisions of ASC 320-10-35 *Investments—Debt and Equity Securities—Overall—Subsequent Measurement* and ASC 320-10-50 *Investments—Debt and Equity Securities—Overall—Disclosure*, effective April 1, 2009 and used the guidelines therein to determine whether the impairment on its available-for-sale securities is temporary or other-than temporary. Temporary impairment charges are recorded in accumulated other comprehensive income (loss) within stockholders' equity and have no impact on net income. Other-than-temporary impairment exists when the entity has the intent to sell the security or it will more likely than not be required to sell the security before anticipated recovery or it does not expect to recover the entire amortized cost basis of the security. Other-than-temporary impairment charges are recorded in other income (expense) in the Consolidated Statement of Operations.

The following table provides a reconciliation of the beginning and ending balances for the assets measured at fair value using significant unobservable inputs (Level 3) (in thousands):

	Auction-Rate Securities	Put Right	Total
Beginning balances as of January 1, 2008	\$ —	\$ —	\$ —
Transfer into Level 3	11,500	—	11,500
Unrealized loss	(2,650)	—	(2,650)
Purchases, sales and settlements (net)	27,325	—	27,325
Unrealized gain resulting from the valuation of the UBS put right	—	1,250	1,250
Ending balances as of December 31, 2008	<u>\$ 36,175</u>	<u>\$ 1,250</u>	<u>\$37,425</u>
Sales and Settlement	(1,400)	—	(1,400)
Unrealized Gain	270	—	270
Gain (loss) from UBS auction rate securities and put right	525	(525)	—
Ending balances at December 31, 2009	<u>\$ 35,570</u>	<u>\$ 725</u>	<u>\$36,295</u>

MONOLITHIC POWER SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company's Level 3 assets consist of government-backed student loan auction-rate securities and the UBS put right described below. The market for auction-rate securities, with interest rates that reset through a Dutch auction every 7 to 35 days became illiquid in 2008. As of December 31, 2009, the Company's investment portfolio included \$35.6 million, net of impairment charges of \$1.8 million, in government-backed student loan auction-rate securities. The portfolio also included a UBS auction-rate put right, which was valued at \$0.7 million in accordance with the fair value measurement provisions of ASC 825-10-25 *Financial Instruments—Overall—Recognition*. During the year ended December 31, 2009, auction rate securities with a face value of \$1.4 million were sold at par through successful auctions. However, the remaining auction rate securities in the portfolio with a face value of approximately \$37.4 million have failed to reset through successful auctions and it is unclear as to when these investments will regain their liquidity. The underlying maturity of these auction-rate securities is up to 38 years and the underlying credit quality of these instruments in which the Company has invested remain generally AAA rated, with \$12.1 million in auction rate securities having been downgraded by Moody's to Aa1-Baa3.

In October 2008, the Company accepted an offer to participate in an auction-rate security rights offering from UBS to sell up to \$18.2 million in face value of eligible auction-rate securities commencing in June 2010. Since then, \$1.3 million of these auction-rate securities were called at par, leaving \$16.9 million in eligible auction-rate securities remaining at UBS. The offer gives the Company the right but not the obligation to sell these securities at par to UBS and allows the Company to borrow up to \$16.9 million, if needed. In accepting the offer, the Company also entered into a release of claims in favor of UBS.

Since the Company accepted this put right from UBS in October 2008, the Company classified these as trading securities, and as such, intends to sell these auction-rate securities at par to UBS commencing in June 2010. The cumulative impairment related to these auction-rate securities was \$0.7 million and \$1.3 million at December 31, 2009 and 2008, respectively. These were recorded in accordance with the provisions of ASC 320-10-35 and ASC 320-10-50 in other income (expense) in the Consolidated Statement of Operations.

Having accepted UBS' rights offering and elected the fair value option under ASC 820-10-35, the Company valued the resulting put right at fair value which was estimated to be equal to the par value of the auction-rate securities less their fair value as determined by management. The value of the put right was \$0.7 million and \$1.3 million, at December 31, 2009 and 2008, respectively, the effect of which has been recorded by the Company in other income (expense) in the Consolidated Statement of Operations.

For the remaining auction-rate securities for which the put right (described above) does not apply, and which have a face value of \$20.5 million and \$20.6 million as of December 31, 2009 and 2008, respectively, management concluded that as of December 31, 2009 and 2008, the cumulative impairment of \$1.1 million and \$1.4 million, respectively, was temporary based on the following analysis:

- The decline in the fair value of these securities is not largely attributable to adverse conditions specifically related to these securities or to specific conditions in an industry or in a geographic area;
- Management possesses both the intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in fair value;

MONOLITHIC POWER SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

- ☒ Management believes that it is more likely than not that the Company will not have to sell these securities before recovery of its cost basis;
- ☒ Except for the credit loss of \$70,000 recognized during the year ended December 31, 2009 for the Company's holdings in auction rate securities described below, the Company does not believe that there is any additional credit loss associated with other auction-rate securities because the Company expects to recover the entire amortized cost basis;
- ☒ All securities were AAA rated at December 31, 2008. The majority of the securities remain AAA rated, with \$9.0 million of the auction rate securities having been downgraded by Moody's to A3-Baa3, during the year ended December 31, 2009 and there have been no downgrades in the three months ended December 31, 2009; and
- ☒ All scheduled interest payments have been made pursuant to the reset terms and conditions.

Based on the guidance of ASC 320-10-35 and ASC 320-10-50, the Company evaluated the potential credit loss of each of the auction-rate securities for which a put right was not provided. Based on such analysis, the Company determined that those securities that are not 100% FFELPS guaranteed are potentially subject to credit risks based on the extent to which the underlying debt is collateralized and the security-specific student-loan default rates. MPS' portfolio includes three such securities, one of which has a senior parity ratio of approximately 115%, which is substantially above the expected student-loan default rate for that security. Conversely, the senior parity ratio for the other two securities is approximately 105%. If, therefore, the student-loan default rate and borrowing rate for these issuers increases, the remaining balance in these trusts may not be sufficient to cover the senior debt. The Company therefore concluded that there is potential credit risk for these two securities and as such, used the discounted cash flow model to determine the amount of credit loss to be recorded. In valuing the potential credit loss, the following parameters were used: 20 year expected term, cash flows based on the 90-day t-bill rates for 20 year forwards and a risk premium of 5.9%, the amount of interest that the Company was receiving on these securities when the market was last active. The amount of potential credit loss was limited by the amount of security that is not FFELPS guaranteed. The potential credit loss associated with these securities was \$70,000, which the Company deemed other-than-temporarily impaired and recorded in other expense in its Consolidated Statement of Operations during the year ended December 31, 2009.

Unless another rights offering or other similar offers are made to redeem at par and accepted by the Company, the Company intends to hold the balance of these investments through successful auctions at par, which the Company believes could take approximately 2.0 years.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The valuation of the auction-rate securities is subject to fluctuations in the future, which will depend on many factors, including the collateral quality, potential to be called or restructured, underlying final maturity, insurance guaranty, liquidity and market conditions, among others. To determine the fair value of the auction-rate securities at December 31, 2009, September 30, 2009, June 30, 2009, March 31, 2009 and December 31, 2008, the Company used a discounted cash flow model, for which there are three valuation parameters, including time-to-liquidity, discount rate and expected return. The following are the values used in the discounted cash flow model:

	December 31, 2008	March 31, 2009	June 30, 2009	September 30, 2009	December 31, 2009
Time-to-Liquidity	18 months	24 months	21 months	24 months	24 months
Expected Return (Based on the requisite treasury rate, plus a contractual penalty rate)	2.3%	1.6%	2.1%	2.1%	2.4%
Discount Rate (Based on the requisite LIBOR, the cost of debt and a liquidity risk premium)	6.8%	5.5% – 8.5%, depending on the credit-rating of the security	5.3% – 10.1%, depending on the credit-rating of the security	4.8% – 9.6%, depending on the credit-rating of the security	5.2% – 10.0%, depending on the credit-rating of the security

The gross accumulated impairment charge was \$1.8 million as of December 31, 2009, of which \$1.1 million was recorded as temporary and the remaining \$0.7 million was recorded as other-than-temporary. The gross accumulated impairment charge was \$2.7 million as of December 31, 2008, of which \$1.4 million was recorded as temporary and the remaining \$1.3 million was recorded as other-than-temporary.

If the auctions continue to fail, the liquidity of the Company's investment portfolio may be negatively impacted and the value of its investment portfolio could decline.

3. Inventories

Inventories consist of the following (in thousands):

	December 31,	
	2009	2008
Work in progress	\$ 11,082	\$ 10,653
Finished goods	8,534	8,234
Total inventories	<u>\$ 19,616</u>	<u>\$ 18,887</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

4. Property and Equipment, net

Property and equipment consist of the following (in thousands):

	December 31,	
	2009	2008
Computers, software and equipment	\$ 33,716	\$ 27,622
Leasehold improvements	4,894	1,778
Vehicles	657	329
Building	459	—
Furniture and fixtures	355	355
Total	40,081	30,084
Less accumulated depreciation and amortization	(22,113)	(15,921)
Property and equipment, net	<u>\$ 17,968</u>	<u>\$ 14,163</u>

Depreciation expense for the years ended December 31, 2009, 2008 and 2007 was \$6.6 million, \$5.7 million and \$4.2 million, respectively.

5. Accrued Liabilities

Accrued liabilities consist of the following (in thousands):

	December 31,	
	2009	2008
Legal expenses and settlement costs	\$ 2,940	\$ 8,791
Deferred revenue and customer prepayments	2,109	841
Warranty (see Note 9)	294	764
Professional fees	24	66
Other	2,314	2,898
Total accrued liabilities	<u>\$ 7,681</u>	<u>\$ 13,360</u>

6. Stockholders' Equity

The Company has two stock option plans and an employee stock purchase plan—the 1998 Stock Option Plan, the 2004 Equity Incentive Plan and the 2004 Employee Stock Purchase Plan. The Company recognized stock-based compensation expenses for the years ended December 31, 2009, 2008 and 2007, as follows (in thousands):

	Year ended December 31,		
	2009	2008	2007
Non-Employee	\$ 118	\$ 42	\$ 98
ESPP	671	676	600
Restricted Stock	3,353	3,054	1,844
Stock Options	10,469	9,386	8,686
TOTAL	<u>\$ 14,611</u>	<u>\$ 13,158</u>	<u>\$ 11,228</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

1998 Stock Option Plan

Under the Company's 1998 Stock Option Plan (the 1998 Plan), the Company reserved 11,807,024 shares of common stock for issuance to the Company's employees, directors and consultants. Options granted under the 1998 Plan have a maximum term of ten years and generally vest over four years at the rate of 25 percent one year from the date of grant and 1/48th monthly thereafter. On November 19, 2004, the effective date of the Company's initial public offering, the 1998 Plan was terminated for future grants and the remaining 1,392,750 shares available for grant were moved to the Company's 2004 Equity Incentive Plan (the 2004 Plan). In addition, throughout the year, shares underlying options from the 1998 Plan that are cancelled (for example, upon termination of service) are transferred to the 2004 Plan based on the number of cancellations that occur throughout the year.

2004 Equity Incentive Plan

The Company's Board of Directors adopted the Company's 2004 Equity Incentive Plan in March 2004, and the Company's stockholders approved it in November 2004. Options granted under the 2004 Plan have a maximum term of ten years. New hire grants generally vest over four years at the rate of 25 percent one year from the date of grant and 1/48th monthly thereafter. Refresh grants generally vest over four years at the rate of 50 percent two years from the date of grant and 1/48th monthly thereafter. There were 800,000 shares initially reserved for issuance under the 2004 Plan. The 2004 Plan provides for annual increases in the number of shares available for issuance beginning on January 1, 2005 equal to the least of: 5% of the outstanding shares of common stock on the first day of the year, 2,400,000 shares, or a number of shares determined by the Board of Directors. The following is a summary of the 2004 Plan, which includes stock options and restricted stock awards and units:

Available for Grant as of December 31, 2008	813,601
2009 Additions to Plan	1,682,341
2009 Grants	(760,200)
2009 Cancellations	288,201
Available for Grant as of December 31, 2009	<u>2,023,943</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

A summary of the status of the Company's stock option plans at December 31, 2009, 2008 and 2007 and changes therein are presented in the table below:

	Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at December 31, 2006 (4,576,160 options exercisable at a weighted-average exercise price of \$4.82 per share)	9,078,195	\$ 7.77	7.21	\$37,698,914
Options granted (weighted-average fair value of \$7.21 per share)	1,537,400	17.02		
Options exercised	(2,902,927)	5.39		
Options forfeited and expired	(269,862)	10.82		
Outstanding at December 31, 2007 (3,722,936 options exercisable at a weighted-average exercise price of \$6.94 per share)	7,442,806	\$ 10.50	6.64	\$81,762,963

	<u>7,410,914</u>			<u>4,112,763</u>	

The total fair value of options that vested was \$10.5 million, \$9.4 million and \$8.7 million, respectively, for the years ended December 31, 2009, 2008 and 2007. Total intrinsic value of options exercised was \$15.0 million, \$20.5 million and \$36.3 million, respectively, for the years ended December 31, 2009, 2008 and 2007. Net cash proceeds from the exercise of stock options were \$11.2 million for the year ended December 31, 2009. At December 31, 2009, unamortized compensation expense related to unvested options was approximately \$15.2 million. The weighted average period over which compensation expense related to these unvested options will be recognized is approximately 2.4 years.

The employee stock-based compensation expense recognized under ASC 718-10-30 *Compensation—Stock Compensation—Overall—Initial Measurement*, was determined using the Black-Scholes option pricing model. Option pricing models require the input of subjective assumptions and these assumptions can vary over time. The Company used the following weighted-average assumptions to determine the fair value of the awards granted during the respective periods:

	Year ended December 31,		
	2009	2008	2007
Expected term (years)	4.1	4.1	4.4
Expected volatility	60.7%	40.1%	44.9%
Risk-free interest rate	1.8%	2.6%	4.6%
Dividend yield	—	—	—

In estimating the expected term, the Company considered its historical stock option exercise experience, post vesting cancellations and remaining contractual term of the options outstanding. The estimated expected volatility included the historical stock prices of MPS and companies similar to MPS, as the Company does not have sufficient historical data as a public company to determine reasonable estimates. MPS considered companies of similar size, industry and financial structure to devise its estimate. The Company uses the U.S. Treasury yield for its risk-free interest rate and a dividend yield of zero as it does not issue dividends. The Company applies a forfeiture rate that is based on options that have been forfeited historically.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Restricted Stock

A portion of the Company's shares of common stock were issued under restricted stock purchase agreements. Under these agreements, in the event of a termination of an employee, the Company has the right to repurchase the common stock at the original issuance price of \$0.001. The repurchase right expires over a 4-year period. A summary of our restricted stock awards is presented in the table below:

	Restricted Stock Awards	Weighted Average Grant Date Fair Value Per Share	Weighted Average Remaining Recognition Period (Years)
Outstanding at December 31, 2006	301,486	\$ 10.54	1.32
Awards granted	—	—	
Awards released	(98,086)	10.12	
Awards forfeited	(27,861)	9.99	
Outstanding at December 31, 2007	175,539	\$ 10.86	1.31
Awards granted	—	—	
Awards released	(88,576)	10.53	
Awards forfeited	(16,586)	9.62	
Outstanding at December 31, 2008	70,377	\$ 11.55	0.48
Awards granted	—	—	
Awards released	(57,577)	11.29	
Awards forfeited	(6,250)	8.64	
Outstanding at December 31, 2009	6,550	\$ 16.62	0.14

The Company also grants restricted stock units, which vest generally over two to four years as determined by the Company's Compensation Committee, and are issued upon vesting. A summary of the restricted stock units is presented in the table below:

	Restricted Stock Units	Weighted Average Grant Date Fair Value Per Share	Weighted Average Remaining Recognition Period (Years)
Outstanding at December 31, 2006	60,000	\$ 11.85	1.82
Awards granted	152,500	16.75	
Awards released	(30,000)	11.85	
Awards forfeited	—	—	
Outstanding at December 31, 2007	182,500	\$ 15.37	1.91

Outstanding at December 31, 2008	389,643	\$ 18.11	2.72
Awards granted	54,200	20.93	
Awards released	(146,447)	18.11	
Awards forfeited	(7,500)	16.66	
Outstanding at December 31, 2009	289,896	\$ 18.67	2.22

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The total fair value of restricted stock awards and units that vested was \$2.7 million, \$3.0 million and \$1.8 million for the years ended December 31, 2009, 2008 and 2007, respectively. The intrinsic value related to restricted stock awards and units released for the years ended 2009, 2008 and 2007 was \$3.8 million, \$3.4 million and \$2.2 million, respectively. The total intrinsic value of restricted awards and units outstanding at December 31, 2009, 2008 and 2007 were \$7.1 million, \$5.8 million and \$7.7 million, respectively. At December 31, 2009, unamortized compensation expense related to unvested restricted stock awards and units was approximately \$3.5 million with a weighted average remaining recognition period of 2.2 years.

2004 Employee Stock Purchase Plan

Under the 2004 Employee Stock Purchase Plan (the Purchase Plan), eligible employees may purchase common stock through payroll deductions. Participants may not purchase more than 2,000 shares in a six-month offering period or stock having a value greater than \$25,000 in any calendar year as measured at the beginning of the offering period in accordance with the Internal Revenue Code and applicable Treasury Regulations. A total of 200,000 shares of common stock were reserved for issuance under the Purchase Plan. The Purchase Plan provides for an automatic annual increase beginning on January 1, 2005 by an amount equal to the least of 1,000,000 shares; 2% of the outstanding shares of common stock on the first day of the year; or a number of shares as determined by the Board of Directors. For the years ended December 31, 2009, 2008 and 2007, 161,026 shares, 125,207 shares and 180,148 shares, respectively, were issued under the Purchase Plan. The following is a summary of the Purchase Plan and changes during the year ended December 31, 2009:

Available Shares as of December 31, 2008	2,041,102
2009 Additions to Plan	672,936
2009 Purchases	<u>(161,026)</u>
Available Shares as of December 31, 2009	<u>2,553,012</u>

The Purchase Plan is considered compensatory under ASC 718-50-25-2 *Compensation—Stock Compensation—Employee Share Purchase Plans—Recognition*, and is accounted for in accordance with ASC 718-50-30-2 *Compensation—Stock Compensation—Employee Share Purchase Plans—Initial Measurements—Look-Back Plans*. The intrinsic value for stock purchased was \$1.0 million, \$0.8 million and \$1.2 million for the years ended December 31, 2009, 2008 and 2007, respectively. The unamortized expense as of December 31, 2009 was \$0.1 million, which will be recognized over 0.1 years. The Black-Scholes option pricing model was used to value the employee stock purchase rights. For the years ended December 31, 2009, 2008 and 2007, the following assumptions were used in the valuation of the stock purchase rights:

	Year ended December 31,		
	2009	2008	2007
Expected term (years)	0.5	0.5	0.5
Expected volatility	79.8%	48.3%	45.2%
Risk-free interest rate	0.4%	2.0%	5.1%
Dividend yield	—	—	—

Cash proceeds from employee stock purchases for the year ended December 31, 2009 and 2008 was \$1.8 million, respectively.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

7. Net Income Per Share

Basic net income per share excludes dilution and is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted net income per share is calculated using the treasury stock method and reflects the potential dilution that would occur if outstanding securities or other contracts to issue common stock were exercised or converted into common stock. For the years ended December 31, 2009, 2008 and 2007, the Company had securities outstanding, which could potentially dilute basic net income per share in the future, but were excluded from the computation of diluted net loss per share in the periods presented, as their effect would have been anti-dilutive. The following table shows the number of shares of common stock issuable upon conversion or exercise of such outstanding securities:

	Year ended December 31,		
	2009	2008	2007
Stock Options	2,897,202	3,241,066	2,392,236

8. Income Taxes

The components of income before income taxes for the years ended December 31, 2009, 2008 and 2007 are (in thousands):

	2009	2008	2007
United States	\$ 6,303	\$ 5,540	\$ (13,589)
International	13,845	19,902	27,861
Consolidated	<u>\$ 20,148</u>	<u>\$ 25,442</u>	<u>\$ 14,272</u>

Federal income taxes have not been provided for the unremitted earnings of foreign subsidiaries totaling \$56.0 million because such earnings are intended to be permanently reinvested.

The income tax provision consists of the following (in thousands):

	Year ended December 31,		
	2009	2008	2007
Current:			
Federal	\$ 344	\$ (643)	\$ 431
State	70	67	1
Foreign	147	1,082	271
Deferred:			
Federal	315	(1,245)	(3,551)
State	(688)	(490)	(1,701)
Foreign	(85)	(47)	(71)
Valuation allowance	371	2,492	7,312
Income tax provision	<u>\$ 474</u>	<u>\$ 1,216</u>	<u>\$ 2,692</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The effective tax rate differs from the applicable U.S. statutory federal income tax rate as follows:

	December 31,		
	2009	2008	2007
U.S. statutory federal tax rate	34.0%	34.0%	34.0%
State taxes, net of federal benefit	0.1	0.6	5.8
Research and development credits	(0.9)	(2.7)	(15.2)
Stock compensation	8.6	6.3	12.0
Foreign income taxed at lower rates	(33.3)	(35.7)	(76.3)
Subpart F / Inventory transfer	—	0.3	1.2
Decrease of prior year FIN 48 liabilities	—	(4.4)	—
Change in valuation allowance on federal timing differences	(6.0)	5.2	52.0
Litigation reserves & Other	(0.1)	1.2	5.3
Effective tax rate	<u>2.4%</u>	<u>4.8%</u>	<u>18.8%</u>

The components of deferred tax assets and liabilities consist of the following (in thousands):

	December 31,	
	2009	2008
Deferred tax assets:		
Research tax credits	\$ 5,982	\$ 4,189
Stock compensation	6,249	5,095
Other costs not currently deductible	1,592	4,636
Depreciation and amortization	969	530
Total deferred tax assets	14,792	14,450
Valuation allowance	(14,614)	(14,356)
Net deferred tax assets	<u>178</u>	<u>94</u>
Deferred tax liabilities:		
Depreciation and amortization	—	—
Total deferred tax liabilities	—	—
Net deferred tax assets	<u>\$ 178</u>	<u>\$ 94</u>

As of December 31, 2009, the federal and state net operating loss carryforwards for income tax purposes were approximately \$11.0 million and \$28.4 million, respectively. The federal net operating loss carryforwards will begin to expire in 2027 and the State net operating losses will expire in 2017. \$11.0 million of the federal net operating loss and \$25.0 million of the state operating loss are related to excess tax benefit as a result of stock option exercises, and therefore will be recorded in additional paid-in-capital in the period that they become realized.

As of December 31, 2009, the Company had research tax credit carryforwards of \$8.0 million for federal income tax purposes, which will begin to expire in 2021 and \$6.9 million for state income tax purposes, which can be carried forward indefinitely. \$2.0 million of the federal research tax credit and \$0.2 million of the state research tax credit carryovers are related to excess tax benefit as a result of stock option exercises, and therefore will be recorded in additional-paid-in-capital in the period that they become realized.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

ASC 740-10 *Income Taxes—Overall* sets forth the accounting for uncertainty in income taxes recognized in an entity's financial statements and prescribes a recognition threshold and measurement attributes for financial statement disclosure of tax positions taken or expected to be taken on a tax return. Under ASC 740-10, the impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant taxing authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Additionally, ASC 740-10 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

At December 31, 2008, the Company had \$8.6 million of unrecognized tax benefits, \$4.8 million of which would affect its effective tax rate if recognized. At December 31, 2009, the Company had \$9.0 million of unrecognized tax benefits, \$4.9 million of which would affect its effective tax rate if recognized.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Balance at January 1, 2007	\$ 5,297
Gross increase for tax positions of prior years	113
Gross increases for tax positions of current year	<u>2,500</u>
Balance at December 31, 2007	\$ 7,910
Gross increases for tax positions of prior year	96
Gross increases for tax position of current year	1,794
Reductions for prior year tax positions	(1,245)
Reduction due to statutes expiring	<u>(2)</u>
Balance at December 31, 2008	\$ 8,553
Gross increases for tax positions of prior year	—
Gross increases for tax position of current year	1,080
Reductions for prior year tax positions	—
Settlement	(615)
Reduction due to statutes expiring	<u>(12)</u>
Balance at December 31, 2009	<u>\$ 9,006</u>

The Company recognizes interest and penalties, if any, related to uncertain tax positions in its income tax provision. At December 31, 2007, 2008 and 2009, the Company has approximately \$0.3 million, \$0.4 million and \$0.5 million respectively, of accrued interest related to uncertain tax positions.

Uncertain tax positions relate to the allocation of income and deductions among the Company's global entities and to the determination of the research and experimental tax credit. The Company estimates that there will be no material changes in its uncertain tax positions in the next 12 months.

The Company files income tax returns in the U.S. federal jurisdiction, and various U.S. states and foreign jurisdictions. Generally, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years prior to 2004 because of the statute of limitations.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

9. Commitments and Contingencies

The following table summarizes the Company's commitments as of December 31, 2009 (in thousands).

	Payments by Period						
	Total	2010	2011	2012	2013	2014	Thereafter
Operating leases	\$ 8,278	\$ 1,432	\$ 1,213	\$ 1,080	\$ 1,124	\$ 1,168	\$ 2,261
Outstanding purchase commitments	\$ 13,214	\$ 13,214	\$ —	\$ —	\$ —	\$ —	\$ —
	<u>\$ 21,492</u>	<u>\$ 14,646</u>	<u>\$ 1,213</u>	<u>\$ 1,080</u>	<u>\$ 1,124</u>	<u>\$ 1,168</u>	<u>\$ 2,261</u>

Lease Obligations

In December 2006, the Company relocated its corporate headquarters from Los Gatos, California to San Jose, California and wrote off the fair value of the Los Gatos lease in the amount of \$1.3 million, of which \$0.1 million was recorded in cost of revenue and \$1.2 million was recorded in operating expenses. In May 2007, the Company entered into a sublease agreement to rent a portion of its Los Gatos property for a period of 21 months commencing on June 1, 2007 during which the Company is to receive gross payments of \$0.7 million. As the amount the Company expects to receive was greater than the amount the Company originally estimated, the Company reduced the estimate of its remaining liability by \$0.5 million in the second quarter of 2007. The Company leases its headquarters and sales offices in San Jose, California under a non-cancelable operating lease which expires in October 2016. In addition, the Company entered into a five-year lease arrangement in September 2004 for its manufacturing facility located in Chengdu, China, which will expire in March 2011 and with an option to purchase the facility at the end of the lease term as discussed in the next section. The Company also leases its sales offices in Japan, China, Taiwan and Korea. Certain of the Company's facility leases provide for periodic rent increases. Rent expense for the years ended December 31, 2009, 2008 and 2007 was \$1.3 million, \$1.1 million and \$0.4 million (net of \$0.5 million of benefit discussed above), respectively.

Chengdu, China Commitment

In September 2004, the Company signed an agreement with a Chinese local authority to construct a facility in Chengdu, China, initially for the testing of its ICs. Pursuant to this agreement, the Company contributed capital in the form of cash, in-kind assets, and/or intellectual property, of at least \$5.0 million to its wholly-owned Chinese subsidiary as the registered capital for the subsidiary and exercised the option to purchase land use rights for the facility of approximately \$0.2 million. The Company also has the option to acquire the facility after a five-year lease term for the original construction cost less rents paid, which is currently estimated at \$2.0 million, which option becomes exercisable in March 2011. The Company will likely enter into a purchase agreement for this facility at the end of the lease term.

The Company is currently in the process of constructing a 140,000 square foot research and development facility in Chengdu, China which will be operational in mid-2010 and for which the Company has outstanding purchase commitments, which are included in Outstanding Purchases Commitments in the table above.

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Warranty and Indemnification Provisions

The Company provides a standard one-year warranty against defects in materials and workmanship and will either repair the goods, provide replacements at no charge to the customer, or refund amounts for defective units. On occasion the Company permits the return of defective products outside the normal warranty period. In such cases, the Company accrues for the related costs at the time the decision to permit the return is made. Reserve requirements are recorded in the period of sale and are based on an assessment of the products sold with warranty and historical warranty costs incurred.

The changes in warranty reserves during 2009, 2008 and 2007 are as follows (in thousands):

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Balance at beginning of year	\$ 764	\$1,025	\$1,038
Warranty costs	(137)	(109)	(243)
Reserve adjustments and unused warranty provision	(728)	(724)	—
Warranty provision for product sales	395	572	230
Balance at end of year	<u>\$ 294</u>	<u>\$ 764</u>	<u>\$1,025</u>

The Company provides indemnification agreements to a supplier and certain direct or indirect customers. The Company agrees to reimburse these parties for any damages, costs and expenses incurred by them as a result of legal actions taken against them by third parties for infringing upon their intellectual property rights as a result of using the Company's products and technologies. These indemnification provisions are varied in their scope and are subject to certain terms, conditions, limitations and exclusions. Such costs were \$0.5 million for the years ended December 31, 2007 and \$1.0 million for the year ended December 31, 2009. There were no indemnification costs in 2008. These costs are charged to operations as incurred. The Company also provides for indemnification of its directors and officers.

10. Litigation**Chip Advanced Technology Inc.**

On December 12, 2007, the Company filed a patent infringement lawsuit in the U.S. District Court for the Central District of California against Chip Advanced Technology Inc. ("CAT"), asserting that CAT willfully infringed a MPS patent that enables efficient low voltage, low current power conversions, such as DC-DC step down converters. CAT was subsequently acquired by ITE Technology ("ITE"), which became a successor in interest to CAT. On July 28, 2009, the Company entered into a license agreement and a settlement agreement with ITE in which the parties agreed to mutually release and dismiss the complaints.

O2Micro

The Company has been engaged in a number of legal proceedings involving patent infringement claims with O2Micro, Inc. and its parent corporation, O2Micro International Limited (referred to hereinafter as "O2Micro"). Currently there are two proceedings pending, both involving O2 Micro's U.S. Patent No. 7,417,382 ('382 patent). One proceeding is pending in the International Trade Commission. The other is pending in the United States District Court for the Northern District of California. O2 Micro alleges that certain of the Company's CCFL backlight inverter products infringe its patents. The

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Company alleges that it does not infringe and the patent is invalid. The ITC Investigation was held on October 19, 2009. Trial in the Northern District of California case is scheduled for August 2, 2010. The Company is not able to reasonably estimate the probability of loss or the range of possible loss in this case.

Taiwan Sumida Electronics

During the quarter ended September 30, 2009, the Company completed the litigation process with respect to a lawsuit related to Taiwan Sumida Electronics ("TSE"), a customer. In connection with the completion of this lawsuit, the Company also jointly terminated an escrow agreement with TSE and retrieved a deposit of \$7.4 million. The escrow termination resulted in recording a reversal of a litigation provision of approximately \$7.4 million during the quarter ended September 30, 2009. This provision was recorded as a litigation provision in the second quarter of 2007 and the reversal of this provision in the quarter ended September 30, 2009 is reflected in the Patent Litigation Provision Reversal, net item in the Consolidated Statement of Operations.

Linear Technology Corporation

On July 1, 2008, the United States District Court for the District of Delaware held as a matter of law that the Company did not breach its October 1, 2005 Settlement and License Agreement with Linear Technology Corporation ("Linear"). Based upon that ruling, the Company anticipates filing a motion to seek recovery of its attorney fees when the final judgment is entered. The court has not issued its final judgment concerning the patent validity and enforceability issues.

11. Employee Benefits Plan

The Company sponsors a 401(k) savings and profit-sharing plan ("the Plan") for all employees in the United States who meet certain eligibility requirements. Participants may contribute up to the amount allowable as a deduction for federal income tax purposes. The Company is not required to contribute and did not contribute to the Plan for the years ended December 31, 2009, 2008 and 2007.

12. Major Customers

The following table summarizes the percentages of accounts receivable, net and corresponding revenue for those customers, with accounts receivable balances at year end that accounted for 10% or more of total accounts receivable, net at the end of 2009 and 2008 or with sales that accounted for 10% or more of the Company's revenue for each respective year:

Customers	Revenue			Accounts Receivable, Net	
	Year ended			as of	
	December 31,			December 31,	
	2009	2008	2007	2009	2008
A	13%	20%	18%	*	14%
B	10%	10%	15%	*	*

13. Segment Information

As defined by the requirements of ASC 280-10-55, *Segment Reporting—Overall—Implementation Guidance and Illustrations*, the Company operates in one reportable segment, the design, development, marketing and sale of high-performance, mixed-signal analog semiconductors for the computing, consumer electronics and communications markets. The Company's chief operating decision maker is its chief executive officer. The Company does not specifically allocate any of its resources to or measure the performance of, individual product families.

The Company derived a substantial majority of its revenue from sales to customers located outside North America during 2009, 2008 and 2007, with geographic revenue based on the customers' ship-to location.

The following is a summary of revenue by geographic region based on customer ship-to location for the years ended December 31, 2009, 2008 and 2007 (in thousands):

<u>Country</u>	<u>Year ended December 31,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
China	\$ 66,694	\$ 72,402	\$ 66,582
Korea	32,028	25,747	15,917
Taiwan	21,719	21,978	18,698
Europe	19,251	12,918	9,229
Japan	11,972	15,583	12,312
USA	6,106	4,330	3,612
Other	7,238	7,553	7,654
Total	<u>\$ 165,008</u>	<u>\$ 160,511</u>	<u>\$ 134,004</u>

The following is a summary of net revenue by product type for the years ended December 31, 2009, 2008 and 2007 (in thousands):

<u>Product Family</u>	<u>Year ended December 31,</u>					
	<u>2009</u>		<u>2008</u>		<u>2007</u>	
	<u>Amount</u>	<u>% of Revenue</u>	<u>Amount</u>	<u>% of Revenue</u>	<u>Amount</u>	<u>% of Revenue</u>
DC to DC Converters	\$123,581	74.9%	\$115,373	71.9%	\$ 86,701	64.7%
LCD Backlight Inverters	27,836	16.9%	32,308	20.1%	35,713	26.7%
Audio Amplifiers	13,591	8.2%	12,830	8.0%	11,590	8.6%
Total	<u>\$165,008</u>	<u>100.0%</u>	<u>\$160,511</u>	<u>100.0%</u>	<u>\$134,004</u>	<u>100.0%</u>

MONOLITHIC POWER SYSTEMS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following is a summary of long-lived assets by geographic region, excluding restricted assets, as of December 31, 2009 and 2008 (in thousands):

	December 31,	
	2009	2008
China	\$ 15,440	\$ 10,470
United States	2,484	3,646
Taiwan	75	103
Japan	75	31
Other	34	41
TOTAL	\$ 18,108	\$ 14,291

14. Valuation and Qualifying Accounts

The Company had the following activity in its accounts receivable allowances (in thousands):

	Accounts Receivable Allowances
Balance, December 31, 2006	\$ 227
Balance, December 31, 2007	227
Deductions	(227)
Balance, December 31, 2008	—
Charged to expenses	8
Deductions	(8)
Balance, December 31, 2009	\$ —

15. Stock Repurchase Program

On February 5, 2008, the Company announced that its Board of Directors approved a stock repurchase program that authorized the Company to repurchase up to \$25.0 million of its common stock through the end of 2008. As of December 31, 2008, the following shares had been repurchased through the open market and subsequently retired:

2008 Calendar Year	Shares Repurchased	Average Price per Share	Value (in thousands)
February	27,500	\$ 16.88	\$ 464
March	527,332	\$ 17.12	\$ 9,028
April	201,863	\$ 20.03	\$ 4,043
May	100	\$ 21.98	\$ 2
June	18,000	\$ 21.66	\$ 390
July	14,155	\$ 21.86	\$ 309
August	100	\$ 22.03	\$ 2
September	307,355	\$ 18.82	\$ 5,784
October	333,700	\$ 15.05	\$ 5,021
Total Shares Repurchased	1,430,105		\$ 25,043

There were no shares repurchased in 2009.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934 as of the end of the period covered by this Annual Report on Form 10-K. Our disclosure controls and procedures have been designed to ensure that material information relating to us, including our consolidated subsidiaries, required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on our evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective at December 31, 2009 and provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control over Financial Reporting

Our management, including our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) and Rule 15d-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external purposes in accordance with generally accepted accounting principles ("GAAP").

Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are made only in accordance with authorizations of our management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

A deficiency in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly

[Table of Contents](#)

designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed, or when the person performing the control does not possess the necessary authority or competence to perform the control effectively. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Our management, including our Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of December 31, 2009. In performing this assessment, management used the criteria established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—An Integrated Framework. Based upon this assessment, our management has concluded that, as of December 31, 2009, our internal control over financial reporting was effective.

Our independent registered public accounting firm, Deloitte & Touche LLP, which audited the consolidated financial statements included in this annual report on Form 10-K, has issued an attestation report, included elsewhere herein, on the effectiveness of our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

While our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance that their respective objectives will be met, we do not expect that our disclosure controls and procedures or our internal control over financial reporting are or will be capable of preventing or detecting all errors and all fraud. Any control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2009 that have materially affected or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Reference is made to the information regarding directors and nominees, code of ethics, corporate governance matters and disclosure relating to compliance with Section 16(a) of the Securities Exchange Act of 1934 appearing under the captions "Election of Directors" and "Compliance with Section 16(a) Beneficial Ownership Reporting Compliance" in our Proxy Statement for our Annual Meeting of Stockholders to be held on June 10, 2010, which information is incorporated in this Form 10-K by reference. Information regarding executive officers is set forth under the caption "Executive Officers of the Registrant" in Part I of this Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is set forth under "Executive Officer Compensation" in our Proxy Statement for the 2010 Annual Meeting of Stockholders, and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is set forth under the captions "Security Ownership of Certain Beneficial Owners and Management" and "Equity Compensation Plan Information" in our Proxy Statement for the 2010 Annual Meeting of Stockholders, and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is set forth under the captions "Certain Relationships and Related Transactions" and "Election of Directors" in our Proxy Statement for the 2010 Annual Meeting of Stockholders, and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this item is set forth under the caption "Accounting Fees" in our Proxy Statement for the 2010 Annual Meeting of Stockholders, and is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES.

(a) Documents filed as part of this report

(1) All financial statements

Index to Financial Statements
Report of Independent Registered Public Accounting Firm
Consolidated Balance Sheets
Consolidated Statements of Operations
Consolidated Statements of Stockholders' Equity
Consolidated Statements of Cash Flows
Notes to Consolidated Financial Statements

(2) Schedules

All schedules have been omitted because the required information is not present or not present in amounts sufficient to require submission of the schedules, or because the information required is included in the consolidated financial statements or notes thereto.

(3) Exhibits

The exhibits listed on the accompanying index to exhibits in Item 15(b) below are filed as part of, or hereby incorporated by reference into, this Form 10-K.

(b) Exhibits

<u>Exhibit Number</u>	<u>Description</u>

<u>/s/ JAMES C. MOYER</u> James C. Moyer	Director
<u>/s/ UMESH PADVAL</u> Umesh Padval	Director
<u>/s/ JEFF ZHOU</u> Jeff Zhou	Director

December 18, 2009

Adriana Chiocchi

Dear Adriana:

This letter confirms the agreement (this "Agreement") between you and Monolithic Power Systems, Inc. (the "Company") concerning the terms of the termination of your employment by the Company, including a post-employment consulting arrangement and certain types of separation compensation in exchange for (among other things) a general release of known and unknown claims.

1. Separation and Resignation of Offices.

(a) Your last day of employment with the Company shall be December 18, 2009 (the "Separation Date").

(b) You shall provide the Company with notice of resignation from all corporate offices and other positions (currently, Senior Vice President, Chief Legal Officer and Corporate Secretary) effective as of the Separation Date.

2. Accrued Salary, Paid Time Off and Bonus. On the Separation Date, the Company will pay you (i) all accrued salary and (ii) all accrued and unused vacation earned through the Separation Date, subject to standard payroll deductions and withholdings. You are entitled to these payments regardless of whether or not you sign this Agreement. You and the Company agree that the total amount of such accrued salary and vacation is \$21,970.97. In addition, on the Effective Date (as defined in Section 15(i) below), the Company will pay you a bonus of \$120,000, subject to standard payroll deductions and withholdings.

3. Consulting Arrangement. Effective as the Separation Date, you will become a consultant to the Company, performing such services as the Company may from time to time reasonably request. The Company will retain you as a consultant through June 30, 2010, on which date your consulting arrangements with the Company shall terminate. You will be an unpaid consultant from the Separation Date through December 31, 2009. Thereafter, the Company will pay you the sum of \$ 23,333.33 per month from January 1, 2010 through June 30, 2010. For purposes of the Company's 2004 Equity Incentive Plan (the "Plan"), you will continue to be a "Service Provider" until June 30, 2010, as that term is defined in the Plan. The period from the Separation Date until June 30, 2010 is referred to in this Agreement as the "Consulting Period". The payments set forth in this Section 3 are not dependent on the level of services the Company requests of you, and such payments shall not be terminated or reduced during the Consulting Period as long as you are not in breach of this Agreement. From the Separation Date until the end of the Consulting Period, the Company will provide you with an email address through the Company's email system, a phone extension and a voicemail box.

You will be responsible for payment of all income, payroll or other taxes in connection with the payments for your consulting arrangements.

4. Additional Bonus and Benefits. The Company will pay you an additional bonus and provide benefits to you as follows:

(a) Bonus. The Company will pay you an additional bonus of \$ 60,000 (the "Additional Bonus") at the end of the Consulting Period, if you sign the Supplemental Release (as defined in section 13 below). The Additional Bonus will be subject to standard payroll deductions and withholdings.

(b) Health Insurance. Your group insurance coverage will terminate on the Separation Date. Thereafter, to the extent provided by the federal COBRA law or, if applicable, state insurance laws, and by the Company's current group health insurance policies, you will be eligible to continue your group health plan benefits (other than the Company's Flexible Spending Account) at your own expense; provided, however, that if you elect COBRA coverage, the Company shall reimburse you for any COBRA payments you elect to make for you and your currently covered dependents through December 31, 2010 at the same coverage level currently in effect, unless and until you become eligible for insurance through another employer.

5. Accelerated Vesting of Equity Awards. On the Effective Date, the vesting of all options and other equity awards granted to you under the Plan will be accelerated so that you will be vested in that number of shares under each award which would have been vested as of June 30, 2010. During the Consulting Period you will continue to be a Service Provider under the Plan, but no additional shares shall vest on any of the awards after the Effective Date. For the avoidance of doubt, a list of all such option and other equity awards, the number of shares subject to each such award and the number of shares that will be vested as of the Effective Date is attached as Exhibit A. You agree that such awards will terminate as of the Effective Date as to any shares which are not vested as of the Effective Date. At the end of the Consulting Period, you will cease to be a Service Provider, and will have 30 days thereafter in which to exercise the vested portion of any unexercised options. You agree that the Company's agreement to retain you as a consultant, the acceleration of your vesting as of the Effective Date and the other benefits provided to you under this Agreement, are in lieu of any severance payment, accelerated vesting or other benefits to which you may be entitled under the employment agreement between you and the Company dated March 10, 2008, as amended by Amendment No. 1 thereto dated December 16, 2008 (as so amended, the "Employment Agreement"). You and the Company both acknowledge that there are no other amendments to the Employment Agreement. The agreements memorializing such option and other equity awards shall remain in full force and effect, except to the extent modified by this Agreement.

6. No Other Compensation or Benefits. You acknowledge that, except as expressly provided in this Agreement, you will not receive any additional compensation,

severance or benefits after the Separation Date whether pursuant to the Employment Agreement or otherwise

7. Noncompetition. During the Consulting Period you agree that you will not, directly or indirectly, be employed by, serve as a consultant or advisor to, serve as a member of the board of directors or other governing body of, acquire shares (or options or other rights to acquire shares) of, or prepare to do any of the foregoing for or with, any of the following companies (or any subsidiary or affiliated company of such companies): Linear Technology, Power Integration or O2 Micro. You agree that if you breach the provisions of this section, the Company will be entitled to (i) immediately terminate your consulting arrangements, including the compensation to be paid to you pursuant to section 3, cease providing any of the benefits under Section 4, including payment of the Additional Bonus and reimbursement of COBRA premiums, and (ii) recoup from you all consulting payments made to you under Section 3 during the Consulting Period.

8. Expense Reimbursements. You agree that, within ten (10) days of the Separation Date, you will submit your final documented expense reimbursement statement reflecting all business expenses you incurred through the Separation Date, if any, for which you seek reimbursement. The Company will reimburse you for these expenses within 30 days. The Company will have no obligation to reimburse you for expenses incurred by you during the Consulting Period, except to the extent authorized in advance in writing by the Company.

9. Return of Company Property. Within two weeks after the Separation Date, you agree to return, or you acknowledge that you have returned, to the Company all Company documents (and all copies thereof) and other Company property which you have had in your possession at any time, including, but not limited to, Company files, notes, drawings, records, business plans and forecasts, financial information, specifications, computer-recorded information, tangible property (including, but not limited to, computers), credit cards, entry cards, identification badges and keys; and, any materials of any kind which contain or embody any proprietary or confidential information of the Company (and all reproductions thereof).

10. Proprietary Information Obligations. Both during and after your employment you will refrain from any unauthorized use or disclosure of the Company's proprietary or confidential information or materials and you acknowledge your continuing obligations under your Employee Proprietary Information Agreement (the "Proprietary Information Agreement") not to use or disclose any confidential or proprietary information of the Company without prior written authorization from a duly authorized representative of the Company. A copy of your Proprietary Information Agreement is attached hereto as Exhibit B.

11. Confidentiality. The provisions of this Agreement shall be held in strictest confidence by you and the Company and shall not be publicized or disclosed in any manner whatsoever; *provided, however*, that: (a) you may disclose this Agreement to your immediate family; (b) the parties may disclose this Agreement in confidence to their respective attorneys,

accountants, auditors, tax preparers, and financial advisors; (c) the Company may disclose this Agreement as necessary to fulfill standard or legally required corporate reporting or disclosure requirements; and (d) the parties may disclose this Agreement insofar as such disclosure may be necessary to enforce its terms or as otherwise required by law.

12. Non-disparagement. Both you and the Company agree not to disparage the other party, and the other party's officers, directors, employees, shareholders and agents, in any manner likely to be harmful to them or their business, business reputation or personal reputation. Nothing herein prevents you and the Company from responding accurately and fully to any question, inquiry or request for information when required by legal process, provided, however, that the party receiving such request shall notify the other party within three business days of any request or demand for the receiving party to provide any such information. Exhibit C attached to this Agreement sets forth the language describing your departure from the Company to be included in the Company's Report on Form 8-K to be filed promptly following the Effective Date.

13. General Release. In exchange for the Company's agreement to retain you as a consultant, the Company's agreement to accelerate your vesting and allow you to continue as a Service Provider under the Plan during the Consulting Period and other consideration under this Agreement to which you would not otherwise be entitled, you hereby release, acquit and forever discharge the Company, its parent, affiliates and subsidiaries, and its and their respective officers, directors, agents, servants, employees, attorneys, insurers, shareholders, successors, assigns and affiliates, of and from any and all claims, liabilities, demands, causes of action, costs, expenses, attorneys fees, damages, indemnities and obligations of every kind and nature, in law, equity, or otherwise, known and unknown, suspected and unsuspected, disclosed and undisclosed, arising out of or in any way related to agreements, events, acts or conduct at any time prior to and including the execution date of this Agreement, including but not limited to:

- (a) all such claims and demands directly or indirectly arising out of or in any way connected with your employment with the Company or the termination of that employment, including any claims or rights that you may have under the Employment Agreement;
- (b) claims or demands related to salary, bonuses, commissions, stock, stock options, or any other ownership interests in the Company, vacation pay, fringe benefits, expense reimbursements, severance pay, or any other form of compensation;
- (c) claims pursuant to any federal, state or local law, statute, or cause of action including, but not limited to, the federal Civil Rights Act of 1964, as amended, including without limitation claims for attorneys' fees;
- (d) the federal Americans with Disabilities Act of 1990;

- (e) the federal Age Discrimination in Employment Act of 1967, as amended ("ADEA");
- (f) the California Fair Employment and Housing Act and all other applicable state or local laws, whether or not in California; and
- (g) tort law, contract law, wrongful discharge, discrimination, harassment, fraud, defamation, emotional distress, and breach of the implied covenant of good faith and fair dealing.

By signing this Agreement, you agree that you are giving up your rights and promising not to sue or pursue any claim or lawsuit against the Company for anything that occurred prior to the Effective Date of this Agreement, other than those claims that the law does not allow you to waive. If you break this promise, you agree to pay the Company's costs and expenses (including reasonable attorneys' fees) related to the defense of any claims.

14. Supplemental Release. As a condition to your right to receive the Additional Bonus at the conclusion of the Consulting Period, you agree to execute and deliver to the Company the supplemental release in the form attached as Exhibit D (the "Supplemental Release").

15. ADEA Waiver. You acknowledge that you are knowingly and voluntarily waiving and releasing any rights you may have under the ADEA, as amended. You also acknowledge that the consideration given for the waiver and release in the preceding paragraph hereof is in addition to anything of value to which you were already entitled. You further acknowledge that you have been advised by this writing, as required by the ADEA, that:

- (a) you have carefully read and fully understand the provisions of this Agreement;
- (b) you are, through this Agreement, releasing the Company from any and all claims you may have against it, its parent, subsidiaries, predecessors, successors, affiliates and related entities;
- (c) you have knowingly and voluntarily agreed to all of the terms set forth in the agreement;
- (d) you knowingly and voluntarily intend to be legally bound by the Agreement;
- (e) your waiver and release do not apply to any rights or claims that may arise after the Effective Date of this Agreement;

- (f) you are hereby advised that you have the right to consult with an attorney prior to executing this Agreement;
- (g) you have twenty-one (21) days to consider this Agreement (although you may choose to voluntarily execute this Agreement earlier);
- (h) you have seven (7) days following the execution of this Agreement to revoke the Agreement; and
- (i) this Agreement shall not be effective until the date upon which the revocation period has expired, which shall be the eighth day after this Agreement is executed by you, provided that the Company has also executed this Agreement by that date ("Effective Date").

16. Section 1542 Waiver. YOU UNDERSTAND THAT THIS AGREEMENT INCLUDES A RELEASE OF ALL KNOWN AND UNKNOWN CLAIMS. You acknowledge that you have read and understand Section 1542 of the California Civil Code, which reads as follows: "**A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor.**" You hereby expressly waive and relinquish all rights and benefits under that section and any comparable local or state law of any jurisdiction of similar effect with respect to your release of any known and unknown claims you may have against the Company.

17. Non-Interference With Government Proceedings. This Agreement recognizes the rights and responsibilities of government agencies to enforce the statutes that come under their jurisdiction. This Agreement is not intended to prevent you from initiating or participating in any investigation or proceeding conducted by any government agency such as the U.S. Equal Employment Opportunity Commission; provided, however, that nothing in this Section limits or affects the finality or the scope of the release of claims set forth in this Agreement. In particular (but without limitation), you acknowledge and agree that you have waived and released any claim you may have for damages based on any alleged wrongdoing and may not recover damages for yourself personally in any proceeding conducted by a government agency.

18. Warranty of Non-Assignment and No Pending Litigation. You promise and state that you have not sold or transferred any claim discussed in this Agreement to anyone and that you not filed a lawsuit, claim, or charge with any court or government agency asserting any claims that are discussed in this Agreement.

19. Arbitration. Both you and the Company agree to resolve any disputes by binding arbitration. Both you and the Company understand that that this agreement to arbitration covers all disputes that you may have against the Company or its related entities or employees, including disputes that relate to alleged breaches of this Agreement. Arbitration will be

conducted by an impartial arbitrator experienced in employment law (selected from the JAMS panel of arbitrators) in accordance with JAMS' then-current employment arbitration rules (except as otherwise provided in this agreement). Both you and the Company waive the right to institute a court action, except for requests for injunctive relief pending arbitration, and both you and the Company waive the right to a jury trial. The arbitrator's award and opinion shall be in writing and in the form typically rendered in employment arbitrations. To the maximum extent permitted by law, the parties shall be responsible for their own attorneys' fees and all other costs; however, the arbitrator may award attorneys' fees to the prevailing party at the conclusion of the proceedings, if permitted by applicable law. The arbitration shall take place in Santa Clara County, California, unless the parties agree otherwise.

20. Miscellaneous. This Agreement, including the Exhibits, constitutes the complete, final and exclusive embodiment of the entire agreement between you and the Company with regard to this subject matter. It is entered into without reliance on any promise or representation, written or oral, other than those expressly contained herein, and it supersedes any other such agreements, promises, warranties or representations, including the Employment Agreement (except for Section 11 regarding "Proprietary Information"; Section 12 regarding "Covenant Not to Solicit"; and Section 13 regarding "Tax Provisions," each of which by its express terms survives the termination of the Employment Agreement); provided, however, that (i) the terms of the agreements between you and the Company regarding the option and other equity awards shall remain in effect except as modified by this Agreement and (ii) the Indemnification Agreement between you and the Company dated October 2, 2006 shall continue in full force and effect. The provisions of such indemnification agreement shall apply to the services, if any, that you provide to the Company at the Company's request during the Consulting Period. This Agreement may not be modified or amended except in a writing signed by both you and a duly authorized officer of the Company. This Agreement shall bind the heirs, personal representatives, successors and assigns of both you and the Company, and inure to the benefit of both you and the Company, their heirs, successors and assigns. If any provision of this Agreement is determined to be invalid or unenforceable, in whole or in part, this determination will not affect any other provision of this Agreement and the provision in question shall be modified by the court so as to be rendered enforceable. This Agreement shall be deemed to have been entered into and shall be construed and enforced in accordance with the laws of the State of California as applied to contracts made and to be performed entirely within California. If there arises any legal proceedings to enforce or interpret this Agreement, the prevailing party shall be entitled to recover from the non-prevailing party in such proceedings her or its costs associated with such proceeding, including reasonable attorney fees, court costs, costs of investigation and the like.

Exhibit C

Language Describing Departure

Language for Report on Form 8-K, Item 5.02(b)

Effective as of {the Separation Date}, Adriana Chiochi, the Company's Senior Vice President, Chief Legal Officer and Corporate Secretary, resigned all her positions with the Company. She has agreed to provide consulting services to the Company through June 30, 2010.

Exhibit D

Form of Supplemental Release

This Supplemental Release is executed by Adriana Chiocchi ("Chiocchi") and delivered to Monolithic Power Systems, Inc. (the "Company") in accordance with the letter agreement between the Company and Chiocchi dated December ____, 2009 (the "Agreement"). Capitalized terms not defined in this Supplemental Release shall have the meaning ascribed to them in the Agreement.

1. In exchange for the Company's agreement to retain Chiocchi as a consultant the Company's payments to Chiocchi during the Consulting Period, the Company's payment to Chiocchi of the Additional Bonus and other consideration under this Agreement to which Chiocchi would not otherwise be entitled, Chiocchi hereby releases, acquits and forever discharges the Company, its parent, affiliates and subsidiaries, and its and their respective officers, directors, agents, servants, employees, attorneys, insurers, shareholders, successors, assigns and affiliates, of and from any and all claims, liabilities, demands, causes of action, costs, expenses, attorneys fees, damages, indemnities and obligations of every kind and nature, in law, equity, or otherwise, known and unknown, suspected and unsuspected, disclosed and undisclosed, arising out of or in any way related to agreements, events, acts or conduct at any time from the Separation Date, up to and including the execution date of this Supplement Release, including but not limited to:

(a) all such claims and demands directly or indirectly arising out of or in any way connected with Chiocchi's employment with the Company or the termination of that employment, including any claims or rights that Chiocchi may have under the Employment Agreement;

(b) claims or demands related to salary, bonuses, commissions, stock, stock options, or any other ownership interests in the Company, vacation pay, fringe benefits, expense reimbursements, severance pay, or any other form of compensation;

(c) claims pursuant to any federal, state or local law, statute, or cause of action including, but not limited to, the federal Civil Rights Act of 1964, as amended, including without limitation claims for attorneys' fees;

(d) the federal Americans with Disabilities Act of 1990;

(e) the federal Age Discrimination in Employment Act of 1967, as amended ("ADEA");

(f) the California Fair Employment and Housing Act and all other applicable state or local laws, whether or not in California; and

(g) tort law, contract law, wrongful discharge, discrimination, harassment, fraud, defamation, emotional distress, and breach of the implied covenant of good faith and fair dealing.

By signing this Supplemental Release, Chiocchi agrees that Chiocchi is giving up Chiocchi's rights and promising not to sue or pursue any claim or lawsuit against the Company for anything that occurred prior to the date of this Supplemental Release, other than those claims that the law does not allow Chiocchi to waive. If Chiocchi breaks this promise, Chiocchi agrees to pay the Company's costs and expenses (including reasonable attorneys' fees) related to the defense of any claims.

2. Section 1542 Waiver. CHIOCCHI UNDERSTANDS THAT THIS AGREEMENT INCLUDES A RELEASE OF ALL KNOWN AND UNKNOWN CLAIMS. Chiocchi acknowledges that Chiocchi has read and understands Section 1542 of the California Civil Code, which reads as follows: "**A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor.**" Chiocchi hereby expressly waives and relinquished all rights and benefits under that section and any comparable local or state law of any jurisdiction of similar effect with respect to Chiocchi's release of any known and unknown claims Chiocchi may have against the Company.

I HAVE CAREFULLY REVIEWED AND CONSIDERED THE TERMS OF THIS SUPPLEMENTAL RELEASE; I FULLY UNDERSTAND ALL OF ITS TERMS AND VOLUNTARILY AGREE TO EACH OF THEM; AND AM LEGALLY BOUND BY THIS SUPPLEMENTAL RELEASE.

MONOLITHIC POWER SYSTEMS, INC.

EMPLOYEE CONFIDENTIAL INFORMATION AND
INVENTION ASSIGNMENT AGREEMENT

Name of Employee: **Adriana Guevara Chiocchi**

As a condition of my employment with Monolithic Power Systems, Inc., its subsidiaries, affiliates, successors or assigns (together the “**Company**”), and in consideration of my employment with the Company and my receipt of the compensation now and hereafter paid to me by Company. I agree to the following:

1. **At-Will Employment.** I understand and acknowledge that my employment with the Company is for an unspecified duration and constitutes “at-will” employment. I acknowledge that this employment relationship may be terminated at any time, with or without good cause or for any or no cause, at the option either of the Company or myself, with or without notice.

2. **Confidential Information.**

(a) **Company Information.** I agree at all times during the term of my employment and thereafter, to hold in strictest confidence, and not to use, except for the benefit of the Company, or to disclose to any person, firm or corporation without written authorization of the Board of Directors of the Company, any Confidential Information of the Company; I understand that “**Confidential Information**” means any Company proprietary information, technical data, trade secrets or know-how, including, but not limited to, research, product plans, products, services, customer lists and customers (including, but not limited to, customers of the Company on whom I called or with whom I became acquainted during the term of my employment), markets, software, developments, inventions, processes, formulas, technology, designs, drawings, engineering, hardware configuration information, marketing, finances or other business information disclosed to me by the Company either directly or indirectly in writing, orally or by drawings or observation of parts or equipment. I further understand that Confidential Information does not include any of the foregoing items which has become publicly known and made generally available through no wrongful act of mine or of others who were under confidentiality obligations as to the item or items involved.

(b) **Former Employer Information.** I agree that I will not, during my employment with the Company, improperly use or disclose any proprietary information or trade secrets of any former or concurrent employer or other person or entity and that I will not bring onto the premises of the Company any unpublished document or proprietary information belonging to any such employer, person or entity unless consented to in writing by such employer, person or entity.

(c) **Third Party Information.** I recognize that the Company has received and in the future will receive from third parties their confidential or proprietary information subject to a duty on the Company’s part to maintain the confidentiality of such information and to use it only for certain limited purposes. I agree to hold all such confidential or proprietary information in the

Employee’s Initial: /s/ AC

strictest confidence and not to disclose it to any person, firm or corporation or to use it except as necessary in carrying out my work for the Company consistent with the Company's agreement with such third party.

3. **Inventions.**

(a) **Inventions Retained and Licensed.** I have attached hereto, as Exhibit A, a list describing all inventions, original works of authorship, developments, improvements, and trade secrets which were made by me prior to my employment with the Company, which belong to me, which relate to the Company's proposed business, products or research and development, and which are not assigned to the Company hereunder (collectively referred to as "**Prior Inventions**"); or, if no such list is attached, I represent that there are no such Prior Inventions. If in the course of my employment with the Company, I incorporate into any invention, improvement, development, product, copyrightable material or trade secret any invention, improvement, development, concept, discovery or other proprietary information owned by me or in which I have an interest, the Company is hereby granted and shall have a nonexclusive, royalty-free, irrevocable, perpetual, worldwide license to make, have made, modify, use and sell such Prior Invention as part of or in connection with such product, process or machine.

(b) **Assignment of Inventions.** I agree that I will promptly make full written disclosure to the Company, will hold in trust for the sole right and benefit of the Company, and hereby assign to the Company, or its designee, all my right, title, and interest in and to any and all inventions, original works of authorship, developments, concepts, improvements or trade secrets, whether or not patentable or registrable under copyright or similar laws, which I may solely or jointly conceive or develop or reduce to practice, or cause to be conceived or developed or reduced to practice, during the period of time I am in the employ of the Company (collectively referred to as "**Inventions**"), except as provided in Section 3(f) below. I further acknowledge that all original works of authorship which are made by me (solely or jointly with others) within the scope of and during the period of my employment with the Company and which are protectable by copyright are "works made for hire," as that term is defined in the United States Copyright Act.

(c) **Inventions Assigned to the United States.** I agree to assign to the United States government all my right, title, and interest in and to any and all Inventions whenever such full title is required to be in the United States by a contract between the Company and the United States or any of its agencies.

(d) **Maintenance of Records.** I agree to keep and maintain adequate and current written records of all Inventions made by me (solely or jointly with others) during the term of my employment with the Company. The records will be in the form of notes, sketches, drawings, and any other format that may be specified by the Company. The records will be available to and remain the sole property of the Company at all times.

(e) **Patent and Copyright Registrations.** I agree to assist the Company, or its designee, at the Company's expense, in every proper way to secure the Company's rights in the Inventions and any copyrights, patents, mask work rights or other intellectual property rights relating thereto in any and all countries, including the disclosure to the Company of all pertinent information

Employee's Initial: /s/ AC

-2-

and data with respect thereto, the execution of all applications, specifications, oaths, assignments and all other instruments which the Company shall deem necessary in order to apply for and obtain such rights and in order to assign and convey to the Company, its successors, assigns and nominees the sole and exclusive rights, title and interest in and to such Inventions, and any copyrights, patents, mask work rights or other intellectual property rights relating thereto. I further agree that my obligation to execute or cause to be executed, when it is in my power to do so, any such instrument or papers shall continue after the termination of this Agreement. If the Company is unable because of my mental or physical incapacity or for any other reason to secure my signature to apply for or to pursue any application for any United States or foreign patents or copyright registrations covering Inventions or original works of authorship assigned to the Company as above, then I hereby irrevocably designate and appoint the Company and its duly authorized officers and agents as my agent and attorney in fact, to act for and in my behalf and stead to execute and file any such applications and to do all other lawfully permitted acts to further the prosecution and issuance of letters patent or copyright registrations thereon with the same legal force and effect as if executed by me.

(f) **Exception to Assignments.** I understand that the provisions of this Agreement requiring assignment of Inventions to the Company do not apply to any invention which qualifies fully under the provisions of California Labor Code Section 2870 (attached hereto as Exhibit B). I will advise the Company promptly in writing of any inventions that I believe meet the criteria in California Labor Code Section 2870 and are not otherwise disclosed on Exhibit A.

4 . **Conflicting Employment.** I agree that, during the term of my employment with the Company, I will not engage in any other employment, occupation, consulting or other business activity directly related to the business in which the Company is now involved or becomes involved during the term of my employment, nor will I engage in any other activities that conflict with my obligations to the Company.

5 . **Returning Company Documents.** I agree that, at the time of leaving the employ of the Company, I will deliver to the Company (and will not keep in my possession, recreate or deliver to anyone else) any and all devices, records, data, notes, reports, proposals, lists, correspondence, specifications, drawings, blueprints, sketches, materials, equipment, other documents or property, or reproductions of any aforementioned items developed by me pursuant to my employment with the Company or otherwise belonging to the Company, its successors or assigns. In the event of the termination of my employment, I agree to sign and deliver the "**Termination Certification**" attached hereto as Exhibit C.

6 . **Notification to New Employer.** In the event that I leave the employ of the Company, I hereby grant consent to notification by the Company to my new employer about my rights and obligations under this Agreement.

7 . **Solicitation of Employees.** I agree that for a period of twelve (12) months immediately following the termination of my relationship with the Company for any reason, whether with or without cause, I shall not either directly or indirectly solicit, induce, recruit or encourage any of the Company's employees to leave their employment, or take away such employees, or attempt to

Employee's Initial: /s/ AC

-3-

solicit, induce, recruit, encourage or take away employees of the Company, either for myself or for any other person or entity.

8. **Conflict of Interest Guidelines.** I agree to diligently adhere to the Conflict of Interest Guidelines attached as Exhibit D hereto.

9. **Representations.** I agree to execute any proper oath or verify any proper document required to carry out the terms of this Agreement. I represent that my performance of all the terms of this Agreement will not breach any agreement to keep in confidence proprietary information acquired by me in confidence or in trust prior to my employment by the Company. I have not entered into, and I agree I will not enter into, any oral or written agreement in conflict herewith.

10. **Arbitration and Equitable Relief.**

(a) Except as provided in Section 10(f) below, I agree that any dispute or controversy arising out of, relating to, or in connection with this Agreement, or the interpretation, validity, construction, performance, breach, or termination thereof, shall be settled by binding arbitration to be held in Santa Clara County, California in accordance with the National Rules for the Resolution of Employment Disputes then in effect of the American Arbitration Association (the "**Rules**"). The arbitrator may grant injunctions or other relief in such dispute or controversy. The decision of the arbitrator shall be final, conclusive and binding on the parties to the arbitration. Judgment may be entered on the arbitrator's decision in any court having jurisdiction.

(b) The arbitrator shall apply California law to the merits of any dispute or claim, without reference to rules of conflicts of law. The arbitration proceedings shall be governed by federal arbitration law and by the Rules, without reference to state arbitration law. Employee hereby consents to the personal jurisdiction of the state and federal courts located in California for any action or proceeding arising from or relating to this Agreement or relating to any arbitration in which the parties are participants.

(c) The Company and I shall each pay one-half of the costs and expenses of such arbitration, and each shall separately pay its counsel fees and expenses.

(d) I understand that nothing in this Section 10 modifies my at-will status. Either I or the Company can terminate the employment relationship at any time, with or without cause.

(e) I HAVE READ AND UNDERSTAND SECTION 10, WHICH DISCUSSES ARBITRATION. I UNDERSTAND THAT BY SIGNING THIS AGREEMENT, I AGREE TO SUBMIT ANY CLAIMS ARISING OUT OF, RELATING TO, OR IN CONNECTION WITH THIS AGREEMENT, OR THE INTERPRETATION, VALIDITY, CONSTRUCTION, PERFORMANCE, BREACH OR TERMINATION THEREOF TO BINDING ARBITRATION, AND THAT THIS ARBITRATION CLAUSE CONSTITUTE A WAIVER OF MY RIGHT TO A JURY TRIAL AND RELATES TO THE RESOLUTION OF ALL DISPUTES RELATING TO ALL ASPECTS OF THE EMPLOYER/EMPLOYEE RELATIONSHIP, INCLUDING BUT NOT LIMITED TO, THE FOLLOWING CLAIMS:

Employee's Initial: /s/ AC

(i) ANY AND ALL CLAIMS FOR WRONGFUL DISCHARGE OF EMPLOYMENT; BREACH OF CONTRACT, BOTH EXPRESS AND IMPLIED; BREACH OF THE COVENANT OF GOOD FAITH AND FAIR DEALING, BOTH EXPRESS AND IMPLIED; NEGLIGENT OR INTENTIONAL INFLICTION OF EMOTIONAL DISTRESS; NEGLIGENT OR INTENTIONAL MISREPRESENTATION; NEGLIGENT OR INTENTIONAL INTERFERENCE WITH CONTRACT OR PROSPECTIVE ECONOMIC ADVANTAGE; AND DEFAMATION.

(ii) ANY AND ALL CLAIMS FOR VIOLATION OF ANY FEDERAL STATE OR MUNICIPAL STATUTE, INCLUDING, BUT NOT LIMITED TO, TITLE VII OF THE CIVIL RIGHTS ACT OF 1964, THE CIVIL RIGHTS ACT OF 1991, THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967, THE AMERICANS WITH DISABILITIES ACT OF 1990, THE FAIR LABOR STANDARDS ACT, THE CALIFORNIA FAIR EMPLOYMENT AND HOUSING ACT, AND LABOR CODE SECTION 201, *et seq*;

(iii) ANY AND ALL CLAIMS ARISING OUT OF ANY OTHER LAWS AND REGULATIONS RELATING TO EMPLOYMENT OR EMPLOYMENT DISCRIMINATION.

(f) I agree that it would be impossible or inadequate to measure and calculate the Company's damages from any breach of the covenants set forth in Sections 2, 3, and 5 herein. Accordingly, I agree that if I breach any of such Sections, the Company will have available, in addition to any other right or remedy available, the right to obtain an injunction from a court of competent jurisdiction restraining such breach or threatened breach and to specific performance of any such provision of this Agreement. I further agree that no bond or other security shall be required in obtaining such equitable relief and I hereby consent to the issuance of such injunction and to the ordering of specific performance.

11. **General Provisions.**

(a) **Governing Law; Consent to Personal Jurisdiction.** This Agreement will be governed by the laws of the State of California as applied to agreements between California residents entered and to be performed entirely within California. I hereby expressly consent to the personal jurisdiction of the state and federal courts located in California for any lawsuit filed there against me by the Company arising from or relating to this Agreement.

(b) **Entire Agreement.** This Agreement sets forth the entire agreement and understanding between the Company and me relating to the subject matter herein and merges all prior discussions between us. No modification for amendment to this Agreement, nor any waiver of any rights under this agreement, will be effective unless in writing signed by the party to be charged. Any subsequent change or changes in my duties, salary or compensation will not affect the validity or scope of this Agreement.

(c) **Severability.** If one or more of the provisions in this Agreement are deemed void by law, then the remaining provisions will continue in full force and effect.

Employee's Initial: /s/ AC

-5-

(d) **Successors and Assigns.** This Agreement may not be assigned without the prior written consent of the Company. Subject to the foregoing sentence, this Agreement will be binding upon my heirs, executors, administrators and other legal representatives and will be for the benefit of the Company, its successors, and its assigns.

CALIFORNIA LABOR CODE SECTION 2870

EMPLOYMENT AGREEMENTS; ASSIGNMENT OF RIGHTS

“(a) Any provision in an employment agreement which provides that an employee shall assign, or offer to assign, any of his or her rights in an invention to his or her employer shall not apply to an invention that the employee developed entirely on his or her own time without using the employer’s equipment, supplies, facilities, or trade secret information except for those inventions that either:

(1) Relate at the time of conception or reduction to practice of the invention to the employer’s business, or actual or demonstrably anticipated research or development of the employer.

(2) Result from any work performed by the employee for the employer.

(b) To the extent a provision in an employment agreement purports to require an employee to assign an invention otherwise excluded from being required to be assigned under subdivision (a), the provision is against the public policy of this state and is unenforceable.”

MONOLITHIC POWER SYSTEMS, INC.

TERMINATION CERTIFICATION

This is to certify that I do not have in my possession, nor have I failed to return, any devices, records, data, notes, reports, proposals, lists, correspondence, specifications, drawings, blueprints, sketches, materials, equipment, other documents or property, or reproductions of any aforementioned items belonging to Monolithic Power Systems, Inc., its subsidiaries, affiliates, successors or assigns (together the "**Company**").

I further certify that I have complied with all the terms of the Company's Confidential Information and Invention Assignment Agreement signed by me, including the reporting of any inventions and original works of authorship (as defined therein), conceived or made by me (solely or jointly with others) covered by that agreement.

I further agree that, in compliance with the Confidential Information and Invention Assignment Agreement, I will preserve as confidential all trade secrets, confidential knowledge, data or other proprietary information relating to products, processes, know-how, designs, formulas, developmental or experimental work, computer programs, data bases, other original works of authorship, customer lists, business plans, financial information or other subject matter pertaining to any business of the Company or any of its employees, clients, consultants or licensees.

I further agree that for twelve (12) months from this date, I will not directly or indirectly solicit, induce, recruit or encourage any of the Company's employees to leave their employment, or take away such employees, or attempt to solicit, induce, recruit, encourage or take away any employees of the Company, either for myself or for any other person or entity.

EXHIBIT D

MONOLITHIC POWER SYSTEMS, INC.

CONFLICT OF INTEREST GUIDELINES

It is the policy of Monolithic Power Systems, Inc. to conduct its affairs in strict compliance with the letter and spirit of the law and to adhere to the highest principles of business ethics. Accordingly, all officers, employees and independent contractors must avoid activities which are in conflict, or give the appearance of being in conflict, with these principles and with the interests of the Company. The following are potentially compromising situations which must be avoided. Any exceptions must be reported to the President and written approval for continuation must be obtained.

1. Revealing confidential information to persons not employed by the Company or misusing confidential information. Unauthorized divulging of information is a violation of this policy whether or not for personal gain and whether or not harm to the Company is intended. (The Confidential Information and Invention Assignment Agreement elaborates on this principle and is a binding agreement.)
2. Accepting or offering substantial gifts, excessive entertainment, favors or payments may be deemed to constitute undue influence or otherwise be improper or embarrassing to the Company.
3. Initiating or approving personnel actions affecting reward or punishment of employees or applicants where there is a family relationship or is or appears to be a personal or social involvement.
4. Initiating or approving any form of personal or social harassment of employees.
5. Investing or holding outside directorships in suppliers, customers or competing companies, including financial speculation, where such investment or directorship might influence in any manner a decision or course of action of the Company.
6. Borrowing from or lending to employees, customers or suppliers.
7. Acquiring a real estate interest adverse to the Company.
8. Improperly using or disclosing to the Company any proprietary information or trade secrets of any former or concurrent employer or other person or entity with whom obligations of confidentiality exist.
9. Unlawfully discussing prices, costs, customers, sales or markets with competing companies or their employees.
10. Making any unlawful agreements with distributors with respect to prices.
11. Improperly using or authorizing the use of any inventions which are the subject of patent claims of any other person or entity.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT TO
SECURITIES EXCHANGE ACT RULES 13a-14(a) and 15d-14(a), AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Michael R. Hsing, certify that:

1. I have reviewed this annual report on Form 10-K of Monolithic Power Systems, Inc., a Delaware corporation, for the period ended December 31, 2009, as filed with the Securities and Exchange Commission;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Company and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The following certification shall not be deemed "filed" for purposes of section 18 of the Securities Exchange Act of 1934 or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, whether made before or after the date hereof and irrespective of any general incorporation language in any filings.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER AND
CHIEF FINANCIAL OFFICER PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the annual report on Form 10-K of Monolithic Power Systems, Inc., for the year ended December 31, 2009 (the "Report"), each of the undersigned officers of Monolithic Power Systems, Inc. certifies pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to his respective knowledge:

- (1) the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended;
- and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of Monolithic Power Systems, Inc. for the periods presented therein.
